# show callhome

```
show callhome [ __readonly__ <output_state> <info> <per_name> [ <name> ] <email_info> [ <email_conf>
] <ph_info> [ <ph_conf> ] <str_addr> [ <str_conf> ] <site_id> [ <site_id_conf> ] <cust_id> [ <cus_id_conf>
] <contr_id> [ <contr_id_conf> ] <swi_pri> [ <swi_pri_value> ] <dup_mess> <per_inv> <per_time>
<per_timeofday> <dist> ]
```

## Syntax Description

|                      |                                 |
|----------------------|---------------------------------|
| show                 | Show running system information |
| callhome             | Show callhome information       |
| <i>__readonly__</i>  | (Optional)                      |
| <i>output_state</i>  | (Optional)                      |
| <i>info</i>          | (Optional)                      |
| <i>per_name</i>      | (Optional)                      |
| <i>name</i>          | (Optional)                      |
| <i>email_info</i>    | (Optional)                      |
| <i>email_conf</i>    | (Optional)                      |
| <i>ph_info</i>       | (Optional)                      |
| <i>ph_conf</i>       | (Optional)                      |
| <i>str_addr</i>      | (Optional)                      |
| <i>str_conf</i>      | (Optional)                      |
| <i>site_id</i>       | (Optional)                      |
| <i>site_id_conf</i>  | (Optional)                      |
| <i>cust_id</i>       | (Optional)                      |
| <i>cus_id_conf</i>   | (Optional)                      |
| <i>contr_id</i>      | (Optional)                      |
| <i>contr_id_conf</i> | (Optional)                      |
| <i>swi_pri</i>       | (Optional)                      |
| <i>swi_pri_value</i> | (Optional)                      |
| <i>dup_mess</i>      | (Optional)                      |
| <i>per_inv</i>       | (Optional)                      |

|                      |            |
|----------------------|------------|
| <i>per_time</i>      | (Optional) |
| <i>per_timeofday</i> | (Optional) |
| <i>dist</i>          | (Optional) |

**Command Mode**

- /exec

## show callhome destination-profile

```
show callhome destination-profile [ __readonly__ { TABLE_call_info [ <dest_full_info> ] [ <dest_short_info> ] [ <dest_xml_info> ] [ <dest_def_info> ] <max_mess_size> <mess_format> <mess_level> <trans_method> <email_info> [ <index> <email_conf> ] <url_info> [ <index> <url_conf> ] <alert_groups> [ <alert_conf> ] } ]
```

### Syntax Description

|                        |   |
|------------------------|---|
| show                   | Show running system information               |
| callhome               | Show callhome information                     |
| destination-profile    | Show callhome destination profile information |
| <i>__readonly__</i>    | (Optional)                                    |
| <i>TABLE_call_info</i> | (Optional)                                    |
| <i>dest_full_info</i>  | (Optional)                                    |
| <i>dest_short_info</i> | (Optional)                                    |
| <i>dest_xml_info</i>   | (Optional)                                    |
| <i>dest_def_info</i>   | (Optional)                                    |
| <i>max_mess_size</i>   | (Optional)                                    |
| <i>mess_format</i>     | (Optional)                                    |
| <i>mess_level</i>      | (Optional)                                    |
| <i>trans_method</i>    | (Optional)                                    |
| <i>index</i>           | (Optional)                                    |
| <i>email_info</i>      | (Optional)                                    |
| <i>email_conf</i>      | (Optional)                                    |
| <i>url_info</i>        | (Optional)                                    |
| <i>url_conf</i>        | (Optional)                                    |
| <i>alert_groups</i>    | (Optional)                                    |
| <i>alert_conf</i>      | (Optional)                                    |

### Command Mode

- /exec

# show callhome destination-profile profile

```
show callhome destination-profile profile <s0> [ __readonly__ <user_txt_info> <max_mess_size>
<mess_format> <mess_level> <trans_method> <email_info> [ TABLE_email [ <index> <email_conf> ] ]
<url_info> [ TABLE_url [ <index> <url_conf> ] ] <alert_groups> [ TABLE_alert [ <alert_conf> ] ] ]
```

## Syntax Description

|                      |   |
|----------------------|---|
| show                 | Show running system information                       |
| callhome             | Show callhome information                             |
| destination-profile  | Show callhome destination profile information         |
| profile              | Specify the destination profile                       |
| <i>s0</i>            | Show information for user defined destination profile |
| <i>__readonly__</i>  | (Optional)  |
| <i>user_txt_info</i> | (Optional)  |
| <i>max_mess_size</i> | (Optional)  |
| <i>mess_format</i>   | (Optional)  |
| <i>mess_level</i>    | (Optional)  |
| <i>trans_method</i>  | (Optional)  |
| <i>email_info</i>    | (Optional)  |
| <i>index</i>         | (Optional)  |
| TABLE_email          | (Optional)  |
| <i>email_conf</i>    | (Optional)  |
| <i>url_info</i>      | (Optional)  |
| TABLE_url            | (Optional)  |
| <i>url_conf</i>      | (Optional)  |
| <i>alert_groups</i>  | (Optional)  |
| TABLE_alert          | (Optional)  |
| <i>alert_conf</i>    | (Optional)  |

## Command Mode

- /exec

# show callhome destination-profile profile CiscoTAC-1

```
show callhome destination-profile profile CiscoTAC-1 [ __readonly__ <tac_xml_info> <max_mess_size>
<mess_level> <trans_method> <email_info> [ <index> <email_conf> ] <url_info> [ <index> <url_conf> ]
<alert_groups> [ <alert_conf> ] ]
```

## Syntax Description

|                      |   |
|----------------------|---|
| show                 | Show running system information                     |
| callhome             | Show callhome information                           |
| destination-profile  | Show callhome destination profile information       |
| profile              | Specify the destination profile                     |
| CiscoTAC-1           | Show information for CiscoTAC-1 destination profile |
| <i>__readonly__</i>  | (Optional)  |
| <i>tac_xml_info</i>  | (Optional)  |
| <i>max_mess_size</i> | (Optional)  |
| <i>mess_level</i>    | (Optional)  |
| <i>trans_method</i>  | (Optional)  |
| <i>email_info</i>    | (Optional)  |
| <i>index</i>         | (Optional)  |
| <i>email_conf</i>    | (Optional)  |
| <i>url_info</i>      | (Optional)  |
| <i>url_conf</i>      | (Optional)  |
| <i>alert_groups</i>  | (Optional)  |
| <i>alert_conf</i>    | (Optional)  |

## Command Mode

- /exec

## show callhome destination-profile profile full-txt-destination

```
show callhome destination-profile profile full-txt-destination [ __readonly__ <full_txt_info> <max_mess_size>
<mess_level> <trans_method> <email_info> [ <index> <email_conf> ] <url_info> [ <index> <url_conf> ]
<alert_groups> [ <alert_conf> ] ]
```

### Syntax Description

|                      |   |
|----------------------|---|
| show                 | Show running system information                               |
| callhome             | Show callhome information                                     |
| destination-profile  | Show callhome destination profile information                 |
| profile              | Specify the destination profile                               |
| full-txt-destination | Show information for full-txt-destination destination profile |
| <i>__readonly__</i>  | (Optional)  |
| <i>full_txt_info</i> | (Optional)  |
| <i>max_mess_size</i> | (Optional)  |
| <i>mess_level</i>    | (Optional)  |
| <i>trans_method</i>  | (Optional)  |
| <i>email_info</i>    | (Optional)  |
| <i>index</i>         | (Optional)  |
| <i>email_conf</i>    | (Optional)  |
| <i>url_info</i>      | (Optional)  |
| <i>url_conf</i>      | (Optional)  |
| <i>alert_groups</i>  | (Optional)  |
| <i>alert_conf</i>    | (Optional)  |

### Command Mode

- /exec

# show callhome destination-profile profile short-txt-destination

```
show callhome destination-profile profile short-txt-destination [ __readonly__ <shrt_txt_info>
<max_mess_size> <mess_level> <trans_method> <email_info> [ <index> <email_conf> ] <url_info> [
<index> <url_conf> ] <alert_groups> [ <alert_conf> ] ]
```

## Syntax Description

|                       |  |
|-----------------------|--|
| show                  | Show running system information                                |
| callhome              | Show callhome information                                      |
| destination-profile   | Show callhome destination profile information                  |
| profile               | Specify the destination profile                                |
| short-txt-destination | Show information for short-txt-destination destination profile |
| <i>__readonly__</i>   | (Optional)   |
| <i>shrt_txt_info</i>  | (Optional)   |
| <i>max_mess_size</i>  | (Optional)   |
| <i>mess_level</i>     | (Optional)   |
| <i>trans_method</i>   | (Optional)   |
| <i>email_info</i>     | (Optional)   |
| <i>index</i>          | (Optional)   |
| <i>email_conf</i>     | (Optional)   |
| <i>url_info</i>       | (Optional)   |
| <i>url_conf</i>       | (Optional)   |
| <i>alert_groups</i>   | (Optional)   |
| <i>alert_conf</i>     | (Optional)   |

## Command Mode

- /exec

# show callhome transport-email

```
show callhome transport-email [ __readonly__ { <from_email> } [ <reply_to_email> ] [ <return_receipt_addr>
] { <smtp_server> } [ <smtp_server_port> ] ]
```

## Syntax Description

|                                  |   |
|----------------------------------|---|
| <code>__readonly__</code>        | (Optional)                                  |
| <code>show</code>                | Show running system information             |
| <code>callhome</code>            | Show callhome information                   |
| <code>transport-email</code>     | Show callhome email transport configuration |
| <code>from_email</code>          | (Optional)                                  |
| <code>reply_to_email</code>      | (Optional)                                  |
| <code>return_receipt_addr</code> | (Optional)                                  |
| <code>smtp_server</code>         | (Optional)                                  |
| <code>smtp_server_port</code>    | (Optional)                                  |

## Command Mode

- /exec

## show callhome transport

```
show callhome transport [ __readonly__ <vrf> <from_email> [ <rep_email> ] [ <ret_email> ] [ <smtp_ser>
] [ <smtp_ser_port> ] [ <smtp_ser_vrf> ] [ <smtp_ser_prior> ] [ <smtp_ser_do> ] [ <smtp_ser_port_do> ] [
<smtp_ser_vrf_do> ] [ <smtp_ser_prior_do> ] [ <smtp_ser_got> ] [ <smtp_ser_port_got> ] [
<smtp_ser_vrf_got> ] [ <smtp_ser_prior_got> ] <http_prox> <http_port> <http_state> ]
```

### Syntax Description

|                           |  |
|---------------------------|--|
| show                      | Show running system information                        |
| callhome                  | Show callhome information                              |
| transport                 | Show callhome transport configuration (email and http) |
| <i>__readonly__</i>       | (Optional)   |
| <i>vrf</i>                | (Optional)   |
| <i>from_email</i>         | (Optional)   |
| <i>rep_email</i>          | (Optional)   |
| <i>ret_email</i>          | (Optional)   |
| <i>smtp_ser</i>           | (Optional)   |
| <i>smtp_ser_port</i>      | (Optional)   |
| <i>smtp_ser_vrf</i>       | (Optional)   |
| <i>smtp_ser_prior</i>     | (Optional)   |
| <i>smtp_ser_do</i>        | (Optional)   |
| <i>smtp_ser_port_do</i>   | (Optional)   |

**Command Mode**

- /exec

## show callhome user-def-cmds

```
show callhome user-def-cmds [ __readonly__ { <user_configured_cmds> } [ { TABLE_user_def_cmds
<alert_group> <index> <user_defined_cmds> } ] ]
```

### Syntax Description

|                             |   |
|-----------------------------|---|
| show                        | Show running system information                       |
| callhome                    | Show callhome information                             |
| user-def-cmds               | Show the cli commands configured for each alert group |
| <i>__readonly__</i>         | (Optional)  |
| <i>user_configured_cmds</i> | (Optional) List of user configured commands           |
| TABLE_user_def_cmds         | (Optional)  |
| <i>index</i>                | (Optional)  |
| <i>alert_group</i>          | (Optional)  |
| <i>user_defined_cmds</i>    | (Optional)  |

### Command Mode

- /exec

# show cdp

```
show cdp { entry { all | name <s0> } } [ __readonly__ TABLE_cdp_entry_all <device_id> [ <sysname> ]
<numaddr> [ { <v4addr> | <v6addr> } + ] <platform_id> <capability> + <intf_id> <port_id> <ttl> <version>
<version_no> [ <nativevlan> ] [ <vtpname> ] [ <duplexmode> ] [ <syslocation> ] [ <num_mgmtaddr> [ {
<v4mgmtaddr> | <v6mgmtaddr> } + ] ] ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information           |
| cdp                 | Show Cisco Discovery Protocol information |
| entry               | Show CDP entries in database              |
| all                 | Show all CDP entries in database          |
| name                | Show a specific CDP entry matching a name |
| s0                  |   |
| __readonly__        | (Optional) Read only                      |
| TABLE_cdp_entry_all | (Optional) output of show cdp entry all   |
| device_id           | (Optional) Device Identifier              |
| sysname             | (Optional) System Name                    |
| numaddr             | (Optional) No of IP Address configured    |
| v4addr              | (Optional) Interface IP V4 Address        |
| v6addr              | (Optional) Interface IP V6 Address        |
| platform_id         | (Optional) Platform Id                    |
| capability          | (Optional) Capability                     |
| intf_id             | (Optional) Interface Id                   |
| port_id             | (Optional) Port Identifier                |
| ttl                 | (Optional) Hold Time                      |
| version             | (Optional) Software Version               |
| version_no          | (Optional) CDP version number             |
| nativevlan          | (Optional) NativeVLAN                     |
| vtpname             | (Optional) Vtp Management Domain Name     |
| duplexmode          | (Optional) Duplex Mode                    |

|                     |  |
|---------------------|--|
| <i>syslocation</i>  | (Optional) System Location               |
| <i>num_mgmtaddr</i> | (Optional) No of Mgmt Address configured |
| <i>v4mgmtaddr</i>   | (Optional) IP V4 Mgmt Address            |
| <i>v6mgmtaddr</i>   | (Optional) IP V6 Mgmt Address            |

**Command Mode**

- /exec

# show cdp all

```
show cdp { all | interface <if0> } [ __readonly__ TABLE_cdp_all <intf_id> <port_up> [ <cdp_global_enabled>
] <cdp_intf_enabled> [ <oper_mode> ] <refresh_time> <ttl> ]
```

## Syntax Description

|                           |   |
|---------------------------|---|
| show                      | Show running system information           |
| cdp                       | Show Cisco Discovery Protocol information |
| all                       | Show all interfaces in CDP database       |
| interface                 | Show CDP parameters for an interface      |
| <i>if0</i>                |   |
| <i>__readonly__</i>       | (Optional) Read only                      |
| <i>TABLE_cdp_all</i>      | (Optional) output of show cdp all         |
| <i>intf_id</i>            | (Optional) Interface Id                   |
| <i>port_up</i>            | (Optional) Port status                    |
| <i>cdp_global_enabled</i> | (Optional) CDP global status              |
| <i>cdp_intf_enabled</i>   | (Optional) CDP interface status           |
| <i>oper_mode</i>          | (Optional) CDP operation mode             |
| <i>refresh_time</i>       | (Optional) Refresh Time                   |
| <i>ttl</i>                | (Optional) Hold Time                      |

## Command Mode

- /exec

# show cdp global

```
show cdp global [ __readonly__ <cdp_global_enabled> <refresh_time> <ttl> <v2_advertisement>
<deviceid_format> ]
```

## Syntax Description

|                           |   |
|---------------------------|---|
| show                      | Show running system information           |
| cdp                       | Show Cisco Discovery Protocol information |
| global                    | Show CDP global parameters                |
| <i>__readonly__</i>       | (Optional) Read only                      |
| <i>cdp_global_enabled</i> | (Optional) CDP global status              |
| <i>refresh_time</i>       | (Optional) Refresh Time                   |
| <i>ttl</i>                | (Optional) Hold Time                      |
| <i>v2_advertisement</i>   | (Optional) Show v2 advertisement          |
| <i>deviceid_format</i>    | (Optional) Show deviceId Format           |

## Command Mode

- /exec

# show cdp neighbors

```
show cdp neighbors [ interface <if> ] [ __readonly__ { TABLE_cdp_neighbor_brief_info <ifindex>
<device_id> <intf_id> <ttl> <capability> + <platform_id> <port_id> } { <neigh_count> } ]
```

## Syntax Description

|                               |   |
|-------------------------------|---|
| show                          | Show running system information                   |
| cdp                           | Show Cisco Discovery Protocol information         |
| neighbors                     | Show CDP neighbors                                |
| interface                     | (Optional) Show CDP neighbors on an interface     |
| <i>if</i>                     | (Optional) Specify Interface                      |
| <i>__readonly__</i>           | (Optional) Read only                              |
| TABLE_cdp_neighbor_brief_info | (Optional) output of show cdp neighbor - in brief |
| <i>ifindex</i>                | (Optional) Interface index                        |
| <i>device_id</i>              | (Optional) System Name (or) Device Identifier     |
| <i>intf_id</i>                | (Optional) Interface Id                           |
| <i>port_id</i>                | (Optional) Port Identifier                        |
| <i>platform_id</i>            | (Optional) Platform Id                            |
| <i>ttl</i>                    | (Optional) Hold Time                              |
| <i>capability</i>             | (Optional) Capability                             |
| <i>neigh_count</i>            | (Optional) Neighbor Count                         |

## Command Mode

- /exec

## show cdp neighbors detail

```
show cdp neighbors [ interface <if> ] detail [ __readonly__ TABLE_cdp_neighbor_detail_info <ifindex>
<device_id> [ <sysname> ] [ <vtpname> ] <numaddr> [ { <v4addr> | <v6addr> } + ] <platform_id>
<capability> + <intf_id> <port_id> <ttl> <version> <version_no> [ <nativevlan> ] [ <duplexmode> ] [ <mtu>
] [ <syslocation> ] [ <num_mgmtaddr> [ { <v4mgmtaddr> | <v6mgmtaddr> } + ] ] <local_intf_mac>
<remote_intf_mac> ]
```

### Syntax Description

|                                |   |
|--------------------------------|---|
| show                           | Show running system information               |
| cdp                            | Show Cisco Discovery Protocol information     |
| neighbors                      | Show CDP neighbors                            |
| detail                         | Show CDP neighbors detailed                   |
| interface                      | (Optional) Show CDP neighbors on an interface |
| <i>if</i>                      | (Optional) Specify Interface                  |
| <i>__readonly__</i>            | (Optional) Read only                          |
| TABLE_cdp_neighbor_detail_info | (Optional) output of show cdp neighbor detail |
| <i>ifindex</i>                 | (Optional) Interface index                    |
| <i>device_id</i>               | (Optional) Device Identifier                  |
| <i>sysname</i>                 | (Optional) System Name                        |
| <i>vtpname</i>                 | (Optional) Vtp Management Domain Name         |
| <i>numaddr</i>                 | (Optional) No of IP Address configured        |
| <i>v4addr</i>                  | (Optional) Interface IP V4 Address            |
| <i>v6addr</i>                  | (Optional) Interface IP V6 Address            |

| <i>version_no</i>              | (Optional) CDP version number                 |
| <i>nativevlan</i>              | (Optional) NativeVLAN                         |

|                        |  |
|------------------------|--|
| <i>duplexmode</i>      | (Optional) Duplex Mode                   |
| <i>mtu</i>             | (Optional) MTU                           |
| <i>syslocation</i>     | (Optional) System Location               |
| <i>num_mgmtaddr</i>    | (Optional) No of Mgmt Address configured |
| <i>v4mgmtaddr</i>      | (Optional) IP V4 Mgmt Address            |
| <i>v6mgmtaddr</i>      | (Optional) IP V6 Mgmt Address            |
| <i>local_intf_mac</i>  | (Optional) Local interface MAC           |
| <i>remote_intf_mac</i> | (Optional) Remote interface MAC          |

**Command Mode**

- /exec

## show cdp traffic interface2

```
show cdp traffic interface2 <if2> [ __readonly__ <intf_id> <total_input_packets> <valid_cdp_packets>
<input_v1_packets> <input_v2_packets> <invalid_cdp_packets> <unsupported_version> <checksum_errors>
<malformed_packets> <total_output_packets> <output_v1_packets> <output_v2_packets> <send_errors>
<flap_cnt> ]
```

### Syntax Description

|                             |   |
|-----------------------------|---|
| show                        | Show running system information               |
| cdp                         | Show Cisco Discovery Protocol information     |
| traffic                     | Show CDP traffic statistics                   |
| interface2                  | Show CDP traffic statistics on an interface   |
| <i>if2</i>                  |   |
| <i>__readonly__</i>         | (Optional) Read only                          |
| <i>intf_id</i>              | (Optional) Interface Id                       |
| <i>total_input_packets</i>  | (Optional) Total input cdp packets            |
| <i>valid_cdp_packets</i>    | (Optional) Total valid cdp packets            |
| <i>input_v1_packets</i>     | (Optional) Input vesrion1 packets             |
| <i>input_v2_packets</i>     | (Optional) Input vesrion2 packets             |
| <i>invalid_cdp_packets</i>  | (Optional) Invalid cdp packets                |
| <i>unsupported_version</i>  | (Optional) Packets having unsupported version |
| <i>checksum_errors</i>      | (Optional) Packets having checksum errors     |
| <i>malformed_packets</i>    | (Optional) Total malformed packets            |
| <i>total_output_packets</i> | (Optional) Total output packets               |
| <i>output_v1_packets</i>    | (Optional) Output vesrion1 packets            |
| <i>output_v2_packets</i>    | (Optional) Output vesrion2 packets            |
| <i>send_errors</i>          | (Optional) Number of send errors              |
| <i>flap_cnt</i>             | (Optional) Number of PDU timeout              |

### Command Mode

- /exec

# show cdp traffic interface2 all

```
show cdp traffic interface2 all [ __readonly__ TABLE_cdp_traffic <intf_id> <total_input_packets>
<valid_cdp_packets> <input_v1_packets> <input_v2_packets> <invalid_cdp_packets> <unsupported_version>
<checksum_errors> <malformed_packets> <total_output_packets> <output_v1_packets> <output_v2_packets>
<send_errors> <flap_cnt> ]
```

## Syntax Description

|                      |   |
|----------------------|---|
| show                 | Show running system information               |

| checksum_errors      | (Optional) Packets having checksum errors     |
| malformed_packets    | (Optional) Total malformed packets            |
| total_output_packets | (Optional) Total output packets               |
| output_v1_packets    | (Optional) Output vesrion1 packets            |
| output_v2_packets    | (Optional) Output vesrion2 packets            |
| send_errors          | (Optional) Number of send errors              |
| flap_cnt             | (Optional) Number of PDU timeout              |

## Command Mode

- /exec

# show cfs application

```
show cfs application [ { name <cfs-dyn-app-name> | sap <i0> } ] [ __readonly__ [ <enabled> <timeout>
<merge_capable> <scope> <region> ] [ { TABLE_apps <app_name> <app_enabled> <app_scope> } ] ]
```

## Syntax Description

|                         |   |
|-------------------------|---|
| show                    | Show running system information                       |
| cfs                     | CFS Show Command handler                              |
| application             | Show locally registered applications                  |
| name                    | (Optional) Show local application information by name |
| <i>cfs-dyn-app-name</i> | (Optional) Registered name of the local application   |
| sap                     | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED             |
| <i>i0</i>               | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED             |
| <i>__readonly__</i>     | (Optional)  |
| <i>enabled</i>          | (Optional) whether application is CFS enabled         |
| <i>timeout</i>          | (Optional) timeout                                    |
| <i>merge_capable</i>    | (Optional) merge_capable                              |
| <i>scope</i>            | (Optional) scope                                      |
| <i>region</i>           | (Optional) region                                     |
| TABLE_apps              | (Optional) all cfs applications                       |
| <i>app_name</i>         | (Optional) name of cfs application                    |
| <i>app_enabled</i>      | (Optional) whether application is cfs enabled         |
| <i>app_scope</i>        | (Optional) distribution scope of cfs application      |

## Command Mode

- /exec

# show cfs lock

```
show cfs lock [ { name <cfs-dyn-app-name> [ vsan <i0> ] | sap <i1> [ vsan1 <i2> ] } ]
```

## Syntax Description

|                         |   |
|-------------------------|---|
| show                    | Show running system information                                   |
| cfs                     | CFS Show Command handler  |
| lock                    | Show state of application's logical/physical locks                |
| name                    | (Optional) Application name for which the lock status is required |
| <i>cfs-dyn-app-name</i> | (Optional) Registered name of the local application               |
| vsan                    | (Optional) Show application's locks per vsan                      |
| <i>i0</i>               | (Optional) Vsan Range   |
| sap                     | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                         |
| <i>i1</i>               | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                         |
| vsan1                   | (Optional) Show application's locks per vsan                      |
| <i>i2</i>               | (Optional) Vsan Range   |

## Command Mode

- /exec

# show cfs lock

```
show cfs lock [ { name <cfs-dyn-app-name> | sap <i1> } ] [ __readonly__ [ { TABLE_locks [ <app_name>
] <app_scope> [ <vsan> ] [ <domain> ] [ <wwn> ] <ip_addr> <u_name> <u_type> [ <hostname> } ] ] ]
```

## Syntax Description

|                         |   |
|-------------------------|---|
| show                    | Show running system information                                   |
| cfs                     | CFS Show Command handler  |
| lock                    | Show state of application's logical/physical locks                |
| name                    | (Optional) Application name for which the lock status is required |
| <i>cfs-dyn-app-name</i> | (Optional) Registered name of the local application               |
| sap                     | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                         |
| <i>i1</i>               | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                         |
| <i>__readonly__</i>     | (Optional)  |
| TABLE_locks             | (Optional) table of all CFS locks                                 |
| <i>app_name</i>         | (Optional) name of CFS application                                |
| <i>app_scope</i>        | (Optional) scope of CFS application                               |
| <i>vsan</i>             | (Optional) vsan   |
| <i>domain</i>           | (Optional) domain   |
| <i>wwn</i>              | (Optional) wwn of switch holding CFS lock                         |
| <i>ip_addr</i>          | (Optional) ip address of switch holding CFS lock                  |
| <i>u_name</i>           | (Optional) user name  |
| <i>u_type</i>           | (Optional) user type  |
| <i>hostname</i>         | (Optional) hostname   |

## Command Mode

- /exec

## show cfs merge status

show cfs merge status [ { name <cfs-dyn-app-name> [ vsan <i0> ] | sap <i1> [ vsan1 <i2> ] } ]

### Syntax Description

|                         |   |
|-------------------------|---|
| show                    | Show running system information                     |
| cfs                     | CFS Show Command handler                            |
| merge                   | Show cfs merge information                          |
| status                  | Show status of merge                                |
| name                    | (Optional) Show merge status by name                |
| <i>cfs-dyn-app-name</i> | (Optional) Registered name of the local application |
| vsan                    | (Optional) Show merge information based on vsan     |
| <i>i0</i>               | (Optional) Vsan Range                               |
| sap                     | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED           |
| <i>i1</i>               | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED           |
| vsan1                   | (Optional) Show merge information based on vsan     |
| <i>i2</i>               | (Optional) Vsan Range                               |

### Command Mode

- /exec

## show cfs merge status

```
show cfs merge status [ { name <cfs-dyn-app-name> [ detail ] | sap <i1> [ detail2 ] } ] [ __readonly__ [ {
scope <scope> } ] [ { merge_status <status> } ] [ { failure_reason <reason> } ] [ { TABLE_all_merge
<app_name> <scope> <vsan> <status> } ] [ { TABLE_local_fabric [ <domain> ] <wwn> <ip_addr>
<app_scope> [ <master> ] [ <hostname> ] } ] [ { TABLE_remote_fabric [ <domain> ] <wwn> <ip_addr>
<app_scope> [ <master> ] [ <hostname> ] } ] [ { TABLE_remaining_fabric [ <domain> ] <wwn> <ip_addr>
[ <hostname> ] } ] ] ]
```

### Syntax Description

|                         |   |
|-------------------------|---|
| show                    | Show running system information                     |
| cfs                     | CFS Show Command handler                            |
| merge                   | Show cfs merge information                          |
| status                  | Show status of merge                                |
| name                    | (Optional) Show merge status by name                |
| <i>cfs-dyn-app-name</i> | (Optional) Registered name of the local application |
| detail                  | (Optional) Show merge status by name in detail      |
| sap                     | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED           |
| <i>i1</i>               | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED           |
| detail2                 | (Optional) Show merge status by sap in detail       |
| <u>__readonly__</u>     | (Optional)  |
| scope                   | (Optional) distribution scope of application        |
| <i>scope</i>            | (Optional) scope                                    |
| merge_status            | (Optional) status                                   |
| <i>status</i>           | (Optional) status                                   |
| failure_reason          | (Optional) reason                                   |
| <i>reason</i>           | (Optional) reason                                   |
| TABLE_all_merge         | (Optional) all                                      |
| <i>app_name</i>         | (Optional) name                                     |
| <i>scope</i>            | (Optional) scope                                    |
| <i>vsan</i>             | (Optional) vsan                                     |

|                        |                          |
|------------------------|--------------------------|
| TABLE_local_fabric     | (Optional) local fabric  |
| <i>domain</i>          | (Optional) domain        |
| <i>wwn</i>             | (Optional) wwn           |
| <i>ip_addr</i>         | (Optional) ip_addr       |
| <i>app_scope</i>       | (Optional) scope         |
| <i>master</i>          | (Optional) master        |
| <i>hostname</i>        | (Optional) hname         |
| TABLE_remote_fabric    | (Optional) remote fabric |
| <i>domain</i>          | (Optional) domain        |
| <i>wwn</i>             | (Optional) wwn           |
| <i>ip_addr</i>         | (Optional) ip_addr       |
| <i>app_scope</i>       | (Optional) scope         |
| <i>master</i>          | (Optional) master        |
| <i>hostname</i>        | (Optional) hname         |
| TABLE_remaining_fabric | (Optional) remote fabric |
| <i>domain</i>          | (Optional) domain        |
| <i>wwn</i>             | (Optional) wwn           |
| <i>ip_addr</i>         | (Optional) ip_addr       |
| <i>hostname</i>        | (Optional) hname         |

**Command Mode**

- /exec

## show cfs peers

```
show cfs peers [ { name <cfs-dyn-app-name> | sap <i1> } ] [ __readonly__ [ { scope <scope> } ] ] [ {
TABLE_peers <wwn> <ip_addr> [ <local> ] [ <hostname> ] [ <domain> } ] ] ]
```

### Syntax Description

|                         |   |
|-------------------------|---|
| show                    | Show running system information                     |
| cfs                     | CFS Show Command handler                            |
| peers                   | Show all the peers in the physical fabric           |
| name                    | (Optional) Show peers for given application name    |
| <i>cfs-dyn-app-name</i> | (Optional) Registered name of the local application |
| sap                     | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED           |
| <i>i1</i>               | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED           |
| <i>__readonly__</i>     | (Optional)  |
| scope                   | (Optional) scope                                    |
| <i>scope</i>            | (Optional) scope                                    |
| TABLE_peers             | (Optional) all peers                                |
| <i>wwn</i>              | (Optional) wwn                                      |
| <i>ip_addr</i>          | (Optional) ip_addr                                  |
| <i>local</i>            | (Optional) local                                    |
| <i>hostname</i>         | (Optional) hname                                    |
| <i>domain</i>           | (Optional) domain                                   |

### Command Mode

- /exec

# show cfs peers

```
show cfs peers [ { name <cfs-dyn-app-name> [ vsan <i0> ] | sap <i1> [ vsan1 <i2> ] } ]
```

## Syntax Description

|                         |   |
|-------------------------|---|
| show                    | Show running system information                     |
| cfs                     | CFS Show Command handler                            |
| peers                   | Show all the peers in the physical fabric           |
| name                    | (Optional) Show peers for given application name    |
| <i>cfs-dyn-app-name</i> | (Optional) Registered name of the local application |
| vsan                    | (Optional) Show peers for a specified vsan(s)       |
| <i>i0</i>               | (Optional) Vsan Range                               |
| sap                     | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED           |

| <i>scope</i>          | (Optional) scope                  |

**Command Mode**

- /exec

# show cfs static peers

show cfs static peers

## Syntax Description

|        |  |
|--------|--|
| show   | Show running system information              |
| cfs    | CFS Show Command handler                     |
| static | Show all static peers with status            |
| peers  | Show all configured static peers with status |

## Command Mode

- /exec

## show cfs status

```
show cfs status [ __readonly__ <distribution> <dist_over_ip> <ipv4_mcast_addr> <ipv6_mcast_addr>
<dist_over_eth> ]
```

### Syntax Description

|                        |   |
|------------------------|---|
| show                   | Show running system information                   |
| cfs                    | CFS Show Command handler                          |
| status                 | Show current status of CFS                        |
| <i>__readonly__</i>    | (Optional)  |
| <i>distribution</i>    | (Optional) operational status of CFS distribution |
| <i>dist_over_ip</i>    | (Optional) operational status of CFS overIP       |
| <i>ipv4_mcast_addr</i> | (Optional) ipv4 multicast address                 |
| <i>ipv6_mcast_addr</i> | (Optional) ipv6 multicast address                 |
| <i>dist_over_eth</i>   | (Optional) operations status of CFSoE             |

### Command Mode

- /exec

# show checkpoint

```
show checkpoint [ all ] [ user | system ] [ __readonly__ TABLE_checkpoint_details <name>
<checkpoint_config> + ]
```

## Syntax Description

|                          |  |
|--------------------------|--|
| show                     | Show running system information                                |
| checkpoint               | Show configuration rollback checkpoints                        |
| all                      | (Optional) Show default config                                 |
| user                     | (Optional) Show only user configuration rollback checkpoints   |
| system                   | (Optional) Show only system configuration rollback checkpoints |
| __readonly__             | (Optional) Read only   |
| TABLE_checkpoint_details | (Optional) checkpoint details                                  |
| <i>name</i>              | (Optional) Checkpoint name                                     |
| <i>checkpoint_config</i> | (Optional) Configuration entry from checkpoint                 |

## Command Mode

- /exec

# show checkpoint

```
show checkpoint <chkpoint_name> [ all ] [ __readonly__ TABLE_checkpoint_details <name1>
<checkpoint_config> + ]
```

## Syntax Description

|                          |   |
|--------------------------|---|
| show                     | Show running system information                 |
| checkpoint               | Show configuration rollback checkpoint contents |
| <i>chkpoint_name</i>     | Checkpoint name                                 |
| all                      | (Optional) Show default config                  |
| <i>__readonly__</i>      | (Optional) Read only                            |
| TABLE_checkpoint_details | (Optional) Checkpoint details                   |
| <i>name1</i>             | (Optional) Checkpoint name                      |
| <i>checkpoint_config</i> | (Optional) Configuration entry from checkpoint  |

## Command Mode

- /exec

# show checkpoint summary

```
show checkpoint summary [ user | system ] [ __readonly__ TABLE_checkpoint_header_info <name>
<user_name> <timestamp> <file_path> <chkpt_type> <description> ]
```

## Syntax Description

|   |  |
|---|--|
| <code>show</code>                         | Show running system information  |
| <code>checkpoint</code>                   | Show configuration rollback checkpoints                                |
| <code>summary</code>                      | Show configuration rollback checkpoints summary                        |
| <code>user</code>                         | (Optional) Show only user configuration rollback checkpoints summary   |
| <code>system</code>                       | (Optional) Show only system configuration rollback checkpoints summary |
| <code>__readonly__</code>                 | (Optional) Read only   |
| <code>TABLE_checkpoint_header_info</code> | (Optional) Checkpoint header info                                      |
| <code>user_name</code>                    | (Optional) Username  |
| <code>name</code>                         | (Optional) Checkpoint name   |
| <code>file_path</code>                    | (Optional) Checkpoint name   |
| <code>timestamp</code>                    | (Optional) Timestamp of checkpoint creation                            |
| <code>chkpt_type</code>                   | (Optional) Type of checkpoint either user or system                    |
| <code>description</code>                  | (Optional) Checkpoint description                                      |

## Command Mode

- /exec

## show class-map

```
show class-map [ { [ type qos ] [ <omap-name> | xxx <color-map-enum-name> ] } | { type queuing [ yyy
<omap-enum-name> | zzz <default-omap-enum-name> | <omap-dce-name> | <omap-name-hque> ] } ] [
__readonly__ { [ <display-all> ] [ TABLE_omap [ <omap-key> ] [ <nq-omap-key> ] [ <nq-omap-name> ] [
<nq-cos-list> ] [ <nq-qos-group-list> ] [ <protocol> ] [ <id> ] <xqos-or-q> [ <any_or_all> ] <omap-name-out>
[ <desc> ] [ <nq-desc> ] [ TABLE_match <match-key> [ <not> ] [ <dscp-list> ] [ <precedence-list> ] [
<cos-list> ] [ <qos-group-list> ] [ <discard-class-list> ] [ <vlan-list> ] [ <match-omap-name> ] [
<match-acl-name> ] [ <note-string> ] [ <pkt-len-list> ] [ <rtp-port-list> ] [ <roce-port-list> ] [ <prot> ] [
<input-iface-list> ] [ <exp-list> ] [ <cl-def> ] ] ] ] ]
```

### Syntax Description

|                               |  |
|-------------------------------|--|
| xxx                           | (Optional) xxx                             |
| yyy                           | (Optional) yyy                             |
| zzz                           | (Optional) zzz                             |
| show                          | Show running system information            |

| dynamic               | Display current range of dynamic parameters        |
| strings               | Display current range of dynamic string parameters |
| <i>name</i>           | (Optional) name of the dynamic parameter           |
| <i>__readonly__</i>   | (Optional)   |
| TABLE_dynamic_strings | (Optional)   |
| <i>name-o</i>         | (Optional)   |
| <i>value</i>          | (Optional)   |

## Command Mode

- /exec

# show cli history

show cli history [ this-mode-only | exec-mode | config-mode ] [ <count> | unformatted ] +

## Syntax Description

|                |  |
|----------------|--|
| show           | Show running system information                    |
| cli            | debug cli  |
| history        | history of cli commands                            |
| <i>count</i>   | (Optional) number of lines to display (from end)   |
| unformatted    | (Optional) display just the commands               |
| this-mode-only | (Optional) display history from current mode only  |
| exec-mode      | (Optional) display history of exec commands only   |
| config-mode    | (Optional) display history of config commands only |

## Command Mode

- /exec

# show cli interface table

show cli interface table

## Syntax Description

|           |           |
|-----------|-----------|
| show      | show      |
| cli       | cli       |
| interface | interface |
| table     | table     |

## Command Mode

- /exec

# show cli list

show cli list [ detail | recurse | <component> | <max-per-cmd> | has-xml-out ] +

## Syntax Description

|                    |                                 |
|--------------------|---------------------------------|
| show               | Show running system information |
| cli                | Show CLI information            |
| list               | show                            |
| <i>component</i>   | (Optional) component            |
| <i>max-per-cmd</i> | (Optional) max                  |
| has-xml-out        | (Optional) show                 |
| recurse            | (Optional) go                   |
| detail             | (Optional) formats              |

## Command Mode

- /exec

# show cli syntax

```
show cli syntax [ long | recurse ] + [ has-xml-out | has-no-xml-out | is-data-modeled ] [ roles [ network-admin
| network-operator | <roles-mask> ] ]
```

## Syntax Description

|                   |                                 |
|-------------------|---------------------------------|
| show              | Show running system information |
| cli               | Show CLI information            |
| syntax            | show                            |
| long              | (Optional) use                  |
| recurse           | (Optional) also                 |
| has-xml-out       | (Optional) show                 |
| has-no-xml-out    | (Optional) show                 |
| is-data-modeled   | (Optional) show                 |
| roles             | (Optional) show                 |
| network-admin     | (Optional) show                 |
| network-operator  | (Optional) show                 |
| <i>roles-mask</i> | (Optional) show                 |

## Command Mode

- /exec

# show cli variables

```
show cli variables [ __readonly__ <switchname> <timestamp> <currentuser> [ { TABLE_variable <key>
<value> } ] [ { TABLE_session_variable <key> <value> } ] ]
```

## Syntax Description

|                        |                                   |
|------------------------|-----------------------------------|
| show                   | Show running system information   |
| cli                    | Show CLI information              |
| variables              | Show CLI variables                |
| <i>__readonly__</i>    | (Optional)                        |
| <i>switchname</i>      | (Optional) Switch Name            |
| <i>timestamp</i>       | (Optional) Timestamp              |
| <i>currentuser</i>     | (Optional) Current User           |
| TABLE_variable         | (Optional) Variable table         |
| <i>key</i>             | (Optional) key                    |
| <i>value</i>           | (Optional) value                  |
| TABLE_session_variable | (Optional) Session variable table |
| <i>key</i>             | (Optional) key                    |
| <i>value</i>           | (Optional) value                  |

## Command Mode

- /exec

# show clock

```
show clock [ detail ] [ __readonly__ { <simple_time> <time_source> [ <daylight_zone> <daylight_start_week>
<daylight_start_weekday> <daylight_start_month> <daylight_start_time> <daylight_end_week>
<daylight_end_weekday> <daylight_end_month> <daylight_end_time> <daylight_utc_min_offset> } } ]
```

## Syntax Description

|                                |  |
|--------------------------------|--|
| show                           | Show running system information                              |
| clock                          | Display current Date   |
| detail                         | (Optional) Display current date and summertime configuration |
| __readonly__                   | (Optional)   |
| <i>simple_time</i>             | (Optional) simple clock format                               |
| <i>time_source</i>             | (Optional) Time source                                       |
| <i>daylight_zone</i>           | (Optional) summer-time daylight zone                         |
| <i>daylight_start_week</i>     | (Optional) daylight start week                               |
| <i>daylight_start_weekday</i>  | (Optional) daylight start weekday                            |
| <i>daylight_start_month</i>    | (Optional) daylight start month                              |
| <i>daylight_start_time</i>     | (Optional) daylight start time                               |
| <i>daylight_end_week</i>       | (Optional) daylight end week                                 |
| <i>daylight_end_weekday</i>    | (Optional) daylight end weekday                              |
| <i>daylight_end_month</i>      | (Optional) daylight end month                                |
| <i>daylight_end_time</i>       | (Optional) daylight end time                                 |
| <i>daylight_utc_min_offset</i> | (Optional) daylight utc offset                               |

## Command Mode

- /exec

# show config-profile

```
show config-profile [ name <all_conf_profile_name> ] [ __readonly__ TABLE_conf_profile_all
<conf_profile_name> { [ <conf_profile_desc> ] <conf_profile_cfg> + [ <conf_profile_applied> ] + [
<conf_profile_include> ] + } ]
```

## Syntax Description

|                               |  |
|-------------------------------|--|
| show                          | Show running system information                    |
| config-profile                | Show config-profiles                               |
| name                          | (Optional) config-profile name                     |
| <i>all_conf_profile_name</i>  | (Optional) Enter the name of configuration profile |
| <i>__readonly__</i>           | (Optional)   |
| <i>TABLE_conf_profile_all</i> | (Optional)   |
| <i>conf_profile_name</i>      | (Optional)   |
| <i>conf_profile_desc</i>      | (Optional)   |
| <i>conf_profile_cfg</i>       | (Optional)   |
| <i>conf_profile_applied</i>   | (Optional)   |
| <i>conf_profile_include</i>   | (Optional)   |

## Command Mode

- /exec

# show config-profile applied

```
show config-profile { applied [ auto | manually ] | non-applied } [ match-name <profile_substring> ] [
__readonly__ [ <profiles> ] + ]
```

## Syntax Description

|                          |   |
|--------------------------|---|
| show                     | Show running system information   |
| config-profile           | Show config-profiles  |
| applied                  | List of config-profiles that are applied                                    |
| auto                     | (Optional) List of config-profiles that are applied via auto-config         |
| manually                 | (Optional) List of all config-profiles which were applied directly from cli |
| non-applied              | List of config-profiles that are not applied                                |
| match-name               | (Optional) List of all config-profiles that have matching sub-string        |
| __readonly__             | (Optional)  |
| <i>profiles</i>          | (Optional)  |
| <i>profile_substring</i> | (Optional) Enter a substring to match with config-profile name              |

## Command Mode

- /exec

## show config-replace log exec

```
show config-replace log { exec | verify } [ __readonly__ [ <last_operation> ] [ <checkpoint_name> ] [ <scheme> ] [ <user> ] [ <config_replace_type> ] [ <verbose> ] [ <start_time> ] [ <start_time_utc> ] [ <log_entry> + ] [ <end_time> ] [ <end_time_utc> ] [ <status> ] [ <restoring_previous_status> + ] [ <executing_switch_profile_patch> + ] [ <tobe_removed_present> + ] [ <tobe_added_missing> + ] [ <executing_patch> + ] [ <validating_patch> + ] [ <executing_patch_post_validation> + ] [ <retrying_patch> + ] [ <restore_previous_config> + ] [ <undo_end_time> ] [ <undo_end_time_utc> ] [ <undo_status> ] ]
```

### Syntax Description

|                                       |   |
|---------------------------------------|---|
| show                                  | Show running system information                 |
| config-replace                        | Show config-replace                             |
| log                                   | show config-replace log                         |
| exec                                  | show config-replace execution log               |
| verify                                | show config-replace verify log                  |
| <i>__readonly__</i>                   | (Optional) Read only                            |
| <i>last_operation</i>                 | (Optional) last operation                       |
| <i>checkpoint_name</i>                | (Optional) checkpoint name                      |
| <i>scheme</i>                         | (Optional) scheme                               |
| <i>user</i>                           | (Optional) user                                 |
| <i>config_replace_type</i>            | (Optional) config-replace type                  |
| <i>verbose</i>                        | (Optional) verbose                              |
| <i>start_time</i>                     | (Optional) Start Time                           |
| <i>start_time_utc</i>                 | (Optional) Start Time UTC                       |
| <i>log_entry</i>                      | (Optional) log entry from configure replace log |
| <i>end_time</i>                       | (Optional) End Time                             |
| <i>end_time_utc</i>                   | (Optional) End Time UTC                         |
| <i>status</i>                         | (Optional) status                               |
| <i>restoring_previous_status</i>      | (Optional) Restoring Previous Config Status     |
| <i>executing_switch_profile_patch</i> | (Optional) Executing Switch profile Patch       |
| <i>tobe_removed_present</i>           | (Optional) log entry from configure replace log |
| <i>tobe_added_missing</i>             | (Optional) log entry from configure replace log |

|  |  |
|--|--|
| <i>undo_end_time</i>                   | (Optional) Undo End Time                   |
| <i>undo_end_time_utc</i>               | (Optional) Undo End Time UTC               |
| <i>executing_patch</i>                 | (Optional) Executing Patch                 |
| <i>validating_patch</i>                | (Optional) Validating Patch                |
| <i>executing_patch_post_validation</i> | (Optional) Executing Patch post validation |
| <i>retrying_patch</i>                  | (Optional) Retrying Rollback Patch         |
| <i>restore_previous_config</i>         | (Optional) Restoring previous config       |
| <i>undo_status</i>                     | (Optional) undo status                     |

**Command Mode**

- /exec

## show config-replace status

```
show config-replace status [ __readonly__ <last_operation> [ <config_replace_type> ] [ <name> ] [
<start_time> ] [ <end_time> ] [ <operation_status> ] [ <commit_status> ] [ <commit_timeout_remaining> ]
]
```

### Syntax Description

|                                 |   |
|---------------------------------|---|
| show                            | Show running system information                 |
| config-replace                  | show config-replace                             |
| status                          | show status of last configure replace operation |
| <i>__readonly__</i>             | (Optional) Read only                            |
| <i>last_operation</i>           | (Optional) last operation                       |
| <i>config_replace_type</i>      | (Optional) config-replace type                  |
| <i>name</i>                     | (Optional) name                                 |
| <i>start_time</i>               | (Optional) start time                           |
| <i>end_time</i>                 | (Optional) end time                             |
| <i>operation_status</i>         | (Optional) operation status                     |
| <i>commit_status</i>            | (Optional) Commit status                        |
| <i>commit_timeout_remaining</i> | (Optional) commit timeout remaining             |

### Command Mode

- /exec

# show configuration

show configuration { commit list | dual-stage sessions }

## Syntax Description

|               |   |
|---------------|---|
| show          | Show running system information               |
| configuration | Show information about configuration sessions |
| commit        | commit information                            |
| list          | Information about commit-id                   |
| dual-stage    | Active dual stage session                     |
| sessions      | Users with active configuration sessions      |

## Command Mode

- /exec

# show configuration

show configuration

## Syntax Description

|               |   |
|---------------|---|
| show          | Show running system information               |
| configuration | Show information about configuration sessions |

## Command Mode

- /exec

# show configuration commit

show configuration commit { changes <conf-commit-id> | <conf-commit-id> | log }

## Syntax Description

|                       |   |
|-----------------------|---|
| show                  | Show running system information               |
| configuration         | Show information about configuration sessions |
| commit                | commit information                            |
| changes               | difference in committed configs               |
| <i>conf-commit-id</i> | commit ID                                     |
| log                   | Displays execution logs of last commit        |

## Command Mode

- /exec

# show configuration failed

show configuration failed [ noerrors ]

## Syntax Description

|               |  |
|---------------|--|
| show          | Show running system information                                |
| configuration | Show information about configuration sessions                  |
| failed        | Contents of failed configuration                               |
| noerrors      | (Optional) Failed items in last commit (exclude error reasons) |

## Command Mode

- /exec

# show configuration file

show configuration file <uri0> [ clear-text ]

## Syntax Description

|               |   |
|---------------|---|
| show          | Show running system information               |
| configuration | Show information about configuration sessions |
| file          | Displays content of files                     |
| <i>uri0</i>   | Filename to be displayed                      |
| clear-text    | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED     |

## Command Mode

- /exec

# show configuration session

```
show configuration session [ __readonly__ [ TABLE_session_all <ssn-name> [ TABLE_session_all_cmd [
<ssn-cmd-num> ] [ <command> ] ] ] <activesesscnt> ]
```

## Syntax Description

|                              |  |
|------------------------------|--|
| show                         | Show running system information                    |
| configuration                | Show information about configuration sessions      |
| session                      | Show active configuration sessions                 |
| <i>__readonly__</i>          | (Optional) Read only                               |
| <i>TABLE_session_all</i>     | (Optional) Show session table                      |
| <i>ssn-name</i>              | (Optional)   |
| <i>TABLE_session_all_cmd</i> | (Optional) Show session related commands           |
| <i>ssn-cmd-num</i>           | (Optional)   |
| <i>command</i>               | (Optional)   |
| <i>activesesscnt</i>         | (Optional) Number of active configuration sessions |

## Command Mode

- /exec

# show configuration session

```
show configuration session <s3> [ __readonly__ <ssn-name> [ TABLE_session_details [ <ssn-cmd-num> ]
[ <command> ] ] ]
```

## Syntax Description

|                       |  |
|-----------------------|--|
| show                  | Show running system information                |
| configuration         | Show information about configuration sessions  |
| session               | Show active configuration sessions             |
| s3                    | Shows configuration session given a name       |
| __readonly__          | (Optional) Read only                           |
| ssn-name              | (Optional)                                     |
| TABLE_session_details | (Optional) Show session details for given name |
| ssn-cmd-num           | (Optional)                                     |
| command               | (Optional)                                     |

## Command Mode

- /exec

# show configuration session global-info

```
show configuration session global-info [ __readonly__ <max-ssns> <max-cmds> <curr-num-ssns>
<curr-num-cmds> ]
```

## Syntax Description

|                      |   |
|----------------------|---|
| show                 | Show running system information               |
| configuration        | Show information about configuration sessions |
| session              | Show active configuration sessions            |
| global-info          | Show configuration sessions global-info       |
| <i>__readonly__</i>  | (Optional) Read only                          |
| <i>max-ssns</i>      | (Optional)                                    |
| <i>max-cmds</i>      | (Optional)                                    |
| <i>curr-num-ssns</i> | (Optional)                                    |
| <i>curr-num-cmds</i> | (Optional)                                    |

## Command Mode

- /exec

## show configuration session status

```
show configuration session status [ <s3> ] [ __readonly__ [ TABLE_session_status <ssn-name> <last-action>
<ac-status> <ac-reason> <ac-tstamp> [ <failed-cmd-num> ] [ <failed-cmd> ] [ <last-vfy-cmd-num> ] [
<last-vfy-cmd> ] [ <last-vfy-tstamp> ] [ <rollback-status> ] ] ]
```

### Syntax Description

|                      |  |
|----------------------|--|
| show                 | Show running system information                            |
| configuration        | Show information about configuration sessions              |
| session              | Show active configuration sessions                         |
| status               | Show configuration session-mgr status                      |
| s3                   | (Optional) Shows configuration session status given a name |
| __readonly__         | (Optional) Read only                                       |
| TABLE_session_status | (Optional) Show session status table                       |
| ssn-name             | (Optional)   |
| last-action          | (Optional) Last Action                                     |
| ac-status            | (Optional) Last Action Status                              |
| ac-reason            | (Optional) Last Action Reason                              |
| ac-tstamp            | (Optional) Last Action Timestamp                           |
| failed-cmd-num       | (Optional) Failed Command Number                           |
| failed-cmd           | (Optional) Failed Command                                  |
| last-vfy-cmd-num     | (Optional) Last Verified Command Number                    |
| last-vfy-cmd         | (Optional) Last Verified Command                           |
| last-vfy-tstamp      | (Optional) Last Verified Command Timestamp                 |
| rollback-status      | (Optional) Rollback Status                                 |

### Command Mode

- /exec

# show configuration session summary

```
show configuration session summary [ __readonly__ [ TABLE_session_summary <ssn-name> <username>
<tstamp> ] [ <activesesscnt> ] ]
```

## Syntax Description

|                                    |  |
|------------------------------------|--|
| <code>show</code>                  | Show running system information                    |
| <code>configuration</code>         | Show information about configuration sessions      |
| <code>session</code>               | Show active configuration sessions                 |
| <code>summary</code>               | Show summary of the active configuration sessions  |
| <code>__readonly__</code>          | (Optional) Read only                               |
| <code>TABLE_session_summary</code> | (Optional) Show session summary table              |
| <code>ssn-name</code>              | (Optional)   |
| <code>username</code>              | (Optional) Session Owner                           |
| <code>tstamp</code>                | (Optional) Creation Time                           |
| <code>activesesscnt</code>         | (Optional) Number of active configuration sessions |

## Command Mode

- /exec

# show configuration session vsh

```
show configuration session <s3> vsh [ __readonly__ <ssn-name> [ TABLE_session_details_vsh [
<ssn-cmd-num> ] [ <command> ] ] ]
```

## Syntax Description

|                           |   |
|---------------------------|---|
| show                      | Show running system information                       |
| configuration             | Show information about configuration sessions         |
| session                   | Show active configuration sessions                    |
| s3                        | Shows configuration session given a name              |
| vsh                       |   |
| __readonly__              | (Optional) Read only                                  |
| TABLE_session_details_vsh | (Optional) Show session details for given name on vsh |
| ssn-name                  | (Optional)  |
| ssn-cmd-num               | (Optional)  |
| command                   | (Optional)  |

## Command Mode

- /exec

# show consistency-checker copp

show consistency-checker copp

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information               |
| consistency-checker | Consistency Checker                           |
| copp                | Verify copp programming from software context |

## Command Mode

- /exec

# show consistency-checker copp extended module

show consistency-checker copp extended module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| copp                | Verify copp programming from software context                   |
| extended            | extended  |
| module              | Limit display to this module                                    |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker dme interfaces

show consistency-checker dme interfaces

## Syntax Description

|                     |                                 |
|---------------------|---------------------------------|
| show                | Show running system information |
| consistency-checker | Consistency Checker             |
| dme                 | DME (ObjectStore)               |
| interfaces          | interfaces oper data            |

## Command Mode

- /exec

# show consistency-checker egress-xlate private-vlan

show consistency-checker egress-xlate private-vlan <vlan>

## Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information                    |
| consistency-checker | Consistency Checker                                |
| egress-xlate        | Check PVLAN egress-xlate                           |
| private-vlan        | Verifies private-vlan egress-xlate in the hardware |
| <i>vlan</i>         | Enter private-vlan id                              |

## Command Mode

- /exec

# show consistency-checker ehm interface

show consistency-checker ehm interface { <intf> | all }

## Syntax Description

|                     |                                       |
|---------------------|---------------------------------------|
| show                | Show running system information       |
| consistency-checker | Consistency Checker                   |
| ehm                 | Show EHM Info                         |
| interface           | Show interface status and information |
| <i>intf</i>         | Virtual Interface                     |
| all                 | Display All Interfaces                |

## Command Mode

- /exec

## show consistency-checker fcoe

```
show consistency-checker fcoe [ { interface <ifl> [ { exclude ping } ] } | { npv [ server-interface <svr_ifl>
external-interface <ext_ifl> ] } | { hw-table { pif | vif | ucpcfg | vsan | acl | fib [ flogi | domain [ local | remote
] ] | fcf | zone | mac } } | { [ exclude ] ping } | { drop [ ingress | egress ] } ] [ verbose [ detail ] ]
```

### Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information                          |
| consistency-checker | Consistency Checker                                      |
| fcoe                | FCoE manager   |
| interface           | (Optional) Interface Test                                |
| <i>ifl</i>          | (Optional) Interface name                                |
| npv                 | (Optional) NPV server to external interface pinning test |
| server-interface    | (Optional) Server Interface Name                         |
| <i>svr_ifl</i>      | (Optional) Server Interface name                         |
| external-interface  | (Optional) External Interface Name                       |
| <i>ext_ifl</i>      | (Optional) External Interface name                       |
| hw-table            | (Optional) Consistency checker for Hardware Tables       |
| pif                 | (Optional) PIF Table Test                                |
| vif                 | (Optional) VIF Table Test                                |
| ucpcfg              | (Optional) Port-channel Program Table Test               |
| vsan                | (Optional) VSAN VLAN related tables                      |
| acl                 | (Optional) ACL Test                                      |
| fib                 | (Optional) FIB Test                                      |
| flogi               | (Optional) FIB Test for FLOGIs                           |
| domain              | (Optional) FIB Test for domains                          |
| local               | (Optional) FIB Test for local domains                    |
| remote              | (Optional) FIB Test for remote domains                   |
| fcf                 | (Optional) FCF Test                                      |
| zone                | (Optional) ZONE Test                                     |
| mac                 | (Optional) MAC Table Test                                |

|         |                                   |
|---------|-----------------------------------|
| exclude | (Optional) Exclude given test     |
| ping    | (Optional) FCPING Test            |
| drop    | (Optional) Hardware drops         |
| ingress | (Optional) Ingress Drop Test      |
| egress  | (Optional) Egress Drop Test       |
| verbose | (Optional) To get debugs          |
| detail  | (Optional) To get detailed debugs |

**Command Mode**

- /exec

# show consistency-checker fex-interfaces fex

show consistency-checker fex-interfaces { fex <id> | interface <ifid> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| fex-interfaces      | Compares software and hardware state of fex interfaces          |
| fex                 | Limit display to interfaces on this fex                         |
| <i>id</i>           | Enter module number   |
| interface           | Limit display to FEX interface                                  |
| <i>ifid</i>         | FEX interface name  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

## show consistency-checker forwarding

```
show consistency-checker forwarding [ ip | ipv4 ] [ unicast ] [ suppress-transient ] [ vrf { <vrf-name> | all_vrfs
} ] [ module { <module> | all_modules } ] [ __readonly__ [ <err_str> ] [ <cc_header> ] [ <table_id> ] [
<slot_id> ] [ <exec_time> ] [ <elapsed_time> ] [ <inconsis_adjs> ] [ TABLE_inconsistency_adjs { <id>
<slot> [ <unit> ] <vrf> [ <ipaddr> ] [ <ipprefix> ] [ <interface> ] <reason> } ] [ <inconsis_routes> ] [
TABLE_inconsistency_routes { <id> <slot> [ <unit> ] <vrf> [ <ipaddr> ] [ <ipprefix> ] [ <interface> ]
<reason> } ] [ <run_status> ] ]
```

### Syntax Description

|                          |   |
|--------------------------|---|
| show                     | show  |
| consistency-checker      | Consistency Checker                           |
| forwarding               | Display Forwarding Information                |
| ip                       | (Optional) ipv4                               |
| ipv4                     | (Optional) ipv4                               |
| unicast                  | (Optional) unicast                            |
| suppress-transient       | (Optional) Suppress Transient state           |
| vrf                      | (Optional) check routes for a specific VRF    |
| <i>vrf-name</i>          | (Optional) VRF name                           |
| module                   | (Optional) check routes for a specific module |
| <i>module</i>            | (Optional) module number                      |
| all_modules              | (Optional) all module's                       |

| <i>reasonipv6</i>          | (Optional) |
| <i>run_status</i>          | (Optional) |

**Command Mode**

- /exec

# show consistency-checker forwarding single-route ipv4 vrf

```
show consistency-checker forwarding single-route { ipv4 | ipv6 } <ip-prefix> vrf { <vrf-name> |
<vrf-known-name> } [ brief | detail ]
```

## Syntax Description

|                       |   |
|-----------------------|---|
| show                  | Show running system information                                 |
| consistency-checker   | Consistency Checker   |
| forwarding            | Display Forwarding Information                                  |
| single-route          | Run the consistency checker for a single route                  |
| ipv4                  | IPv4 address  |
| ipv6                  | IPv6 address  |
| <i>ip-prefix</i>      | Specify an IP prefix/mask                                       |
| vrf                   | check routes for a specific VRF                                 |
| <i>vrf-name</i>       | VRF name  |
| <i>vrf-known-name</i> | Known VRF name  |
| brief                 | (Optional) Show consistency checker structured output in brief  |
| detail                | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker fsync

show consistency-checker fsync [ debug-logs ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| fsync               | Do consistency check for frequency synchronization              |
| debug-logs          | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                       |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

## show consistency-checker gwmacdb

show consistency-checker gwmacdb [ interface { <int-id> | <ch-id> | <vlan-id> } ] [ brief | detail ]

### Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| gwmacdb             | Check gateway mac table   |
| interface           | (Optional) interface  |
| <i>int-id</i>       | (Optional) Physical or Logical interface                        |
| <i>ch-id</i>        | (Optional) Port-Channel name                                    |
| <i>vlan-id</i>      | (Optional) SVI VLAN   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

# show consistency-checker hardware-telemetry inband brief

show consistency-checker hardware-telemetry inband { brief | detail }

## Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information                      |
| consistency-checker | Consistency Checker                                  |
| hardware-telemetry  | feature hardware-telemetry                           |
| inband              | inband-telemetry version                             |
| brief               | Show consistency checker structured output in brief  |
| detail              | Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker hardware-telemetry postcard brief

show consistency-checker hardware-telemetry postcard { brief | detail }

## Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information                      |
| consistency-checker | Consistency Checker                                  |
| hardware-telemetry  | feature hardware-telemetry                           |
| postcard            | postcard-telemetry version                           |
| brief               | Show consistency checker structured output in brief  |
| detail              | Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker kim

show consistency-checker kim

## Syntax Description

|                     |                                 |
|---------------------|---------------------------------|
| show                | Show running system information |
| consistency-checker | Consistency Checker             |
| kim                 | Kernel Interface                |

## Command Mode

- /exec

# show consistency-checker kim interface

```
show consistency-checker kim { interface <ifid> } [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| kim                 | kernel interface  |
| interface           | Limit display to interface                                      |
| <i>ifid</i>         | Interface   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

## show consistency-checker l2-tahoe mac-address

show consistency-checker l2-tahoe mac-address <mac-addr> [ module <module> ] [ unit <unit> ] [ brief | detail ]

### Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| l2-tahoe            | Verify l2 mac programming in the hardware                       |
| mac-address         | MAC address   |
| <i>mac-addr</i>     | address   |
| module              | (Optional) Module to run the consistency-checker on             |
| <i>module</i>       | (Optional) Module number  |
| unit                | (Optional) Unit to run the consistency checker on               |
| <i>unit</i>         | (Optional) Enter Unit Number                                    |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

# show consistency-checker l2-tahoe sub-interface

```
show consistency-checker l2-tahoe sub-interface { <if_name> } [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| l2-tahoe            | Verify l2 sub-interface programming in the hardware             |
| sub-interface       | sub-interface   |
| <i>if_name</i>      | Physical or Logical interface                                   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker l2-tahoe sub-interface vlan

show consistency-checker l2-tahoe sub-interface vlan <vlan-id>

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                     |
| consistency-checker | Consistency Checker                                 |
| l2-tahoe            | Verify l2 sub-interface programming in the hardware |
| sub-interface       | sub-interface                                       |
| vlan                | Do consistency check for vlan                       |
| <i>vlan-id</i>      | vlan number   |

## Command Mode

- /exec

## show consistency-checker l2-tahoe switchport

```
show consistency-checker l2-tahoe switchport { interface { <if_name> | all } | module { <module> | all } } [
brief | detail ]
```

### Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| l2-tahoe            | Verify l2 mac programming in the hardware                       |
| switchport          | Switchport Interface  |
| interface           | interface   |
| <i>if_name</i>      | Physical or Logical interface                                   |
| all                 | All switchport interfaces                                       |
| module              | Module to run the consistency-checker on                        |
| <i>module</i>       | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

# show consistency-checker l2 module

show consistency-checker { l2-tahoe | l2-mtc } module <module> [ unit <unit> ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| l2-tahoe            | Verify l2 mac programming in the hardware                       |
| l2-mtc              | Verify l2 mac programming in the hardware                       |
| module              | Module to run the consistency-checker on                        |
| <i>module</i>       | Enter module number   |
| unit                | (Optional) Unit to run the consistency checker on               |
| <i>unit</i>         | (Optional) Enter unit number                                    |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

## show consistency-checker l2 multicast group source vlan

```
show consistency-checker l2 multicast group { <grp-address> | <grp-ipv6-address> } source { <src-address>
| <src-ipv6-address> } vlan <vlan-id> [ debug-logs ] [ brief | detail ]
```

### Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| l2                  | Verify l2 mac programming in the hardware                       |
| multicast           | multicast related information                                   |
| group               | Do consistency check for group                                  |
| <i>grp-address</i>  | group IP address  |
| source              | Do consistency check for source                                 |
| <i>src-address</i>  | source IP address   |
| vlan                | Do consistency check for vlan                                   |
| <i>vlan-id</i>      | vlan number   |
| debug-logs          | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                       |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

# show consistency-checker l2 multicast mac vlan

show consistency-checker l2 multicast mac <mac-address> vlan <vlan-id> [ debug-logs ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| l2                  | Verify l2 mac programming in the hardware                       |
| multicast           | multicast related information                                   |
| mac                 | Do consistency check for multicast mac address lookup           |
| <i>mac-address</i>  | mac address   |
| vlan                | Do consistency check for vlan                                   |
| <i>vlan-id</i>      | vlan number   |
| debug-logs          | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                       |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

## show consistency-checker l3-interface

```
show consistency-checker l3-interface { all | module <moduleid> | interface { <ifid> | <ch-id> | <vlan-id> }
} [ brief | detail ]
```

### Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| l3-interface        | Compares software and hardware properties of L3 interfaces      |
| all                 | Run on all modules on the switch                                |
| module              | Limit display to interfaces on module                           |
| <i>moduleid</i>     | Module number   |
| interface           | Limit display to interface                                      |
| <i>ifid</i>         | Interface name  |
| <i>ch-id</i>        | Port-Channel name   |
| <i>vlan-id</i>      | SVI VLAN  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

## show consistency-checker l3 multicast group source vrf

```
show consistency-checker l3 multicast group { <grp-address> [ <mask> ] | <gprefix> | <grp-ipv6-address> }
source { <src-address> | <src-ipv6-address> } vrf { <vrf-name> | <vrf-known-name> } [ debug-logs ] [ brief
| detail ]
```

### Syntax Description

|                       |   |
|-----------------------|---|
| show                  | Show running system information                                 |
| consistency-checker   | Consistency Checker   |
| l3                    | l3 consistency  |
| multicast             | multicast related information                                   |
| group                 | Do consistency check for group                                  |
| <i>grp-address</i>    | group IP address  |
| <i>mask</i>           | (Optional) mask for group ip address                            |
| <i>gprefix</i>        | IPv4 Multicast Group Prefix                                     |
| source                | Do consistency check for source                                 |
| <i>src-address</i>    | source IP address   |
| vrf                   | Do consistency check for vrf                                    |
| <i>vrf-name</i>       | VRF name  |
| <i>vrf-known-name</i> | Known VRF name  |
| debug-logs            | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                       |
| brief                 | (Optional) Show consistency checker structured output in brief  |
| detail                | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

# show consistency-checker link-state fabric-ieth

```
show consistency-checker link-state fabric-ieth { [ module <module> ] } [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| link-state          | Compares software and hardware link state of interfaces         |
| fabric-ieth         | Internal Fabric ports   |
| module              | (Optional) Limit display to interfaces on module                |
| <i>module</i>       | (Optional) Enter module number                                  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker link-state module

show consistency-checker link-state { module <module> | interface <ifid> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| link-state          | Compares software and hardware link state of interfaces         |
| module              | Limit display to interfaces on module                           |
| <i>module</i>       | Module number   |
| interface           | Limit display to interface                                      |
| <i>ifid</i>         | Interface name  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker membership port-channels

show consistency-checker membership port-channels [ interface <ch-id> ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| membership          | Check various memberships                                       |
| port-channels       | Verifies port channel membership in the hardware                |
| interface           | (Optional) Port-channel number                                  |
| <i>ch-id</i>        | (Optional) Port-Channel name                                    |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker membership vlan

```
show consistency-checker membership vlan <vlanid> [ [ interface [ <intf-id> | <ch-id> ] ] | [ private-vlan [
interface [ <int-id> | <ch-id> ] ] ] ] [ native-vlan ] [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| vlan                | Verifies vlan membership in the hardware                        |
| <i>vlanid</i>       | Enter vlan id   |
| consistency-checker | Consistency Checker   |
| membership          | Check various memberships                                       |
| interface           | (Optional) Interface  |
| <i>intf-id</i>      | (Optional) Interface  |
| <i>ch-id</i>        | (Optional) Port-Channel name                                    |
| private-vlan        | (Optional) Check private-vlan primary vlan                      |
| interface           | (Optional) Interface  |
| <i>int-id</i>       | (Optional) Interface name                                       |
| <i>ch-id</i>        | (Optional) Port-Channel name                                    |
| native-vlan         | (Optional) Check for native vlans                               |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

## show consistency-checker multicast nlb cluster-ip vrf

```
show consistency-checker multicast nlb cluster-ip <ip-address> vrf { <vrf-name> | <vrf-known-name> } [
debug-logs ] [ brief | detail ]
```

### Syntax Description

|                       |   |
|-----------------------|---|
| show                  | Show running system information                                 |
| consistency-checker   | Consistency Checker   |
| multicast             | multicast related information                                   |
| nlb                   | Do consistency check for Multicast NLB                          |
| cluster-ip            | Cluster virtual unicast IP address                              |
| <i>ip-address</i>     | Cluster IP address  |
| vrf                   | Do consistency check for vrf                                    |
| <i>vrf-name</i>       | VRF name  |
| <i>vrf-known-name</i> | Known VRF name  |
| debug-logs            | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                       |
| brief                 | (Optional) Show consistency checker structured output in brief  |
| detail                | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

## show consistency-checker multicast vlan

show consistency-checker multicast vlan <vlanid> [ group <group\_ip> | destination-mac <dst\_mac> ]

### Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information                                  |
| consistency-checker | Consistency Checker  |
| multicast           | Verify Multicast   |
| vlan                | Verifies vlan flood sharing                                      |
| <i>vlanid</i>       | Enter vlan id  |
| group               | (Optional) Do consistency check for a group                      |
| <i>group_ip</i>     | (Optional) Multicast IP address of single group to display       |
| destination-mac     | (Optional) Do consistency check for a destination-mac            |
| <i>dst_mac</i>      | (Optional) Multicast Destination mac Address for Vlan to display |

### Command Mode

- /exec

# show consistency-checker niv-datapath interface

show consistency-checker niv-datapath interface <intf>

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information           |
| consistency-checker | Consistency Checker                       |
| niv-datapath        | Verify NIV Datapath for a given interface |
| interface           | Show interface status and information     |
| <i>intf</i>         | Virtual interface                         |

## Command Mode

- /exec

# show consistency-checker pacl extended ingress ip interface

show consistency-checker pacl extended ingress ip interface { <int-id> | <ch-id> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| pacl                | Verify pacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ip                  | ip protocol   |
| interface           | Interface   |
| <i>int-id</i>       | Interface   |
| <i>ch-id</i>        | Port-Channel name   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker pacl extended ingress ip module

show consistency-checker pacl extended ingress ip module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| pacl                | Verify pacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ip                  | ip protocol   |
| module              | Limit display to L2 interfaces on this module                   |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker pacl extended ingress ipv6 module

show consistency-checker pacl extended ingress ipv6 module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| pacl                | Verify pacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ipv6                | ipv6 protocol   |
| module              | Limit display to L2 interfaces on this module                   |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker pacl extended ingress ipv6 interface

show consistency-checker pacl extended ingress ipv6 interface { <int-id> | <ch-id> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| pacl                | Verify pacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ipv6                | ipv6 protocol   |
| interface           | Interface   |
| <i>int-id</i>       | Interface   |
| <i>ch-id</i>        | Port-Channel name   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker pacl extended ingress mac module

show consistency-checker pacl extended ingress mac module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| pacl                | Verify pacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| mac                 | ethernet protocol   |
| module              | Limit display to L2 interfaces on this module                   |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker pacl extended ingress mac interface

show consistency-checker pacl extended ingress mac interface { <int-id> | <ch-id> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| pacl                | Verify pacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| mac                 | ethernet protocol   |
| interface           | Interface   |
| <i>int-id</i>       | Interface   |
| <i>ch-id</i>        | Port-Channel name   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker pacl extended module

show consistency-checker pacl extended module { all | <module-id> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| pacl                | Verify pacl programming in the hardware                         |
| extended            | extended  |
| module              | Limit display to L2 interfaces on this module                   |
| all                 | To run cc across all the modules                                |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker pacl module

show consistency-checker pacl module <module>

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information               |
| consistency-checker | Consistency Checker                           |
| pacl                | Verify pacl programming in the hardware       |
| module              | Limit display to L2 interfaces on this module |
| <i>module</i>       | Enter module number                           |

## Command Mode

- /exec

# show consistency-checker pacl port-channels

show consistency-checker pacl port-channels [ interface <ch-id> ]

## Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information                        |
| consistency-checker | Consistency Checker                                    |
| pacl                | Verify pacl programming in the hardware                |
| port-channels       | Verifies port channel pacl programming in the hardware |
| interface           | (Optional) Port-channel number                         |
| <i>ch-id</i>        | (Optional) Port-Channel name                           |

## Command Mode

- /exec

# show consistency-checker port-state

show consistency-checker port-state [ { module <module> | interface <ifid> } ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| port-state          | Validates SI, MTU and IPG Settings                              |
| module              | (Optional) Limit display to interfaces on module                |
| <i>module</i>       | (Optional) Enter module number                                  |
| interface           | (Optional) Limit display to interface                           |
| <i>ifid</i>         | (Optional) Interface name                                       |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker port-state fabric-ieth

```
show consistency-checker port-state fabric-ieth [ module <module> [ ieth-port <ieth-port> ] ] [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| port-state          | Validates SI, FEC and MTU Settings                              |
| fabric-ieth         | Internal Fabric ports   |
| module              | (Optional) Limit display to interfaces on module                |
| <i>module</i>       | (Optional) Enter module number                                  |
| ieth-port           | (Optional) Enter ieth-port number                               |
| <i>ieth-port</i>    | (Optional) Enter ieth-port number                               |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker qinq

```
show consistency-checker qinq [ interface [ <int-id> | <ch-id> ] ]
```

## Syntax Description

|                     |                                 |
|---------------------|---------------------------------|
| show                | Show running system information |
| consistency-checker | Consistency Checker             |
| qinq                | QinQ consistency checker        |
| interface           | (Optional) Interface            |
| <i>int-id</i>       | (Optional) Eth Interface        |
| <i>ch-id</i>        | (Optional) Port-Channel         |

## Command Mode

- /exec

# show consistency-checker racl extended egress ip module

show consistency-checker racl extended egress ip module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| egress              | egress direction  |
| ip                  | ip protocol   |
| module              | Limit display to L3 interfaces on this module                   |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended egress ipv6 module

show consistency-checker racl extended egress ipv6 module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| egress              | egress direction  |
| ipv6                | ipv6 protocol   |
| module              | Limit display to L3 interfaces on this module                   |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended egress ip interface

show consistency-checker racl extended egress ip interface { <int-id> | <ch-id> | <vlan-id> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| egress              | egress direction  |
| ip                  | ip protocol   |
| interface           | Interface   |
| <i>int-id</i>       | Interface   |
| <i>ch-id</i>        | Port-Channel name   |
| <i>vlan-id</i>      | SVI VLAN  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended egress ipv6 interface

show consistency-checker racl extended egress ipv6 interface { <int-id> | <ch-id> | <vlan-id> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| egress              | egress direction  |
| ipv6                | ipv6 protocol   |
| interface           | Interface   |
| <i>int-id</i>       | Interface   |
| <i>ch-id</i>        | Port-Channel name   |
| <i>vlan-id</i>      | SVI VLAN  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended ingress ip module

show consistency-checker racl extended ingress ip module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ip                  | ip protocol   |
| module              | Limit display to L3 interfaces on this module                   |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended ingress ipv6 module

show consistency-checker racl extended ingress ipv6 module <module-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ipv6                | ipv6 protocol   |
| module              | Limit display to L3 interfaces on this module                   |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended ingress ip interface

```
show consistency-checker racl extended ingress ip interface { <int-id> | <ch-id> | <vlan-id> } [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ip                  | ip protocol   |
| interface           | Interface   |
| <i>int-id</i>       | Interface   |
| <i>ch-id</i>        | Port-Channel name   |
| <i>vlan-id</i>      | SVI VLAN  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended ingress ipv6 interface

```
show consistency-checker racl extended ingress ipv6 interface { <int-id> | <ch-id> | <vlan-id> } [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ipv6                | ipv6 protocol   |
| interface           | Interface   |
| <i>int-id</i>       | Interface   |
| <i>ch-id</i>        | Port-Channel name   |
| <i>vlan-id</i>      | SVI VLAN  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl extended module

show consistency-checker racl extended module { all | <module-id> } [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| racl                | Verify racl programming in the hardware                         |
| extended            | extended  |
| module              | Limit display to L3 interfaces on this module                   |
| all                 | To run CC across all the modules                                |
| <i>module-id</i>    | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker racl module

show consistency-checker racl module <module>

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information               |
| consistency-checker | Consistency Checker                           |
| racl                | Verify racl programming in the hardware       |
| module              | Limit display to L3 interfaces on this module |
| <i>module</i>       | Enter module number                           |

## Command Mode

- /exec

# show consistency-checker racl port-channels

show consistency-checker racl port-channels [ interface <ch-id> ]

## Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information                        |
| consistency-checker | Consistency Checker                                    |
| racl                | Verify racl programming in the hardware                |
| port-channels       | Verifies port channel racl programming in the hardware |
| interface           | (Optional) Port-channel number                         |
| <i>ch-id</i>        | (Optional) Port-Channel name                           |

## Command Mode

- /exec

# show consistency-checker racl svi interface

show consistency-checker racl svi interface <vlan-id>

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information               |
| consistency-checker | Consistency Checker                           |
| racl                | Verify racl programming in the hardware       |
| svi                 | Verifies SVI racl programming in the hardware |
| interface           | SVI number                                    |
| <i>vlan-id</i>      | SVI VLAN                                      |

## Command Mode

- /exec

## show consistency-checker segment-routing mpls

show consistency-checker segment-routing mpls { ip <ip-address> mask <ip-mask> vrf <vrf-name> | label <label> } [ brief | detail ]

### Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| segment-routing     | Segment-routing   |
| mpls                | MPLS Information  |
| ip                  | IP Information  |
| <i>ip-address</i>   | IP Address  |
| mask                | Mask Information  |
| <i>ip-mask</i>      | Mask Length   |
| vrf                 | VRF Information   |
| <i>vrf-name</i>     | VRF Name  |
| label               | Label Information   |
| <i>label</i>        | Label Name  |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

# show consistency-checker selective-qinq

show consistency-checker selective-qinq

## Syntax Description

|                     |                                    |
|---------------------|------------------------------------|
| show                | Show running system information    |
| consistency-checker | Consistency Checker                |
| selective-qinq      | Selective QinQ consistency checker |

## Command Mode

- /exec

# show consistency-checker selective-qinq interface

show consistency-checker selective-qinq interface { <int-id> | <ch-id> }

## Syntax Description

|                     |                                    |
|---------------------|------------------------------------|
| show                | Show running system information    |
| consistency-checker | Consistency Checker                |
| selective-qinq      | Selective QinQ consistency checker |
| interface           | Interface                          |
| <i>int-id</i>       | Interface                          |
| <i>ch-id</i>        | Port-Channel name                  |

## Command Mode

- /exec

# show consistency-checker sflow

show consistency-checker sflow [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| sflow               | Compares software and hardware sflow details                    |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker storm-control

show consistency-checker storm-control

## Syntax Description

|                     |                                   |
|---------------------|-----------------------------------|
| show                | Show running system information   |
| consistency-checker | Consistency Checker               |
| storm-control       | Storm control consistency checker |

## Command Mode

- /exec

# show consistency-checker stp-state vlan

```
show consistency-checker stp-state vlan <vlan> [ interface <int-id> ] [ brief | detail ]
```

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information   |
| vlan                | Verifies spanning tree state in the hardware for all interfaces in the vlan |
| <i>vlan</i>         | Enter vlan id   |
| interface           | (Optional) Interface  |
| <i>int-id</i>       | (Optional) Interface  |
| consistency-checker | Consistency Checker   |
| stp-state           | Verify spanning tree state in the hardware                                  |
| brief               | (Optional) Show consistency checker structured output in brief              |
| detail              | (Optional) Show consistency checker structured output in detail             |

## Command Mode

- /exec

# show consistency-checker vac1

show consistency-checker vac1

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information         |
| consistency-checker | Consistency Checker                     |
| vac1                | Verify vac1 programming in the hardware |

## Command Mode

- /exec

# show consistency-checker vacl extended ingress ipv6 vlan

show consistency-checker vacl extended ingress ipv6 vlan <vlan-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| vacl                | Verify vacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ipv6                | ipv6 protocol   |
| vlan                | VLAN  |
| <i>vlan-id</i>      | vlan number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vacl extended ingress ip vlan

show consistency-checker vacl extended ingress ip vlan <vlan-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| vacl                | Verify vacl programming in the hardware                         |
| extended            | extended  |
| ingress             | ingress direction   |
| ip                  | ip protocol   |
| vlan                | VLAN  |
| <i>vlan-id</i>      | vlan number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vACL extended ingress mac vlan

show consistency-checker vACL extended ingress mac vlan <vlan-id> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|

## Command Mode

- /exec

# show consistency-checker vpc

show consistency-checker vpc [ source-interface [ <int-id> | <ch-id> ] ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| vpc                 | vPC related information   |
| source-interface    | (Optional) Source vPC member                                    |
| <i>int-id</i>       | (Optional) Eth Interface  |
| <i>ch-id</i>        | (Optional) Port-Channel   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vpgrouping interface

show consistency-checker vpgrouping interface { <intf> | all }

## Syntax Description

|                     |                                       |
|---------------------|---------------------------------------|
| show                | Show running system information       |
| consistency-checker | Consistency Checker                   |
| vpgrouping          | Show VP Grouping Info                 |
| interface           | Show interface status and information |
| <i>intf</i>         | Physical or Logical Interface         |
| all                 | Display All Interfaces                |

## Command Mode

- /exec

# show consistency-checker vxlan config-check

show consistency-checker vxlan config-check [ verbose-mode ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| vxlan               | VxLAN consistency checker                                       |
| config-check        | Check the inconsistencies in the config                         |
| verbose-mode        | (Optional) config-check verbose                                 |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vxlan infra

show consistency-checker vxlan infra [ verbose-mode ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| vxlan               | VxLAN consistency checker                                       |
| consistency-checker | Consistency Checker   |
| infra               | infra   |
| verbose-mode        | (Optional) detailed CC output                                   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vxlan l2 mac-address module

show consistency-checker vxlan l2 mac-address <mac-addr> module <module> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| vxlan               | VxLAN consistency checker                                       |
| l2                  | l2  |
| mac-address         | MAC address   |
| <i>mac-addr</i>     | address   |
| module              | Module to run the consistency-checker on                        |
| <i>module</i>       | Module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vxlan l2 module

show consistency-checker vxlan l2 module <module> [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| vxlan               | VxLAN consistency checker                                       |
| l2                  | Check L2 inconsistencies  |
| module              | Module to run the consistency-checker on                        |
| <i>module</i>       | Enter module number   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

## show consistency-checker vxlan l3 single-route ipv4 vrf

```
show consistency-checker vxlan l3 single-route { ipv4 | ipv6 } <ip-prefix> vrf { <vrf-name> |
<vrf-known-name> } [ debug-logs ] [ brief | detail ]
```

### Syntax Description

|                       |   |
|-----------------------|---|
| show                  | Show running system information                                 |
| consistency-checker   | Consistency Checker   |
| vxlan                 | VxLAN consistency checker                                       |
| l3                    | l3  |
| single-route          | Run the consistency checker for a single route                  |
| ipv4                  | IPv4 address  |
| ipv6                  | IPv6 address  |
| <i>ip-prefix</i>      | Overlay L3 Route IP Address in prefix/mask format               |
| vrf                   | Do consistency check for vrf                                    |
| <i>vrf-name</i>       | VRF name  |
| <i>vrf-known-name</i> | Known VRF name  |
| debug-logs            | THIS KEYWORD OR VARIABLE IS NOT SUPPORTED                       |
| brief                 | (Optional) Show consistency checker structured output in brief  |
| detail                | (Optional) Show consistency checker structured output in detail |

### Command Mode

- /exec

## show consistency-checker vxlan l3 vrf start

```
show consistency-checker vxlan l3 vrf { <vrf-name> | all } { start-scan | report }
```

### Syntax Description

|                     |                                 |
|---------------------|---------------------------------|
| show                | Show running system information |
| vxlan               | VxLAN consistency checker       |
| consistency-checker | Consistency Checker             |
| l3                  | l3                              |
| vrf                 | VRF                             |
| <i>vrf-name</i>     | vrf name                        |
| all                 | All VRFs                        |
| start-scan          | Start Route CC                  |
| report              | Show Route CC report            |

### Command Mode

- /exec

# show consistency-checker vxlan mh mac-addresses

show consistency-checker vxlan mh mac-addresses [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| consistency-checker | Consistency Checker   |
| vxlan               | VxLAN consistency checker                                       |
| mh                  | VxLAN BGP EVPN Multi Homing CC commands                         |
| mac-addresses       | Check mac address consistency between L2RIB and L2FM            |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vxlan mh pathlist

show consistency-checker vxlan mh pathlist [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information   |
| consistency-checker | Consistency Checker   |
| vxlan               | VxLAN consistency checker   |
| mh                  | VxLAN BGP EVPN Multi Homing CC commands                                   |
| pathlist            | Check Vxlan BGP EVPN MH Control plane and resultant pathlists consistency |
| brief               | (Optional) Show consistency checker structured output in brief            |
| detail              | (Optional) Show consistency checker structured output in detail           |

## Command Mode

- /exec

# show consistency-checker vxlan pv

show consistency-checker vxlan pv

## Syntax Description

|                     |                                 |
|---------------------|---------------------------------|
| show                | Show running system information |
| consistency-checker | Consistency Checker             |
| vxlan               | VxLAN consistency checker       |
| pv                  | pv consistency checker          |

## Command Mode

- /exec

# show consistency-checker vxlan qinq-qinvni

show consistency-checker vxlan qinq-qinvni

## Syntax Description

|                     |                                 |
|---------------------|---------------------------------|
| show                | Show running system information |
| vxlan               | VxLAN consistency checker       |
| consistency-checker | Consistency Checker             |
| qinq-qinvni         | QinQ consistency checker        |

## Command Mode

- /exec

# show consistency-checker vxlan qinvni

show consistency-checker vxlan qinvni

## Syntax Description

|                     |                                 |
|---------------------|---------------------------------|
| show                | Show running system information |
| consistency-checker | Consistency Checker             |
| vxlan               | VxLAN consistency checker       |
| qinvni              | QinVNI consistency checker      |

## Command Mode

- /exec

# show consistency-checker vxlan selective-qinvni

show consistency-checker vxlan selective-qinvni

## Syntax Description

|                     |                                      |
|---------------------|--------------------------------------|
| show                | Show running system information      |
| consistency-checker | Consistency Checker                  |
| vxlan               | VxLAN consistency checker            |
| selective-qinvni    | Selective QinVNI consistency checker |

## Command Mode

- /exec

# show consistency-checker vxlan selective-qinvni interface

show consistency-checker vxlan selective-qinvni interface { <int-id> | <ch-id> }

## Syntax Description

|                     |                                      |
|---------------------|--------------------------------------|
| show                | Show running system information      |
| consistency-checker | Consistency Checker                  |
| vxlan               | VxLAN consistency checker            |
| selective-qinvni    | Selective QinVNI consistency checker |
| interface           | Interface                            |
| <i>int-id</i>       | Interface                            |
| <i>ch-id</i>        | Port-Channel name                    |

## Command Mode

- /exec

# show consistency-checker vxlan vlan

show consistency-checker vxlan vlan { <vlanid> | all } [ verbose-mode ] [ brief | detail ]

## Syntax Description

|                     |   |
|---------------------|---|
| show                | Show running system information                                 |
| vxlan               | VxLAN consistency checker                                       |
| vlan                | Verifies flood list programming for vxlan vlans                 |
| consistency-checker | Consistency Checker   |
| <i>vlanid</i>       | Enter vlan id   |
| all                 | Check CC for all vxlans   |
| verbose-mode        | (Optional) detailed CC output                                   |
| brief               | (Optional) Show consistency checker structured output in brief  |
| detail              | (Optional) Show consistency checker structured output in detail |

## Command Mode

- /exec

# show consistency-checker vxlan xconnect

show consistency-checker vxlan xconnect

## Syntax Description

|                     |                                   |
|---------------------|-----------------------------------|
| show                | Show running system information   |
| consistency-checker | Consistency Checker               |
| vxlan               | VxLAN consistency checker         |
| xconnect            | Cross-Connect consistency checker |

## Command Mode

- /exec

# show controller accounting log

show controller <ctrl-id> accounting log

## Syntax Description

|                |                                 |
|----------------|---------------------------------|
| show           | Show running system information |
| controller     | Controller command              |
| <i>ctrl-id</i> | Controller id value             |
| accounting     | Accounting                      |
| log            | Show log information            |

## Command Mode

- /exec

# show copp diff profile profile2

show copp diff profile <profile\_type> [ prior-ver ] profile2 <profile\_type2>

## Syntax Description

|                      |  |
|----------------------|--|
| show                 | Show running system information        |
| copp                 | Control-Plane Policing                 |
| diff                 | Difference between CoPP Profiles       |
| profile              | CoPP Profile                           |
| <i>profile_type</i>  | CoPP Profile Types                     |
| prior-ver            | (Optional) Previous Configured Version |
| profile2             | CoPP Profile                           |
| <i>profile_type2</i> | CoPP Profile Types                     |

## Command Mode

- /exec

|                       |                                      |
|-----------------------|--------------------------------------|
| <i>ip</i>             | (Optional) IP                        |
| <i>ipv6</i>           | (Optional) IPV6                      |
| <i>src_any</i>        | (Optional) SRCAny                    |
| <i>dest_any</i>       | (Optional) DESTAny                   |
| <i>src_ip_prefix</i>  | (Optional) Source IP prefix          |
| <i>src_ip_addr</i>    | (Optional) Source IP address         |
| <i>src_ip_mask</i>    | (Optional) Source IP mask            |
| <i>src_mac_addr</i>   | (Optional) Source MAC address        |
| <i>src_mac_mask</i>   | (Optional) Source MAC mask           |
| <i>src_mac_any</i>    | (Optional) SRCMACAny                 |
| <i>dest_ip_prefix</i> | (Optional) Destination IP prefix     |
| <i>dest_ip_addr</i>   | (Optional) Destination IP address    |
| <i>dest_ip_mask</i>   | (Optional) Destination IP mask       |
| <i>dest_mac_addr</i>  | (Optional) Destination MAC address   |
| <i>dest_mac_mask</i>  | (Optional) Destination MAC mask      |
| <i>dest_mac_any</i>   | (Optional) DESTMACAny                |
| <i>src_port_op</i>    | (Optional) Source Port operator      |
| <i>dest_port_op</i>   | (Optional) Destination Port operator |
| <i>src_port1_str</i>  | (Optional) Source port name          |
| <i>src_port1_num</i>  | (Optional) Source port number        |
| <i>src_port2_str</i>  | (Optional) Source port name          |
| <i>src_port2_num</i>  | (Optional) Source port number        |
| <i>dest_port1_str</i> | (Optional) Destination port name     |
| <i>dest_port1_num</i> | (Optional) Destination port number   |
| <i>dest_port2_str</i> | (Optional) Destination port name     |
| <i>dest_port2_num</i> | (Optional) Destination port number   |
| <i>icmp_type</i>      | (Optional) ICMP type                 |
| <i>icmp_code</i>      | (Optional) ICMP code                 |
| <i>icmp_str</i>       | (Optional) ICMP message              |

|                                    |  |
|------------------------------------|--|
| <i>icmpv6_type</i>                 | (Optional) ICMP type                             |
| <i>icmpv6_code</i>                 | (Optional) ICMP code                             |
| <i>icmpv6_str</i>                  | (Optional) ICMP message                          |

**Command Mode**

- /exec

## show copp status

```
show copp status [ __readonly__ { last_config_operation <last_cfg_oper> } { last_config_operation_time
<last_cfg_oper_time> } { last_config_operation_status <last_cfg_oper_status> } [
last_config_operation_error_time <last_cfg_oper_error_time> ] [ last_config_operation_error
<last_cfg_oper_error> ] { service_policy <srv_policy> } ]
```

### Syntax Description

|                                  |   |
|----------------------------------|---|
| show                             | Show running system information                       |
| copp                             | Control-Plane Policing                                |
| status                           | Show the internal status of CoPP                      |
| <i>__readonly__</i>              | (Optional)  |
| last_config_operation            | (Optional) last config operation                      |
| <i>last_cfg_oper</i>             | (Optional) last config operation                      |
| last_config_operation_time       | (Optional) timestamp of last config operation         |
| <i>last_cfg_oper_time</i>        | (Optional) timestamp of last config operation         |
| last_config_operation_status     | (Optional) status of last config operation            |
| <i>last_cfg_oper_status</i>      | (Optional) status of last config operation            |
| last_config_operation_error_time | (Optional) timestamp of last config operation's error |
| <i>last_cfg_oper_error_time</i>  | (Optional) timestamp of last config operation's error |
| last_config_operation_error      | (Optional) last config operation's error              |
| <i>last_cfg_oper_error</i>       | (Optional) last config operation's error              |
| service_policy                   | (Optional) policy-map attached to control-plane       |
| <i>srv_policy</i>                | (Optional) policy-map attached to control-plane       |

### Command Mode

- /exec

# show copyright

show copyright [ *\_\_readonly\_\_* { <content> } ]

## Syntax Description

|                     |                                  |
|---------------------|----------------------------------|
| show                | Show running system information  |
| copyright           | Copyright information            |
| <i>__readonly__</i> | (Optional)                       |
| <i>content</i>      | (Optional) Copyright information |

## Command Mode

- /exec

# show cores

```
show cores [ vdc-all | { vdc [ <e-vdc2> | <vdc-id> ] } ] [ __readonly__ { [ TABLE_cores <vdc_id>
<module_id> <instance> <process_name> <pid> <sys_time> ] } ]
```

## Syntax Description

|                     |  |
|---------------------|--|
| show                | Show running system information            |
| cores               | show all core dumps for the current vdc    |
| vdc-all             | (Optional) show core dumps from all vdes   |
| vdc                 | (Optional) show all core dumps for the vdc |
| __readonly__        | (Optional)                                 |
| TABLE_cores         | (Optional)                                 |
| <i>vdc_id</i>       | (Optional) vdc id                          |
| <i>module_id</i>    | (Optional) module id                       |
| <i>instance</i>     | (Optional) instance number                 |
| <i>process_name</i> | (Optional) name of the process             |
| <i>pid</i>          | (Optional) process id                      |
| <i>sys_time</i>     | (Optional) core generate time              |
| <i>e-vdc2</i>       | (Optional) Enter VDC <vdc-id>              |
| <i>vdc-id</i>       | (Optional) vdc number                      |

## Command Mode

- /exec

# show crypto ca certificates

```
show crypto ca certificates [ __readonly__ [ { TABLE_ca_certificates <trustpoint> [ <certificate> ] [ {
TABLE_ca_cert_chains <index> <ca_certificate> } ] } ] ]
```

## Syntax Description

|                              |  |
|------------------------------|--|
| show                         | Show running system information              |
| crypto                       | show crypto configuration                    |

| __readonly__             | (Optional)                             |
| <i>trustpoint</i>        | (Optional) Trustpoint                  |
| <i>key-pair</i>          | (Optional) Key pair                    |
| TABLE_revocation_methods | (Optional) Table of revocation methods |
| <i>revocation-method</i> | (Optional) Revocation mehtod           |
| <i>ocsp-url</i>          | (Optional) OCSP URL                    |
| TABLE_ca_truspoints      | (Optional) Table of CA trustpoints     |

## Command Mode

- /exec

# show crypto ca trustpool

```
show crypto ca trustpool [ __readonly__ [ { TABLE_ca_trustpool <serial-number> <subject> <issued-by>
<validity-start> <validity-end> } ] ]
```

## Syntax Description

|                           |                                  |
|---------------------------|----------------------------------|
| show                      | Show running system information  |
| crypto                    | show crypto information          |
| ca                        | show trustpool data              |
| trustpool                 | trustpool contents               |
| <i>__readonly__</i>       | (Optional)                       |
| <i>TABLE_ca_trustpool</i> | (Optional) Table of CA trustpool |
| <i>serial-number</i>      | (Optional) Serial number         |
| <i>subject</i>            | (Optional) subject               |
| <i>issued-by</i>          | (Optional) Issued by             |
| <i>validity-start</i>     | (Optional) validity start date   |
| <i>validity-end</i>       | (Optional) validity end date     |

## Command Mode

- /exec

## show crypto ca trustpool last download status

```
show crypto ca trustpool last download status [ __readonly__ [ http_url <http_url> ] [ download_time
<download_time> ] [ trustpool_download_status <status> ] [ download_failure <reason> ] ]
```

### Syntax Description

|                           |  |
|---------------------------|--|
| show                      | Show running system information                |
| crypto                    | show crypto information                        |
| ca                        | show trustpool data                            |
| trustpool                 | trustpool data                                 |
| last                      | last trustpool download status                 |
| download                  | download of trustpool                          |
| status                    | download status                                |
| <i>__readonly__</i>       | (Optional)                                     |
| http_url                  | (Optional) http url configured                 |
| <i>http_url</i>           | (Optional) HTTP url                            |
| download_time             | (Optional) Download time                       |
| <i>download_time</i>      | (Optional) Download time                       |
| trustpool_download_status | (Optional) Status of trustpool policy download |
| <i>status</i>             | (Optional) Download status                     |
| download_failure          | (Optional) Download failure                    |
| <i>reason</i>             | (Optional) Download failure reason             |

### Command Mode

- /exec

# show crypto ca trustpool policy

```
show crypto ca trustpool policy [ __readonly__ [ http_url <http_url> ] [ config_vrf [ <config_vrf> ] [ <src_intf>
] ] [ proxy_server [ <proxy_server> ] [ <proxy_server_port> ] ] ]
```

## Syntax Description

|                          |   |
|--------------------------|---|
| show                     | Show running system information           |
| crypto                   | show crypto information                   |
| ca                       | show Certificate authority related config |
| trustpool                | show trustpool policy                     |
| policy                   | trustpool configuration                   |
| <i>__readonly__</i>      | (Optional)                                |
| http_url                 | (Optional) http url configured            |
| <i>http_url</i>          | (Optional) HTTP url                       |
| config_vrf               | (Optional) Configured vrf                 |
| <i>config_vrf</i>        | (Optional) vrf configured                 |
| <i>src_intf</i>          | (Optional) source interface for vrf       |
| proxy_server             | (Optional) Configured proxy server        |
| <i>proxy_server</i>      | (Optional) proxy server                   |
| <i>proxy_server_port</i> | (Optional) proxy server port              |

## Command Mode

- /exec

# show crypto certificatemap

```
show crypto certificatemap [ __readonly__ [ { TABLE_certmap <map_name> <subject_name>
<alternate_email> <alternate_upn> } ] ]
```

## Syntax Description

|                        |                                     |
|------------------------|-------------------------------------|
| show                   | Show running system information     |
| crypto                 | show crypto configuration           |
| certificatemap         | show certificatemap filters         |
| <i>__readonly__</i>    | (Optional)                          |
| <i>TABLE_certmap</i>   | (Optional) Table of Certificate Map |
| <i>map_name</i>        | (Optional) Map name                 |
| <i>subject_name</i>    | (Optional) Subject name             |
| <i>alternate_email</i> | (Optional) Alternate Email          |
| <i>alternate_upn</i>   | (Optional) Alternate UPN            |

## Command Mode

- /exec

## show crypto key mypubkey rsa

```
show crypto key mypubkey rsa [ __readonly__ [ { TABLE_rsa_keys <key_label> <key_size> <exportable>
<err_string> } ] ]
```

### Syntax Description

|                       |                                       |
|-----------------------|---------------------------------------|
| show                  | Show running system information       |
| crypto                | show crypto configuration             |
| key                   | show key configuration                |
| mypubkey              | show my public keys configuration     |
| rsa                   | show my rsa public keys configuration |
| <i>__readonly__</i>   | (Optional)                            |
| <i>TABLE_rsa_keys</i> | (Optional) Table of RSA keys          |
| <i>key_label</i>      | (Optional) Key Label                  |
| <i>key_size</i>       | (Optional) Key size                   |
| <i>exportable</i>     | (Optional) Exportable                 |
| <i>err_string</i>     | (Optional) Error String               |

### Command Mode

- /exec

# show crypto ssh-auth-map

```
show crypto ssh-auth-map [ __readonly__ [ { TABLE_ssh_auth_map <issuer_name> <map1> [ <map2> ] } ] ]
```

## Syntax Description

|                    |   |
|--------------------|---|
| show               | Show running system information                     |
| crypto             | show crypto configuration                           |
| ssh-auth-map       | show mapping filters applied for ssh authentication |
| __readonly__       | (Optional)  |
| TABLE_ssh_auth_map | (Optional) Table of SSH Auth MAP                    |
| <i>issuer_name</i> | (Optional) Issuer Name                              |
| <i>map1</i>        | (Optional) Map 1                                    |
| <i>map2</i>        | (Optional) Map 2                                    |

## Command Mode

- /exec

# show cts

```
show cts [ __readonly__ <device-id> <cache_en> <num-dot1x> <num-man> <sgt> ]
```

## Syntax Description

|                           |  |
|---------------------------|--|
| <code>cts</code>          | Show CTS global configuration                  |
| <code>__readonly__</code> | (Optional)                                     |
| <code>device-id</code>    | (Optional) name                                |
| <code>cache_en</code>     | (Optional) enable/disable                      |
| <code>num-dot1x</code>    | (Optional) number of interfaces in dot1x mode  |
| <code>num-man</code>      | (Optional) number of interfaces in manual mode |
| <code>sgt</code>          | (Optional)                                     |

## Command Mode

- /exec

# show current

show current

## Syntax Description

|         |  |
|---------|--|
| show    | Display region configurations            |
| current | Display mst configuration currently used |

## Command Mode

- /exec/configure/spanning-tree/mst/configuration
