

Release Notes for Cisco Connected Analytics for Network Deployment Software Release 1.7.2

May 3, 2016

This document provides the features and open caveats for Cisco® Connected Analytics for Network Deployment (CAND) Release 1.7.2. For further information about CAND functionality, see the [Related Documentation](#) section of this document.

Contents

This document contains the following sections

- [Enhancements](#)
- [Supported Browsers](#)
- [Supported OS Types](#)
- [Open Issues](#)
- [Product Coverage](#)
- [Related Documentation](#)

Enhancements

CAND Release 1.7.2 implements features and addresses some of the defects that impact user experience.

CAND Release 1.7.2 enables users to export data from different levels under Detail Deployment Analysis, such as Network Analysis, Software Analysis, and Optimization Implementation. It allows users to export device detail information (raw data) from different hierarchical groups. Users can now view the support case count, in addition to other details, while hovering their cursor over the bubble graph for Index Analysis. The grid view allows users to view the support case details and explicitly export the details, for groups where Network Deployment Indicator (NDI) scores are available.

Supported Browsers

The following browsers are supported when using the CAND portal:

- Apple Safari (two most recent stable versions) on OSX only
- Google Chrome (two most recent stable versions)
- Mozilla Firefox (two most recent stable versions)

Supported Cisco OS Types

Supported Cisco operating system types include: CAND:

- Cisco IOS®
- Cisco CatOS
- Cisco NX-OS
- Cisco IOS-XR
- Cisco IOS-XE
- Cisco wireless devices
- Cisco ASA
- Cisco UCS® NX-OS

Open Issues

Table 1 lists the open issues in this software release.

Table 1 Open Issues for Release 1.7.2

CDETS ID	Headline	Severity	Details
CSCut05392	Sorting mark is not present in the column	Cosmetic	When a user visits the tabular data for the first time, the sorting indicator is not available. Once the user clicks on the column header, the sorting mark appears.
CSCut07553	Sorting functionality behaves differently than expected on the hardware or software device details page	Minor	Records are sorted using a case-sensitive algorithm. Therefore, as an example, records starting with 'a' and 'A' are grouped separately.
CSCut42980	Delete functionality is missing from the "My Report" link	Minor	Delete functionality is missing from the "My Report" link. Users are not able to delete any reports. This does affect the function of the tool.
CSCuu71926	Misleading detail regarding the path of device when using a device search	Moderate	After selecting a search result on the detailed deployment analysis page, the breadcrumbs displayed near the top (hierarchical link) do not match the path of the selected search result. Instead the path shown is based on the path taken prior to launching the search.
CSCuu82173	Compile Date & Time is shown blank on Hardware Details section for WLC devices	Minor	When drilled-down to hardware details for wireless devices, the compile date and time is blank.
CSCuu97518	Exported data of "Flagged Devices" shows additional columns	Moderate	After exporting the tabular data of "Flagged Devices," the exported data shows two additional columns ("Updated" and "DeviceId") which can be ignored.
CSCuv00141	Default collection date changes when switching from "Analysis" to "Summary"	Moderate	The default collection date shown in the "Detailed Deployment Summary" page changes when switching to the "Detailed Deployment Analysis" page and again when returning to the "Detailed Deployment Summary" page. Workaround: Use the date dropdown or one of the KPI trend charts to switch to the desired date.
CSCuv00612	The consistency and feature utilization indices displayed on the "Detailed Deployment Summary" page does not change when filtering by product family	Moderate	The consistency and feature utilization indices (KPIs) can be viewed at the product family level by viewing the bubble chart located below the KPIs.
CSCuv40674	The breadcrumb links do not take the user to the previous tab	Enhancement	The breadcrumb link should take the user to the previously viewed screen, but instead it takes the user to the Network Analysis screen.
CSCuv40679	Time filter on the "Deployment Analysis Summary" page orders the collections incorrectly	Enhancement	The time filter on the Deployment Analysis Summary page lists the oldest collection first, instead of the most recent
CSCuv50708	Incident cases reflect null in graphical view when there are zero	Minor	In cases where there are no incident cases, the graphical view shows null, and the tabular view shows 0
CSCuv65678	Individual modules of the KPIs show decimal values	Enhancement	KPI (Disruption Index, Consistency Index, Feature Utilization) values are expressed as decimal numbers, but should be expressed as integers
CSCuv82907	Default software simulation information is not visible when using Google Chrome	Minor	When using Google Chrome, the software simulation table displays one row at a time; user must scroll to view other rows
CSCuv86783	On the "Detailed Deployment Analysis" page, a "No Data Available" message is displayed while loading the bubble chart	Minor	When browsing to the "Detailed Deployment Analysis" page, a "No Data Available" message appears as the bubble graph loads

■ Product Coverage

CSCux01899	Changes made in the "In grouping" column are not reflected in the custom grouping	Enhancement	When a user changes the value to N in the "In grouping" column within the custom device grouping template, and uploads the modified file, after the data is processed these devices are not moved to the "Unspecified" group.
CSCux25552	Exporting of chart view is disabled, but table view exports	Minor	The exported JPG displays as a black image
CSCux25561	Tool tip should show change values in red or green	Minor	The tool tip in the "Support Case" section does not indicate the changes in green or red
CSCux48645	Filters are not showing default values properly on the user interface	Cosmetic	When adding filters for HW, SW version, Platform, and Contracts, the user interface displays "No platforms," "No Versions," "No Contracts," and "No items," respectively, despite having default values present
CSCux51329	Filter drop down details does not display full information	Minor	The items listed in the drop-down menu show only partial text (in cases when listed items contain lengthy text)
CSCux53225	In the support case section, filter selections do not respond to initial click	Minor	The filter drop-down menu does not respond to initial click; must be clicked several times before the filter details appear
CSCux53979	In support case trend section, for open cases, open and opened cases are displayed	Enhancement	All three check boxes (Open, Created, Closed) are selected at all times regardless of filtering options selected
CSCux76900	X-axis values in support case trending graph are not in proper sequence	Minor	When choosing the HW breakdown options in the support case trending graph, and choosing "Others" from HW options in support cases, the data shows x-axis values in improper sequence

Product Coverage

For a complete list of supported devices, refer to the [CAND supported devices list](#).
