

## Benefits

- **Enhance the quality** of teaching and learning and spark innovation
- **Heighten and extend the student experience** with pervasive Wi-Fi, video collaboration, and virtual learning
- **Accelerate productivity and collaboration** in research and development
- **Bring greater levels of operational efficiency** to campus administration and management
- **Transform the campus and online environment** for better safety and security

# Cisco Education

## Learn Without Limits: The Power of Digital in Higher Education

Imagine a digital university or college. Students with mobile devices learn anywhere and at any time. Professors engage with them in classes and online communities or through interactive video and virtual labs. Online courses expand the university's reach and complement traditional instruction, creating global classrooms and blended learning environments. Wi-Fi, sensors, and analytics connect the campus with a digital overlay that dramatically improves operational efficiency, while creating a safe and secure campus.

This is the power of digitization with Cisco.

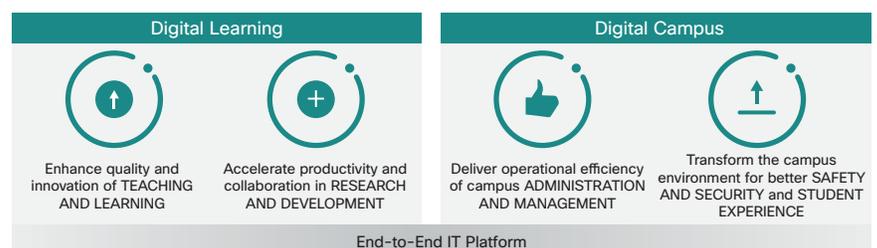

## Empowering Better Outcomes

We work with our ecosystem of trusted partners to offer a comprehensive platform of solutions for higher education and research institutions, helping you to:

- Expand access to education
- Improve student outcomes
- Consolidate administrative and management services
- Reduce costs
- Improve physical safety
- Secure networks and data
- Empower collaboration
- Gather actionable data
- Deliver innovative teaching and learning experiences

## Empower Effective and Engaging Real-World Learning

Built upon the secure, scalable, and reliable Cisco® intelligent network, Cisco Education solutions help universities, colleges, and research institutions to become digital.

“We are transforming the way we deliver education, conduct meetings, communicate with each other on campus and off, and the way our campus collaborates.”

---

**Terry Vahey**

Associate Vice President of Information and Technology and CIO,  
San Jose State University

**Digital Learning:** Cisco Digital Learning solutions change not only where students learn, but also **how** they learn and **how much** they learn by supporting innovative learning models such as flipped classrooms and interactive learning courses. They increase student engagement, enable personalized learning, and create the ability to learn anywhere at any time for an unsurpassed learning experience and improved learning outcomes.

**Digital Campus:** Cisco Digital Campus solutions enable higher education institutions to address issues in critical areas of the campus, such as parking, campus security, lighting, and waste management. At the same time, they enable new services such as pervasive Wi-Fi access across the entire campus, context and location-based services, digital signage, and others. These solutions create operational efficiency, organizational agility, and campuswide safety measures for a secure, fully connected, high-performing learning environment.

**End-to-End IT Platform:** The IT platform serves as the foundation for digital transformation. It's the core on which the digital overlay sits and enables higher educational institutions to truly transform how they deliver education.

### Next Steps

Keep up with the latest trends and learn how you can digitally transform by following the [Cisco Education blog](#).
