Excellence Award Best Security Company • Winner Cisco

Cisco enjoys a leadership position in terms of the strength of its customer base. The company's threat-centric approach reduces complexity, provides visibility and control and advanced threat protection across the attack continuum – before, during and after an attack. Cisco is the only security company to offer leading security products for each phase of the attack continuum. Many of Cisco's security products are individual leaders in their respective categories.

Cisco's focus on threat-centric security solutions has enabled security to be consistently one of the top growing segments of its portfolio. According to IDC, Cisco is the overall security appliance market leader and Cisco's focus on threat-centric security has delivered strong, continued growth.

More broadly, more than 87 percent of Fortune 500 companies and over 100,000 companies worldwide are Cisco customers. Cisco is

a market leader in software as a service (SaaS), collaboration, unified workspace, security, video, telepresence and more. Cisco delivers the industry's most comprehensive portfolio of solutions and services for advanced threat protection.

Cisco demonstrates its commitment to providing threat-centric security through continued, significant investment in the development and advancement of its security products, solutions, and services. Cisco has invested billions in security. In the past two years, Cisco has closed the acquisitions of Sourcefire, ThreatGRID, Neohapsis, Lancope and OpenDNS.

For 30 years, Cisco has been focused on helping to change the way the world works, lives, plays and learns. The company solves customers' most important business challenges by delivering intelligent networks and technology architectures built on integrated products, services, and software platforms.
