

CCNA VOLUNTEER INTERNSHIP PROGRAM

WHY IS JOSH EXCITED?

Josh is a lateral thinker! Having gained his CCNA Certification, Josh was struggling to gain employment. Josh took the plunge and enrolled into the CCNA Volunteer Internship Program. The outcome – he was selected to participate in the CCNA Volunteer Internship Program. Having completed the program, Josh has just gained permanent employment with a large corporate entity.

WHAT DID JOSH GAIN?

Job skills, leadership skills and engagement skills training – greater interviews and higher offer rate

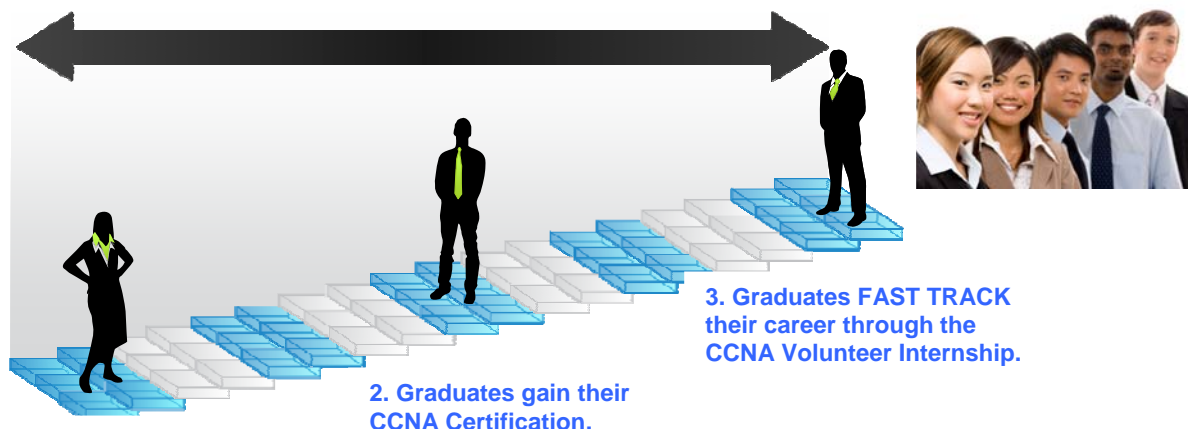

4 weeks volunteer placement – all within a corporate environment + the potential to gain permanency thereafter

2 weeks practical skills training in a CISCO environment

Research indicates that many graduates attribute “lack of industry exposure” as the main reason why they struggle to find employment in their chosen field. The CCNA Volunteer Internship Program allows individuals to volunteer themselves in the pursuit of industry exposure. Under a 6-week volunteer program, CCNA Certified Graduates whom have completed the CISCO industry certification at a Pearson Vue Testing Centre gain invaluable industry exposure through organisations wishing to provide the opportunity to develop engagement skills, leadership skills and other skills relating to networking. At completion of the program, Volunteer Interns are given a reference highlighting their contribution and milestones.

THE CCNA VOLUNTEER INTERNSHIP LIFECYCLE

1. Individuals gaining or have gained their qualifications through The CISCO Networking Academy Program in TAFE and Universities which incorporates the CCNA curriculum.

2. Graduates gain their CCNA Certification.

3. Graduates FAST TRACK their career through the CCNA Volunteer Internship.

DID YOU KNOW?

100% of all CCNA Volunteer Interns that participated in the previous intake have secured FT employment OR have progressed to final interview stage (awaiting formal offers).
