

# Benefits of Upgrading to Cisco Catalyst 9300 Series Switches

## Why upgrade to the Cisco® Catalyst® 9300 Series switches? Because they are simple, secure, and ultrapractical.

Digital disruption is changing how we think about our networks. Whether for customers or employees, the “experience” has become a strategic imperative. The Cisco Catalyst 9300 Series fixed access switches are designed to help you change your network from a platform of connectivity to a platform of services.

The first purpose-built platforms designed for full fabric control with Cisco DNA and Software-Defined Access (SD-Access), these switches deliver stellar performance and functionality and extend Cisco’s networking leadership with significant innovations in security, mobility, the Internet of Things (IoT), and cloud.

## Finance your switching migration with Cisco Capital

Let financing from Cisco Capital® make migrating your switches and accelerating your digital transformation even easier. Cisco Capital Easy Pay makes this transition as easy as possible, with no upfront costs and predictable monthly payments. You pay 90 percent of the total over a three-year period that is completely interest free. At the end of the term, you have the option to return and refresh the equipment, extend your lease, or purchase the solution at 10 percent of the original cost. Take advantage of this market-leading interest rate and use your budget for other investments.

## Improve your results with our services

With Cisco Services, you can achieve infrastructure excellence faster with less risk. Our services for Cisco Catalyst 9000 provide expert guidance to help you successfully plan, deploy, manage and support your new switches. With unmatched networking expertise, best practices and innovative tools, Cisco Services can help you reduce overall upgrade, refresh, and migration costs as you introduce new hardware, software and protocols into the network. With a comprehensive lifecycle of services, Cisco experts will help you minimize disruption and improve operational efficiency to extract maximum value from your Cisco DNA-ready infrastructure.

## More reasons to upgrade

- Reduce cost and complexity with Cisco SD-Access by automating policy, enabling fast service creation, and providing complete visibility into the wired and wireless access networks
- Create better customer and employee experiences through higher performance and improved support for mobility and new apps
- Gain advanced end-to-end security to handle threats before, during, and after attacks

The Cisco Catalyst 9000 switching platform is also the first in the line to offer the Cisco IOS XE and Cisco ONE™ subscription-based software licenses, allowing customers to purchase the features and capabilities they need. Table 1 lists the benefits you could be receiving now by migrating to the Cisco Catalyst 9300 Series from older switches.
