

# IPv6 Neighbor Discovery Cache

---

**Last Updated: July 31, 2012**

The IPv6 neighbor discovery cache feature allows static entries to be made in the IPv6 neighbor cache.

The per-interface neighbor discovery cache limit function can be used to prevent any particular customer attached to an interface from overloading the neighbor discovery cache, whether intentionally or unintentionally.

## Finding Feature Information

Your software release may not support all the features documented in this module. For the latest caveats and feature information, see [Bug Search Tool](#) and the release notes for your platform and software release. To find information about the features documented in this module, and to see a list of the releases in which each feature is supported, see the feature information table at the end of this module.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

## Information About IPv6 Static Cache Entry for Neighbor Discovery

Cisco Systems, Inc., 170 West Tasman Drive, San Jose, CA 95134-1706 USA

## IPv6 Neighbor Discovery

The IPv6 neighbor discovery process uses ICMP messages and solicited-node multicast addresses to determine the link-layer address of a neighbor on the same network (local link), verify the reachability of a neighbor, and track neighboring devices.

The IPv6 static cache entry for neighbor discovery feature allows static entries to be made in the IPv6 neighbor cache. Static routing requires an administrator to manually enter IPv6 addresses, subnet masks, gateways, and corresponding Media Access Control (MAC) addresses for each interface of each device into a table. Static routing enables more control but requires more work to maintain the table. The table must be updated each time routes are added or changed.

## Per-Interface Neighbor Discovery Cache Limit

The number of entries in the Neighbor Discovery cache can be limited by interface. Once the limit is reached, no new entries are allowed. The per-interface Neighbor Discovery cache limit function can be used to prevent any particular customer attached to an interface from overloading the Neighbor Discovery cache, whether intentionally or unintentionally.

When this feature is enabled globally, a common per-interface cache size limit is configured on all interfaces on the device. When this feature is enabled per interface, a cache size limit is configured on the associated interface. The per-interface limit overrides any globally configured limit.

## How to Configure IPv6 Neighbor Discovery Cache

- [Configuring a Neighbor Discovery Cache Limit on a Specified Device Interface, page 2](#)
- [Configuring a Neighbor Discovery Cache Limit on All Device Interfaces, page 3](#)

## Configuring a Neighbor Discovery Cache Limit on a Specified Device Interface

### SUMMARY STEPS

1. **enable**
2. **configure terminal**
3. **interface** *type number*
4. **ipv6 nd cache interface-limit** *size* [*log rate*]

## DETAILED STEPS

Command or Action	Purpose
<p><b>Step 1</b> <code>enable</code></p> <p><b>Example:</b></p> <pre>Device&gt; enable</pre>	<p>Enables privileged EXEC mode.</p> <ul style="list-style-type: none"> <li>Enter your password if prompted.</li> </ul>
<p><b>Step 2</b> <code>configure terminal</code></p> <p><b>Example:</b></p> <pre>Device# configure terminal</pre>	<p>Enters global configuration mode.</p>
<p><b>Step 3</b> <code>interface type number</code></p> <p><b>Example:</b></p> <pre>Device(config)# interface Ethernet 1/0</pre>	<p>Specifies an interface type and number, and places the device in interface configuration mode.</p>
<p><b>Step 4</b> <code>ipv6 nd cache interface-limit size [log rate]</code></p> <p><b>Example:</b></p> <pre>Device(config-if)# ipv6 nd cache interface-limit 1</pre>	<p>Configures a Neighbor Discovery cache limit on a specified interface on the device.</p> <ul style="list-style-type: none"> <li>Issuing this command overrides any configuration that may have been created by issuing the <b>ipv6 nd cache interface-limit</b> in global configuration mode.</li> </ul>

## Configuring a Neighbor Discovery Cache Limit on All Device Interfaces

## SUMMARY STEPS

- `enable`
- `configure terminal`
- `ipv6 nd cache interface-limit size [log rate]`

## DETAILED STEPS

Command or Action	Purpose
<p><b>Step 1</b> <code>enable</code></p> <p><b>Example:</b></p> <pre>Device&gt; enable</pre>	<p>Enables privileged EXEC mode.</p> <ul style="list-style-type: none"> <li>Enter your password if prompted.</li> </ul>

Command or Action	Purpose
<b>Step 2</b> <code>configure terminal</code>  <b>Example:</b> <pre>Device# configure terminal</pre>	Enters global configuration mode.
<b>Step 3</b> <code>ipv6 nd cache interface-limit size [log rate]</code>  <b>Example:</b> <pre>Device(config)# ipv6 nd cache interface-limit 4</pre>	Configures a neighbor discovery cache limit on all interfaces on the device.

## Configuration Examples for IPv6 Neighbor Discovery Cache

- [Example: Verifying a Neighbor Discovery Cache Limit Configuration, page 4](#)

### Example: Verifying a Neighbor Discovery Cache Limit Configuration

```
Device# show ipv6 interface Ethernet2/0

Interface Ethernet2/0, entries 2, static 0, limit 4

IPv6 Address          Age Link-layer Addr State  Interface
2001:0db8::93         0 aabb.cc00.5d02 REACH Et2/0
FE80::A8BB:CCFF:FE00:5D02 0 aabb.cc00.5d02 DELAY Et2/0
```

## Feature Information for IPv6 Neighbor Discovery Cache

The following table provides release information about the feature or features described in this module. This table lists only the software release that introduced support for a given feature in a given software release train. Unless noted otherwise, subsequent releases of that software release train also support that feature.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

**Table 1**      **Feature Information for IPv6 Neighbor Discovery Cache**

Feature Name	Releases	Feature Information
IPv6: Per-Interface Neighbor Discovery Cache Limit	15.1(3)T Cisco IOS XE Release 2.6	The per-interface neighbor discovery cache limit function can be used to prevent any particular customer attached to an interface from overloading the neighbor discovery cache, whether intentionally or unintentionally.  The following commands were introduced or modified: <b>ipv6 nd cache interface-limit, show ipv6 interface</b> .
IPv6 Static Cache Entry for Neighbor Discovery	12.2(8)T 12.2(17)SX1 12.2(25)SEA 12.2(25)SG 12.2(33)SRA Cisco IOS XE Release 2.1 15.0(2)SG 3.2.0SG	The IPv6 static cache entry for Neighbor Discovery feature allows static entries to be made in the IPv6 neighbor cache.  The following commands were introduced or modified: <b>ipv6 nd cache interface-limit, show ipv6 interface</b> .
