Cisco Compliance Management and Configuration Service Express

Compete Faster, Smarter with Cisco Expertise

Networks are constantly changing. Partly that is because they must conform to internal policies and best practices as well as commercial and regulatory standards that are continually being altered. Many companies struggle to consistently implement and manage changes in compliance across complex and evolving networks. These companies must adhere to increasing security requirements, internal best practices, and commercial and regulatory standards. According to Gartner*, 85 percent of network problems are caused by changes, 60 percent of network outages are caused by human error, and 47 percent of changes are not accounted for or authorized. How can you eliminate or decrease problems like these?

Cisco® Compliance Management and Configuration Service (CMCS) Express, over a period of 90 days, provides detailed reports comparing the manageability maturity of your in-scope infrastructure against a baseline of manageability leading practices.

CMCS Express is provided in three phases during the service term:

- **Phase 1:** CMCS Express implementation;
- **Phase 2:** Network discovery, data collection, and upload; and
- **Phase 3:** Data analysis and reporting.

Cisco CMCS Express uses Cisco experience and expertise, processes, and tools to analyze your infrastructure and rate it against the best manageability practices.

Why CMCS Express?

Mitigate risk by getting informed against leading practice guidelines for noncompliant configurations, helping reduce the risk of human error.

Increase noncompliance cost awareness through a plethora of reports comparing the manageability maturity of your in-scope infrastructure.

What customers are saying:

"My job is to build and sell manufactured finished goods not manage compliance in my organization. Anything that takes me away from my core business is a distraction. Anyone who can come in and solve this problem for me so I can focus on my core competency will get my business."

CIO of Leading Manufacturing Company

"We're very excited about this service. We think this is the most significant initiative we have this year."

Director, Leading IT Company

"I want to be a part of this. This is exciting."

Senior Vice President, Global Bank

Cisco Solution

Cisco CMCS Express helps you understand organizational, commercial, and regulatory compliance across the entire network. CMCS Express provides visibility into the network environment to strategically address expanding compliance and change needs. When you have this depth of visibility, you can identify and resolve issues more quickly, increase efficiency, and ultimately reduce risk. Cisco CMCS Express helps you achieve and maintain ongoing compliance.

Cisco CMCS Express uses Cisco intellectual property and operational expertise to measure network configurations against a comprehensive library of standards to deliver compliance reports covering DSH, FISMA, HIPAA, NERC, PCI DSS, SOX, and a list of other policy reports.

Sample Reports

- DSH compliance report
- FISMA compliance checklist analysis
- HIPAA compliance checklist analysis
- NERC compliance checklist analysis
- PCI DSS V3.0 compliance checklist analysis
- SOX (COBIT) compliance checklist analysis
