

Release Notes for Cisco Connected Analytics for Network Deployment (CAND) Software Release 1.2

November 19, 2014

This document provides the features and open caveats for Connected Analytics for Network Deployment (CAND) Release 1.2. For further information about CAND functionality, see the [Related Documentation](#) section of this document.

Contents

This document contains the following sections

- [Open Issues](#)
- [Enhancements](#)
- [Supported Browsers](#)
- [Supported OS Types](#)
- [Product Coverage](#)
- [Related Documentation](#)

Open Issues

Table 2 lists issues that are in open status in this software release.

Table 1 *Open Issues*

CDETS ID	Headline	Severity	Details
CSCur28618	The margins and sizing of all the message dialog boxes are not compliant	minor	Margins across the message dialog box are not compliant to the design; no workaround
CSCur62559	Breakdown drop down issue when last 1 quarter for Cisco managed cases	minor	In “All Support Cases” when using the breakdown option for “software version,” if there are no records for this selection then the entire breakdown option disappears. This happens for both bar charts and line charts. Workaround – refresh the screen
CSCur62562	Pie chart breakdown by severity has an issue	minor	In “All Support Cases” there is an overlapping of text when there are no records; no workaround
CSCur52293	Average days to closed legend getting overlap on breakdown option	cosmetic	In “All Support Cases” average days to closed legend overlaps for breakdown options; no workaround
CSCur60405	Content layout and alignment is not correct in custom device group management widget	cosmetic	Improper spacing on custom device page; no workaround
CSCur55502	State not maintained for user selections in case management	enhancement	In “All Support Cases” when user switches from All Support Cases to either Cisco Managed Cases/Self-managed Cases, and then tries to filter based on the date range, after the page reloads it returns user to “All Support Cases” again. The state is not maintained for Cisco managed cases and self-managed cases, for the user selection; no workaround

Enhancements

CAND Release 1.2 implements features and improvements in the following areas:

- Enhanced software simulation capability with offline approach
- Third-party service request support for Cisco devices: network deployment index (NDI) algorithm, case management, and upload capability with template provided by application
- Functional grouping scenario
- Contract uploading capability for NDI and case management
- NDI algorithm enhancement by software and operational redefinition
- Supported devices expanded to include Cisco XR and XE operating systems
- NDI scale changes to match consistency and complexity
- Summary report upload
- Enhancement to link CDETS, service requests

Supported Browsers

The following browsers are supported when using the Connected Analytics for Network Deployment (CAND) portal:

- Apple Safari 5.x and 6.x on OSX only
- Google Chrome 29 and 30
- Microsoft Internet Explorer 9 and 10
- Mozilla Firefox 24 and 25

Supported OS Types

The following operating system types are supported by Connected Analytics for Network Deployment (CAND):

- Cisco IOS
- Cisco CatOS
- Cisco NX-OS
- Cisco IOS-XR
- Cisco IOS-XE

Product Coverage

For a complete list of supported devices, refer to the [CAND supported devices list](#).
