Related Information

Introduction

This document lists the supported versions of the third party products with the various voice applications, such as Cisco CallManager, Cisco Unity and Cisco ICM/IPCC Enterprise & Hosted Editions.

Prerequisites

Requirements

Cisco recommends that you have knowledge of these topics:

- Cisco CallManager
- Cisco Unity
- Cisco ICM/IPCC Enterprise & Hosted Editions

Components Used

The information in this document is based on these software and hardware versions:

- Cisco CallManager 3.1(x) and later
- Cisco Unity 4.2 and later
- Cisco ICM/IPCC Enterprise & Hosted Editions, Releases 7.0(0) SR1 to SR4, and 7.1(x)

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Third Party Software Support for Voice Applications

	iLO	Ships with HP-based Cisco media convergence servers; for administrator use only.

Refer to Third-Party Platform Agents Running with Cisco CallManager for more information on the third party software products supported on Cisco CallManager.

Third Party Software Support for Cisco Unity 4.2 and Later

The table in this section lists the supported third party software products for Cisco Unity 4.2 and later.

Note: Cisco support policy is that customers can deploy third party virus-scanning software on the Cisco Unity server. However, Cisco expects that customers (or their systems integration partners) will have tested the interoperability of such products with Cisco Unity before the products are deployed. This mitigates the risk of problems being discovered within the production environment between Cisco Unity and the third party products loaded on the Cisco Unity server.

Note: Some third party software that is qualified for use with Cisco Unity might not be qualified for use with Windows Server 2003. Refer to the manufacturer documentation for more information.

Application	Third Party Software
Anti-Virus Software	<ul style="list-style-type: none"> • Computer Associates InoculateIT for Microsoft Windows NT and Windows 2000, version 4.53, build 627 and later • McAfee <ul style="list-style-type: none"> ◆ ePolicy Orchestrator, version 3.0 and later. The ePolicy Orchestrator agent is supported for use on the Cisco Unity server only when it is configured to accept updates rather than act as the source for pushing updates to other computers. ◆ GroupShield Domino, version 5.0 and later ◆ NetShield for Microsoft Windows NT and Windows 2000, version 4.5 and later ◆ VirusScan Enterprise, version 7.0 and later • Symantec

	<ul style="list-style-type: none"> ◆ AntiVirus Corporate Edition, version 8.1 and later ◆ Norton AntiVirus for Lotus Notes/Domino, version 2.5 and later ◆ Norton AntiVirus for Microsoft Exchange, version 2.13 and later ◆ Norton AntiVirus for Microsoft Windows NT and Windows 2000, version 5.02 and later • Trend Micro <ul style="list-style-type: none"> ◆ ScanMail for Lotus Notes, version 2.5 and later ◆ ScanMail for Microsoft Exchange 2000, version 5 and later ◆ ServerProtect for Microsoft Windows, version 5.5 and later
