## Introduction

This document resolves what to do when the "Click to Attend" URL is not available to a Cisco MeetingPlace scheduler from within the Lotus Notes client.

## Prerequisites

### Requirements

There are no specific requirements for this document.

### Components Used

The information in this document is based on Cisco MeetingPlace for Lotus Notes version 4.1.3.x.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

### Conventions

For more information on document conventions, refer to the Cisco Technical Tips Conventions.

## Problem

The "Click to Attend" URL is not available to a Cisco MeetingPlace scheduler from within the Lotus Notes client.

## Solution

To resolve the issue, the scheduler should follow these steps:

1. Open the message from Meeting View.

## 2. Press **Ctrl-E**.

This swaps the user from Edit mode to Reader mode. This is a feature of Lotus notes. The product is functioning as designed.
