  Obtaining Documentation, Obtaining Support, and Security Guidelines vii

CHAPTER 1
SIP Standard Line Interface 1-1
  New and Changed Information 1-1
Preface

This document is an addendum and describes the major interface changes to Cisco Unified Communications Manager (Unified CM) Session Initiation Protocol (SIP) line side devices that were introduced between Unified CM 7.0 and 7.1(3).

Note

This chapter describes the new features and callflows added to Unified CM 7.1(3). Since no new SIP Line (Std) feature is released with Cisco Unified CM 7.1(3); it is recommended that you view the complete list of existing SIP basic call flows from SIP Line Messaging Guide (Standard) for Release 7.0(1) and SIP Line Messaging Guide (Standard) for Release 7.1(2) from:

The preface covers these topics:
• Audience
• Organization
• Conventions
• Obtaining Documentation, Obtaining Support, and Security Guidelines

Audience

This document provides information for developers, vendors, and customers who are developing applications or products that integrate with Cisco Unified Communications Manager using SIP messaging.

Organization

This document consists of the following two chapters.

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chapter 1, “SIP Standard Line Interface”</td>
<td>Provides an overview of SIP line messages, new and changed information and standard features scenarios including sequence chart and example of call flows added in this release.</td>
</tr>
</tbody>
</table>
Conventions

This document uses the following conventions:

<table>
<thead>
<tr>
<th>Convention</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>boldface font</strong></td>
<td>Commands and keywords are in <strong>boldface</strong>.</td>
</tr>
<tr>
<td><em>italic font</em></td>
<td>Arguments for which you supply values are in <em>italics</em>.</td>
</tr>
<tr>
<td>[ ]</td>
<td>Elements in square brackets are optional.</td>
</tr>
<tr>
<td>{ x</td>
<td>y</td>
</tr>
<tr>
<td>[ x</td>
<td>y</td>
</tr>
<tr>
<td>string</td>
<td>A nonquoted set of characters. Do not use quotation marks around the string or the string will include the quotation marks.</td>
</tr>
<tr>
<td><strong>screen font</strong></td>
<td>Terminal sessions and information the system displays are in <strong>screen font</strong>.</td>
</tr>
<tr>
<td><strong>boldface screen font</strong></td>
<td>Information you must enter is in <strong>boldface screen font</strong>.</td>
</tr>
<tr>
<td><em>italic screen font</em></td>
<td>Arguments for which you supply values are in <em>italic screen font</em>.</td>
</tr>
<tr>
<td>→</td>
<td>This pointer highlights an important line of text in an example.</td>
</tr>
<tr>
<td>^</td>
<td>The symbol ^ represents the key labeled Control—for example, the key combination ^D in a screen display means hold down the Control key while you press the D key.</td>
</tr>
<tr>
<td>&lt; &gt;</td>
<td>Nonprinting characters, such as passwords are in angle brackets.</td>
</tr>
</tbody>
</table>

Notes use the following conventions:

**Note**

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the publication.

**Caution**

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

**Tip**

Means *the following information might help you solve a problem*.

**Timesaver**

Means the *described action saves time*. You can save time by performing the action described in the paragraph.
Obtaining Documentation, Obtaining Support, and Security Guidelines

For information on obtaining documentation, obtaining support, providing documentation feedback, security guidelines, and also recommended aliases and general Cisco documents, see the monthly What's New in Cisco Product Documentation, which also lists all new and revised Cisco technical documentation, at:

SIP Standard Line Interface

This chapter describes the external interface for Cisco Unified CM SIP line-side devices. It highlights SIP primitives that are supported on the line-side interface and describes call flow scenarios that can be used as a guide for technical support and future development.

This guide is applicable to Cisco Unified CM 7.1(3) and covers only those elements that have changed/newly added from the previous version (Cisco Unified CM 7.0).

Note
This chapter describes the new features and callflows added to Unified CM 7.1(3). Since no new SIP Line (Std) feature is released with Cisco Unified CM 7.1(3); it is recommended that you view the complete list of existing SIP basic call flows from *SIP Line Messaging Guide (Standard) for Release 7.0(1)* and *SIP Line Messaging Guide (Standard) for Release 7.1(2)* from:

This chapter includes these sections:

- New and Changed Information, page 1-1

New and Changed Information

This release of Unified CM 7.1(3) does not introduce any new features to the SIP Standard Line Interface.
