Tilt the display manually to get a better view angle.

The lens cap (privacy cover) is held in place by a magnet.

Tilt the camera manually to make it point at you.

Turn the ring to focus the camera. To see yourself, press the Selfview key on the remote control.

Headset recommendations

Standard PC headsets with 3.5 mm jacks are compatible with the 1700 MXP. Having a headset with microphone is optional.

See the user documentation for more information about using a headset with 1700 MXP and for technical headset recommendation.

Connect the video system to your LAN

Power

Audio/Line in

To let the PC and the video system share a single LAN connection, connect your PC to the LAN through the video system.

Getting started

The 1700 MXP turns on automatically when you power up the system. Use the remote control to navigate in the menu.

Installation wizard

The Installation Wizard starts automatically when the video system is installed at the first time and guides you through the basic configuration of the system in the following steps:

- Welcome page
- Select Language
- Enter System Name
- Enter Software Option Keys
- Enter IP Settings
 - Obtain IP Address Automatically
 - Static IP Address (address, subnet, gateway)
- Enter SIP Settings
- Enter External Management settings
 - On: Enter information for your TMS server (address, path)
 - Off: Select from the list:
 - Gatekeeper and enter the gatekeeper settings
 - Call Manager and enter the call manager settings
 - Direct
- Finish the wizard. The system will automatically restart the system.

The Installation Wizard can be run any time from the Control Panel menu.
