

Offer Description – Product

Cisco Secure Cloud Insights

This Offer Description is part of the [General Terms](#) or similar terms existing between You and Cisco (e.g., the End User License Agreement) (the “**Agreement**”). Capitalized terms, unless defined in this document, have the meaning in the Agreement. Any references to the Supplemental End User License Agreement or SEULA mean Offer Description.

1. Summary

Cisco Secure Cloud Insights (the “**Product**”) is a cloud-native platform brought to market in collaboration with JupiterOne®. It provides deep insights into an enterprise’s universe of ephemeral and evolving cyber assets. The Product monitors multi-cloud deployments, both public and private cloud, as well as hybrid environments with a mix of on-premises infrastructure. The Product is API-driven and relies on agentless integrations to ingest data needed to map configuration and interactions between entities in an organization’s digital environment. This rich and connected dataset can be investigated using 550 odd pre-built queries and can be presented in an easy-to-consume visual graph. Users can also easily create their own queries in J1QL, JupiterOne’s proprietary query language. These queries can then be turned into security alerts, augment existing compliance benchmarks such as SOC 2, or be grouped to author custom standards.

The Product capabilities address Your organization’s Cloud Security Posture Management (CSPM) needs. With the Product, organizations can limit exposure resulting from an ever-increasing attack landscape by identifying security and compliance gaps, automating workflows, and maintaining continuous monitoring of Your organization’s security posture. Knowledge of relationships and interactions also fast-tracks investigations and aids threat containment and response. Finally, outbound integrations allow alerts to be routed to ticketing systems, email aliases, and messaging applications or publication/queuing services. Alerts can also be shared with other services via custom APIs, including other Cisco offers such as Secure Cloud Analytics and SecureX. The Product is a CSPM tool and much more.

2. Support and Other Services

2.1 **Support.** Your purchase of the Product includes Basic [Cisco Software Support Services](#).

2.2 **Cisco SecureX.** Your Secure Cloud Insights subscription includes access to Cisco SecureX, Cisco’s integrated security platform that aggregates threat intelligence (through SecureX incident manager response or Cisco Threat Response), unifies visibility across various Cisco and third-party security products, enables automated workflows, and more. For more information on SecureX, please see the [SecureX Offer Description](#).

3. Data Protection

Privacy Data Sheet. The Cisco Secure Cloud Insights and Cisco SecureX Privacy Data Sheets (available at [Cisco's Trust Portal](#)) describe the Personal Data that Cisco collects and processes as part of the delivery of the Cloud Services.

4. Special Terms

Disclaimer. Cisco does not represent or warrant that the cloud services will guarantee absolute security due to the continual development of new techniques for intruding upon and attacking files, networks, and endpoints. Cisco does not represent or warrant that the cloud services will protect all your files, network, or endpoints from all malware, viruses or third-party malicious attacks. Cisco does not make any representations or warranties regarding any third-party system or service to which a cloud service integrates or to any ongoing integration support. Integrations made accessible to you that are not a generally available product included on your order are provided on an “as is” basis.
