## Introduction

This document provides an overview of the compatibility between the available Content Networking platforms and their associated software versions and sevice modes.

## Prerequisites

### Requirements

There are no specific requirements for this document.

### Components Used

This document is not restricted to specific software and hardware versions.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

### Conventions

For more information on document conventions, see the Cisco Technical Tips Conventions.

## Background Information

The development cycle of Cisco Caching and Content Delivery products has led to a complex matrix of compatability. The matrix provided in the following section should assist in making compatibility decisions easier.
