

# Preface

---

**Revised: July 25, 2017**

This guide describes how to use Cisco Secure Access Control System (ACS) 5.8.1.

## Audience

This guide is for security administrators who use ACS, and who set up and maintain network and application security.

## Document Conventions

This guide uses the convention whereby the symbol **^** represents the key labeled *Control*. For example, the key combination **^z** means hold down the **Control** key while you press the **z** key.

Command descriptions use these conventions:

- Examples that contain system prompts denote interactive sessions, indicating the commands that you should enter at the prompt. The system prompt indicates the current level of the EXEC command interpreter. For example, the prompt `Router>` indicates that you should be at the *user* level, and the prompt `Router#` indicates that you should be at the *privileged* level. Access to the privileged level usually requires a password.
- Commands and keywords are in **boldface** font.
- Arguments for which you supply values are in *italic* font.
- Elements in square brackets (`[ ]`) are optional.
- Alternative keywords of which you must choose one are grouped in braces (`{ }`) and separated by vertical bars (`|`).

Examples use these conventions:

- Terminal sessions and sample console screen displays are in *screen* font.
- Information you enter is in **boldface screen** font.
- Nonprinting characters, such as passwords, are in angle brackets (`< >`).
- Default responses to system prompts are in square brackets (`[ ]`).
- An exclamation point (!) at the beginning of a line indicates a comment line.

Caution

Means *reader be careful*. You are capable of doing something that might result in equipment damage or loss of data.

Note

Means *the described action saves time*. You can save time by performing the action described in the paragraph.

Note

Means *reader take note*. Notes identify important information that you should reflect upon before continuing, contain helpful suggestions, or provide references to materials not contained in the document.

## Documentation Updates
