

Don't Risk IT

See Jack?
Oh no. Jack is frustrated.

He wants to know something: **Why can't the people at his agency meet and collaborate on the web with anybody, anywhere, at a moment's notice, without worrying about security?**

Jack wants to reduce travel.

He wants to save money.

He wants his people to work as efficiently as possible.

Jack's agency doesn't have FedRAMPSM-compliant collaboration services.

Non-compliant
Web Meeting Tools

We can't communicate efficiently and securely.

Huh? Did someone say something?

Uh oh. Jack is tempted. He is thinking about using non-compliant web meeting tools to share data and record meetings.

Nooooooooo, Jack! Don't do it! Don't Risk IT!

This is Zach.
Look at Zach smile!

His agency uses Cisco FedRAMP-compliant services, including Cisco WebEx Web Conferencing.

This means his data is stored only in U.S. data centers – and is constantly monitored and audited for security and safety.

Cisco
FedRAMP-Compliant Services

FedRAMP

With Cisco FedRAMP-compliant services, Zach's people meet easily, work faster, travel less and don't have to sweat their data's security.

They're smiling too. Everybody is smiling.

Well, almost everybody. Poor Jack.

Be like Zach.
Don't Risk IT.
