Details

Changes in 4.1.3 (from 4.1.0)

Changes in 4.1.4 (from 4.1.3)

Changes in 4.2.0 (from 4.1.4)

Changes in 4.3.0 (from 4.2.0)

Related Information

Introduction

Raw Reports, such as Raw Meeting Detail Reports, are often used as a base to create other reports using a spreadsheet application such as Microsoft Excel. Therefore, an addition or deletion to a field within those reports can affect the spreadsheets that use them. The spreadsheets that make use of those reports will need to be updated if a server upgrade is performed that consists of changes to the Raw Reports. This document discusses the changes that have been made to those reports between Cisco MeetingPlace server software versions 4.1.x and 4.3.0.

Prerequisites

Requirements

There are no specific requirements for this document.

Components Used

The information in this document is based on these software versions:

- Cisco MeetingPlace server software versions 4.1.x to 4.3.0

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

For more information on document conventions, refer to the Cisco Technical Tips Conventions.

Details

These sections show the changes that were implemented in the various Cisco MeetingPlace server software

versions.
