

Deliver Business Applications Quickly with SmartStack for Oracle

Nimble Storage SmartStack™ for Oracle provides a pre-validated reference architecture that speeds up deployments and minimizes risk. IT and Oracle administrators and architects realize the importance of an integrated infrastructure with Operating System, Virtualization software, Server and Storage in maintaining services levels and staying in budget. In this session, you will learn how Nimble Storage SmartStack for Oracle provides an integrated infrastructure for Oracle databases with Cisco UCS, Nimble Storage and Oracle Linux.

SmartStack delivers the tools and integrations that help make deployment and operational management rapid and simple, whether deploying Oracle DB on a single node or running Oracle Real Application Clusters (RAC) on multiple nodes at enterprise scale.

Nimble Storage SmartStack for Oracle with Cisco can help provide:

- Improved Oracle performance and reliability
- Stress-free data protection and DR of your Oracle database
- Higher availability and uptime
- Accelerate Oracle development and improve testing
- All for dramatically less than what you're paying now
