

Cisco Learning Services - Service Provider Video

What Is the Value of Cisco® Learning Services Service Provider Video Training?

Consumer appetite for new video experiences and the emergence of the Internet-connected lifestyle is developing at a rapid pace; so fast, that many service providers and media companies are struggling to keep pace. Businesses that integrate service provider video training can remain competitive by delivering new and exciting services faster than ever before.

What Problems Are Solved with Cisco Learning Services Service Provider Video Training?

Cisco Learning Services Service Provider Video training identifies, qualifies, trains, and helps enable you to provide solution services for Cisco video solutions. By taking advantage of this training you can experience faster time to market, investment protection, and consistent support experiences. Your organization will also be better prepared to handle business challenges such as declining customer service, increases in operating expenses, enabling greater employee productivity, the need to simplify or improve business processes to support growth, expansion, and acquisition, and the need to address competitive pressures specific to your industry.

Cisco Learning Services Service Provider Video Offerings

Cisco and its partners can help customers deploy a robust, dependable solution by taking a lifecycle approach that addresses all aspects of deployment, operations, and optimization:
