

Ease Your Transition with Cisco Capital Financing

Microsoft support for all versions of Windows Server 2003 and Windows Server 2003 R2 ends on July 14, 2015.

After this date, updates will no longer be available, and your business will become exposed to compliance and security risks. Anticipating wide-scale changes before the impending deadline, Cisco™ and Microsoft™ have teamed up to provide the best single-platform solution on the market.

Windows Server 2012 R2 and System Center 2012 R2 are central to Microsoft's Cloud OS vision, delivering enhancements and new features in virtualization, management, storage, networking, and more. Cisco's server infrastructures as well as its management and network capabilities are purpose-built for virtualization and the cloud. Together Microsoft and Cisco provide integrated and flexible solutions that deliver on the benefits of a Microsoft private or hybrid cloud.

It's time to move to a modern platform built on Windows Server 2012 R2, System Center 2012 R2, and Cisco UCS server infrastructure. Upgrade your environment today to reduce IT costs, improve service delivery, and avoid the challenges associated with maintaining a legacy platform.

To help ease your transition Cisco Capital™ is offering deferred payments—no need for any upfront cash investment. We will defer your payments for 6 months and provide you with predictable payments with this special offer.*
