Cisco Bug Search Tool

Bug Search Tool (BST), the online successor to Bug Toolkit, is designed to improve our customers' effectiveness in network risk management and device troubleshooting.

BST allows partners and customers to search for software bugs based on product, release, and keyword, and it aggregates key data such as bug details, product, and version.

Visit [Bug Search Tools & Resources](#) on Cisco.com. For details on the tool overview and functionalities, visit the help page at <http://www.cisco.com/web/applicat/cbsshelp/help.html>.
