Digitizing Higher Education

Here at Cisco, we're creating powerful solutions that bring digital technology to the forefront of higher education.

See how we're partnering with universities around the world, helping them to successfully implement a digital strategy and use technology as a differentiator.

Digital Institution

Deliver staff, building, and energy efficiency through the use of technology.

Digital Teaching, Learning and Research

Use technology to pioneer new ways of teaching, learning, and research to increase admissions and retention.
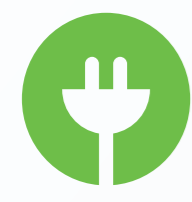

Digital Campus and Communities

Transform the built environment to reduce costs and deliver the best experience for students, staff, and stakeholder communities.

> "There is the saying in business: 'digitally disrupt or be digitally disrupted.' This now applies equally to the ever-more competitive university sector."

The Digital Institution

Use technology to monitor and control utility services

Change working and learning styles by enabling location-independent services

Create a built environment that supports the changing needs of staff, educators, students and researchers

Reduce capital and operational costs of IT

Implement collaboration tools to make learning more accessible

University of New South Wales

Digitally transforming campus and community by...

Deploying **4,000** wireless access points

Delivering great user experiences to more than **55,000** people over **168,000** devices

Gathering location-based information to create heat maps of campus and better manage classroom space

Providing strong wireless connectivity to implement new teaching and learning styles

Making facilities management more efficient through the use of video surveillance cameras and sensors to determine custodial schedule and waste removal

San Jose State University

Pioneering new teaching methods using innovative classroom technologies by...

Developing next-generation learning spaces used to capture, manage and share lectures

Increasing off-campus participation in lecture-based courses

Enabling collaborative teaching efforts with partner institutions and stakeholder communities worldwide

Implementing new teaching methods such as flipped learning, virtual classroom and self-guided learning
