Introduction

This document describes how to disable disclaimers when an Email Security Appliance (ESA) stamps outbound email with a disclaimer, even if the email already has one.

How do I stop duplicate disclaimer stamping?

Create a text resource via the Web GUI:

1. Log into the Web GUI.
2. **Mail Policies > Text Resources > Add Text Resource**, name the resource: disclaimer_1.
3. Select Type: **Disclaimer**.
4. Paste your Disclaimer in the text box.
5. **Submit** and **Commit**.

Create a message filter to stamp outbound mail and ignored previously stamped mail:

1. Log into the CLI of your appliance.
2. Issue the **filters** command.
3. Select **New** from the menu.
4. Paste the filter below (please ensure you replace the SNIPPET portion with a short sentence from your disclaimer).

```
no_duplicate_disclaimer:
if (sendergroup == "RELAYLIST")
{
if not (body-contains("SNIPPET FROM DISCLAIMER", 1))
{
add-footer("disclaimer_1");
}
}
```

5. Press the enter key and return to the main CLI prompt.
6. Issue the **commit** command.

Additional Message Filter Examples

```
no_duplicate_disclaimer:
if (sendergroup == "RELAYLIST")
{
  if ( mail-from == '@domain_1\\.com$' ) {
    if not (body-contains("UNIQUE SNIPPET FROM DISCLAIMER_1", 1))
    {
      add-footer("disclaimer_1");
    }
  }
  if ( mail-from == '@domain_2\\.com$' ) {
    if not (body-contains("UNIQUE SNIPPET FROM DISCLAIMER_2", 1)) {
      add-footer("disclaimer_2");
    }
  }
  if ( mail-from == '@domain_3\\.com$' ) {
    if not (body-contains("UNIQUE SNIPPET FROM DISCLAIMER_3", 1)) {
      add-footer("disclaimer_3");
    }
  }
}
```
