

You can make a call, transfer a call, or conference a call to anyone listed in your Chat Selection window using the call control actions. Right-click the name of the person you want to call and select the desired action from the popup menu. To call someone, you must be logged into Agent Desktop and be in an agent state that allows you to make a call.

Using the Integrated Browser

If enabled by your administrator, you can use the integrated browser to view intranet and internet web pages while working within Agent Desktop. The integrated browser can have up to 10 tabs, each displaying a different web page. The first tab is always reserved for web pages that your supervisor pushes to you. This enables your supervisor to assist you during a call by providing information that will help you work with a customer.

If configured by your administrator, you can access another website by selecting it from the Work Sites list or by typing a URL in the Address field. To return to your home page, click Home.

Answering E-Mail

(Premium only) If you are assigned to an e-mail contact service queue (CSQ), you can answer customer e-mail. Click the E-Mail Ready button on the toolbar to receive the next available e-mail in the CSQ. Select the e-mail in the contact appearance window to read the e-mail in the Agent E-Mail tab of your integrated browser. Type your reply in the Response pane and click Send to reply to the e-mail.

You can also transfer the e-mail to another CSQ, re-queue the e-mail so that it can be handled by another agent, save the e-mail as a draft to work on at a later time, or delete the e-mail.

When you receive a call, the current e-mail is automatically saved as a draft.

Your administrator configures how many e-mails you can have in your contact appearance pane at one time. The maximum allowed is 4 saved as drafts and 1 in process, for a total of 5 e-mails.

— Call Activity	Ctrl+Shift+E	Selects a row in the Call Activity pane of Contact Management.

Agent E-Mail Buttons (Premium only)

 E-Mail Ready	Ctrl+e	You are available to receive e-mails.
 E-Mail Not Ready	Ctrl+E	You are not available to receive e-mails.
 Send	—	Sends your e-mail reply to the customer.
 Transfer	—	Displays a drop-down list of available contact service queues to which you can transfer the e-mail.
 Save	—	Saves the current e-mail as a draft.
 Re-queue	—	Returns the current e-mail to the contact service queue.
 Delete	—	Deletes the current e-mail.

2 Common Tasks

Changing Your Agent State

To change your agent state, click the appropriate state button on your toolbar. Buttons for invalid states will be disabled. If you change your agent state while on a call (in the Talking state), your state will change after you hang up. The agent state buttons indicate the state you clicked, not your current state.

Using Reason Codes

When you change your state to Not Ready or log out, you might be prompted to select a reason code. Reason codes are configured by your administrator, and describe the reason you are changing your agent state.

When you are prompted to enter a reason code, select the appropriate code from the Reason Codes window and click OK.

Using Wrap-up Data Descriptions

When you change your state to Work, you might be prompted to select a wrap-up data description. Wrap-up data descriptions are configured by your administrator, and describe the outcome of the call.

When you are prompted to enter wrap-up data, select the appropriate description from the Select Call Wrap-up window and click OK.

Handling Phone Calls

Making a Call. Click Make Call. In the Make Call window, enter a phone number in the Number field, and click Dial.

Transferring a Call. With a call active, click Transfer. In the Transfer a Call window, enter a phone number in the Name: Number field, then click Dial. For a blind transfer, click Transfer when the phone starts ringing. For a supervised transfer, wait for the phone to be answered and then click Transfer.

Conferencing a Call. With a call active, click Conference. In the Conference a Call window, enter a phone number in the Name: Number field, then click Dial. For a blind conference, click Add to Conf when the phone starts ringing. For a supervised conference, wait for the phone to be answered and then click Add to Conf. Repeat until all parties are added to the conference call.

Sending a Chat Message

On the toolbar, click Chat. In the Chat Selection window, double-click the name of the person with whom you want to chat. In the chat window that opens, type your message in the lower section of the window. If you want your message to pop on the recipient's screen, select the High Priority check box.
