Use Cases

- **Distance and online learning:** Increase enrollment by extending courses to students across town or around the world.
- **Student experience:** Erase traditional class room boundaries with guest lecturers or virtual field trips as well as the ability to include home bound students.
- **Student productivity:** Free Cisco Spark M2 student accounts to enable virtual collaborative work groups. (Higher Education)
- **Virtual office hours:** Professors can offer convenient face-to-face office hours from anywhere. Students can park in a virtual waiting room until the professor is available.
- **K-12 After hours:** Teachers can offer convenient after hours tutoring and can hold virtual parent teacher conferences at times convenient for working parents.
- **Curriculum creation:** Enable anytime, anywhere collaboration with colleagues to work on curriculum ideas and content.
- **Accelerate research:** Connect professors and students from other universities to collaborate on research projects accelerating innovative outcomes.
- **Professional development:** Reduce costs and increase attendance for development training by minimizing travel. Teachers can attend from anywhere.
- **Administration efficiencies:** Increase productivity and make faster decision with Cisco WebEx and Spark. Lower costs with remote IT support with Cisco WebEx Support Center. Broadcast board and PTA meetings to the public to increase attendance and community participation.

Why Cisco?

- **Reliability and performance:** We've built a global network that ensures fast, reliable, real time performance of your collaboration applications.
- **Security:** We understand the importance of security everywhere. That's why Cisco offers end-to-end data encryption, meeting password protection, single-sign-on (SSO), network and data center security.
- **Complete solution:** Cisco offers a complete integrated collaboration portfolio solution with audio, video, web meetings, virtual work spaces, white boarding, and recording as well as LMS integrations from Cisco Solution Partners.*
