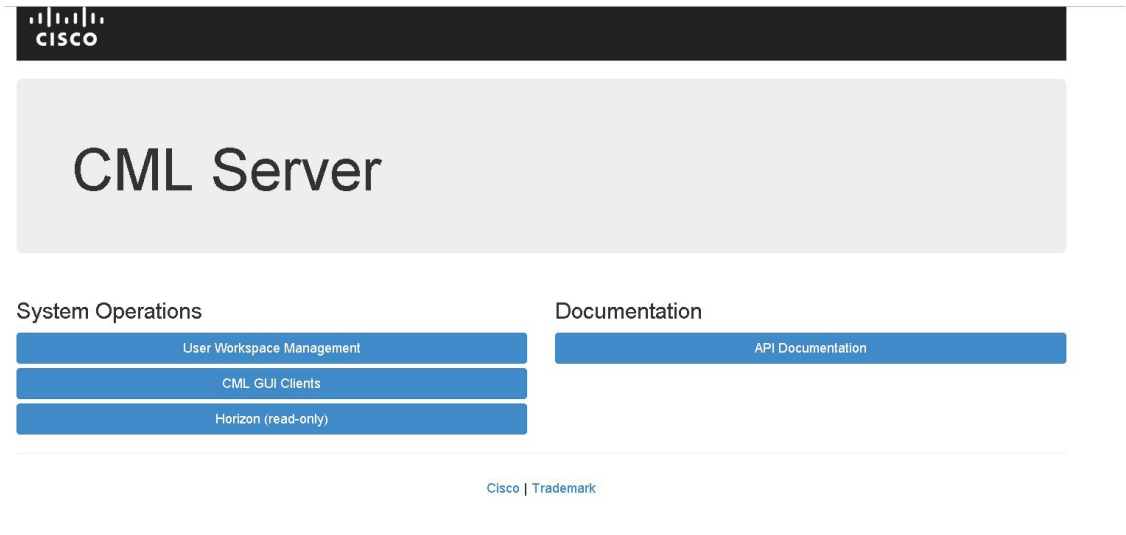
# Cisco Modeling Labs APIs

Cisco Modeling Labs utilizes numerous technologies for authoring, running, and managing virtual topologies of networked routers and servers.

### Accessing the API Documentation

API documentation is accessed by opening a web browser and entering the IP address or hostname of the Cisco Modeling Labs server. The following page is displayed:

***Figure 1: Accessing the API Documentation***



1 Click **API Documentation** to launch the CML API documentation.

2 Click **README** to access the documentation for a specific API.
