Changes in Behavior

Smart Identifier Changes	Prior to this release, the email gateway would detect a smart identifier only if the message contained the keyword ('credit,' 'ssn,' 'cusip,' or 'aba') added before the smart identifier.
	After you upgrade to this release, the email gateway now detects a smart identifier in the message, irrespective of the keyword added before the smart identifier.
	✎ **Note** This behavior change is only applicable when you upgrade your email gateway to 14.0.1-103 release.

Upgrade Paths

You can upgrade to release 14.0.1-103 from 14.0.0-698 version.
