

New and Changed Information

- [Change Summary, on page 1](#)

Change Summary

The following table summarizes the new and changed information in this document, and provides information about the releases in which each feature is supported.

Note that your software release might not support all the features described in this document. For the latest caveats and feature information, see the Bug Search Tool at <https://tools.cisco.com/bugsearch/>, and the release notes document pertaining to your software release.

Table 1: New and Changed Features

| Feature Name | Description | Release | Where Documented |
|-----------------------------|--|---------|---|
| LLDP on management(0) port. | Support for LLDP reception and advertisement on the active management interface has been added for all platforms, excluding MDS 9250i, MDS 9148S, and MDS 9396S. | 9.4(1) | Configuring LLDP |
| Secure Erase | The Secure Erase feature allows erasure of all customer information from Cisco MDS switches. | 9.2(2) | Basic Device Management |

| Feature Name | Description | Release | Where Documented |
|---------------------|---|---------|--------------------------|
| Consistency Checker | Added support to display the access control list (ACL), forwarding information base (FIB), and persistent storage service (PSS) consistency information, using the show consistency-checker command. | 8.4(1) | Overview |
