## Introduction

This document explains how to configure Cisco Unified Call Studio, Universal Edition, to use a workspace location other than the default: Studio\eclipse\workspace.

## Prerequisites

### Components Used

The information in this document is based on Cisco Unified Call Studio, Universal Edition.

### Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

## Background Information

**Symptoms:** N/A

**Resolution:** There are two ways to make this change:

1. You can make the change from within Cisco Unified Call Studio. Start Studio and, from the menu options, choose **File > Switch Workspace**.
2. You can edit the file, **startStudio.cmd**, which is located in the main Cisco Unified Call Studio folder; either delete the **-data eclipse\workspace** portion, or change it to the desired folder.

**Note:** If you delete it, Cisco Unified Call Studio asks you for the location of a workspace at startup.
