## Introduction

Refer to this document for additional information.

## Prerequisites

### Requirements

There are no specific requirements for this document.

### Components Used

This document is not restricted to specific software and hardware versions.

### Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

## Additional Information

The following documents provide additional information about the types of ADSL service discussed in this step-by-step guide.

- PPPoA Baseline Architecture
- PPP over Ethernet Client (PPPoE) (the Cisco router is the PPPoE client)
- PPPoE Baseline Architecture for the Cisco 6400 UAC (the PC is the PPPoE client)
- RFC1483 Bridging Baseline Architecture
- DSL Technology Support Pages for additional sample configurations of DSL service.

Return to the main page of this guide.

## Verify

There is currently no verification procedure available for this configuration.

## Troubleshoot

There is currently no specific troubleshooting information available for this configuration.
