

# Cloud Innovation Speeds Manufacturing

200%  
increase in service  
restoration times

Setup time  
accelerated by  
150%

Applications  
perform 50%  
faster

20% reduction  
in infrastructure  
costs

15% time  
saving for IT

Success at Grupo Ibersnacks is directly linked to its data centers. Financial, manufacturing production, security, logistics, and quality processes depend on zero application downtime—all day, every day.

## Challenge

The company wanted to transform operations across its three Spanish manufacturing plants. It chose an efficient and scalable Cisco cloud-based platform.

## Solution

VersaStack validated design built on:

- Cisco UCS® servers with Intel® Xeon® processors, IBM Storwize V7000 storage, and VMware vSphere hypervisor for improved operations and user experience
- Cisco Nexus® 9000 Series Switches running in Cisco® NX-OS mode

## Outcome

Now, the IT team:

- Responds faster to the needs of the business
- Makes better use of resources
- Saves time on design and implementation
- Manages a smaller data center footprint
- Can easily add cloud, big data, and analytics solutions

These advantages allowed Ibersnacks to optimize manufacturing by improving, for example:

- SAP and Siemens system performance
- Video surveillance
- Food quality and hygiene inspections

**VersaStack lowered our capital expense and we expect to reduce operating costs with savings on IT management, cooling, power, and space.”**

**Félix Eguía Domínguez**
