Introduction

This document explains the codes displayed when the **activity** command is issued on the Cisco MeetingPlace server.

Prerequisites

Requirements

There are no specific requirements for this document.

Components Used

The information in this document is based on the Cisco MeetingPlace server software (all versions).

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

For more information on document conventions, refer to the [Cisco Technical Tips Conventions](#).

Send

When you issue the **activity** command and select **1**, the current state of all ports is displayed. There are several two-letter designations that show what the states are.

Codes

Note: Some of these occur only briefly.

Code	Description
--	Idle
FA	Finding Application
TC	Terminate Call
SC	Starting Call
CD	Conference Direct (used for direct inward dial [DID] setups)
PR	Profile Access (used for DID setups)
MN	MeetingNotes (used for DID setups)
CA	Combined Access
CO	Conference (someone is in a conference)
GO	GUI Outdial (someone initiated a call from Cisco MeetingTime)
SO	SIM Outdial (a MAJ/MIN alarm is outdialing)
