## The Cisco ASAP Data Centre

A Cisco **ASAP** Data Centre enables IT to resolve key challenges using consistent policy across a hybrid cloud built with industry-leading networking, security, converged infrastructure and software-defined solutions.

**A**nalyse

Cisco Tetration Analytics lets you monitor and analyse every flow and event across your network—up to thousands of times more insight than before.

**S**implify

Simplify and accelerate infrastructure deployments with Cisco's best-of-breed, integrated and hyperconverged systems to achieve cloud agility.

**A**utomate

Automate IT tasks with Cisco Application Centric Infrastructure (ACI) and Cisco CloudCenter to accelerate application deployments and management with a consistent policy across hybrid IT.

**P**rotect

Cisco's comprehensive, end-to-end security capabilities are designed to protect applications, data, resources and users against threats, while automating enforcement of security policies across the infrastructure.

## Five Things You Can Do Now

**1** Optimise Infrastructure

- Nexus
- UCS
- HyperFlex
- Converged

Performance  
Scale  
Security

**2** Simplify Operations

Automation  
Policy Orchestration  
Choice

**3** Cloud-Native App Stack

Containers  
Self-Service  
DevOps Tools

**4** Choose Your Hybrid Cloud

App Benchmark  
Extend Policy  
Securely Move Data and Workloads

**5** Real-Time Analytics

Monitor All Flows  
App Dependency  
On-Premises and Cloud

## Cisco ASAP Data Centre

Maximise Performance

Accelerate Agility

Mitigate Risk
