SUPPLEMENTAL LICENSE AGREEMENT FOR CISCO SYSTEMS NETWORK MANAGEMENT SOFTWARE: CISCO NETWORK PLANNING SOLUTION, CISCO NETWORK PLANNING SOLUTION – SERVICE PROVIDER, CISCO NETWORK PLANNING SOLUTION – NETWORK VALIDATION MODULE

IMPORTANT–READ CAREFULLY: This Supplemental License Agreement (“SLA”) contains additional limitations on the license to the Software provided to Customer under the End User License Agreement between Customer and Cisco. Capitalized terms used in this SLA and not otherwise defined herein shall have the meanings assigned to them in the End User License Agreement. To the extent that there is a conflict among any of these terms and conditions applicable to the Software, the terms and conditions in this SLA shall take precedence.

By installing, downloading, accessing or otherwise using the Software, Customer agrees to be bound by the terms of this SLA. If Customer does not agree to the terms of this SLA, Customer may not install, download, or otherwise use the Software.

ADDITIONAL LICENSE RESTRICTIONS

Restricted Version. Customer may install and use the Software only within a single specified classful IP network, for one concurrent user at a time. Customer may not de-register any one (1) license for the Software more than five (5) times per year without Cisco's prior written approval. Customers whose requirements exceed the restriction of use within a specified IP network must upgrade to the non-restricted version of the Software, which allows use of up to one hundred (100) additional classful IP networks, for one concurrent user at a time. Usage restrictions are enforced by license registration.

Non-Restricted Version. Customer may install and use the Software on Customer's classful IP network, for one concurrent user at a time. Using the non-restricted version, users may utilize the Software from the same classful IP network as the license server and up to one hundred (100) additional classful IP networks, within the Customer's network management environment. Usage restrictions are enforced by license registration. The deployment of the non-restricted device version is defined by the Installation and Use section in this document.

Installation and Use

Cisco Network Planning Solution, Cisco Network Planning Solution – Service Provider, Cisco Network Planning Solution – Network Validation Module: May be installed in either Stand-Alone or Floating mode. The Stand-Alone Mode allows Software to be used on a single workstation. Users of that workstation can operate Software and do not need a network connection. Floating Mode allows Software to be installed on a license server and allows each concurrent user to “check out” a license on an as-needed basis and return it automatically when completed. Each concurrent user must be on the same classful IP network as the license server. This license strictly prohibits Customer and any user from utilizing this Software for more than a single Customer network management environment.

Reproduction and Distribution

Customer may not reproduce nor distribute software.

DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS

Please refer to the Cisco Systems, Inc., End User License Agreement.

Product Documentation Set

The installation guide for your product is located on Cisco.com at this URL:

http://www.cisco.com/en/US/products/ps6363/prod_installation_guides_list.html

In addition, your product shipment includes an executable CD-ROM of the integrated Online Help system, which contains the documentation listed in the following sections:

Cisco Network Planning Solution

- Design and Analysis User Guide
- Design and Analysis Reference Guide
- Workflows Manual
- XDI User Guide
- Network Validation Module User Guide
- Flow Analysis User Guide
- Planning and Design User Guide
- Standard Model User Guides
- Specialized Model User Guides
- Administrator Guide
- Documentation Guide
- General Tutorials
- Design and Analysis Release Notes

Network Planning Solution-Service Provider

- Design and Analysis User Guide
- Design and Analysis Reference Guide
- Workflows Manual
- XDI User Guide
- Network Validation Module User Guide
- Flow Analysis User Guide
- Planning and Design User Guide
- Standard Model User Guides
- Specialized Model User Guides
- Administrator Guide
- Documentation Guide
- General Tutorials
- Design and Analysis Release Notes

Obtaining Documentation, Obtaining Support, and Security Guidelines

For information on obtaining documentation, obtaining support, providing documentation feedback, security guidelines, and also recommended aliases and general Cisco documents, see the monthly *What's New in Cisco Product Documentation*, which also lists all new and revised Cisco technical documentation, at:
