Introduction

The Substitution Tag Builder in the Cisco Unified Call Studio, Universal Edition, has been improved; this document describes the changes.

Prerequisites

Components Used

The information in this document is based on Cisco Unified Call Studio, Universal Edition.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Background Information

Symptoms: N/A

Resolution: Under the *Session Data* tab in the Substitution Tag Builder, the field has been changed from a text field to an editable combo box.

This combo box lists known session data variables and also allows the user to enter a new value, which provides more flexibility and greater ease of operation.
