

New and Changed Information

As of Cisco MDS NX-OS Release 4.2(1), software configuration information is available in new feature-specific configuration guides for the following information:

- System management
- Interfaces
- Fabric
- Quality of service
- Security
- IP services
- High availability and redundancy

The information in these new guides previously existed in the *Cisco MDS 9000 Family CLI Configuration Guide* and in the *Cisco MDS 9000 Family Fabric Manager Configuration Guide*. Those configuration guides remain available on Cisco.com and should be used for all software releases prior to MDS NX-OS Release 4.2(1). Each guide addresses the features introduced in or available in a particular release. Select and view the configuration guide that pertains to the software installed in your switch.

Some information from the *Cisco MDS 9000 Family CLI Configuration Guide* and the *Cisco MDS 9000 Family Fabric Manager Configuration Guide* now appears in the following guides that are common among products that run the Nexus operating system:

- *Cisco NX-OS Family Licensing Guide* – Explains the licensing model and describes the feature licenses.
- *Cisco NX-OS Fundamentals Configuration Guide* – Describes the switch setup utility and includes general CLI, file system, and configuration information.

For a complete list of document titles, see the list of Related Documentation in the “Preface.”

To find additional information about Cisco MDS NX-OS Release 4.2(x), see the *Cisco MDS 9000 Family Release Notes* available at the following Cisco Systems website:

http://www.cisco.com/en/US/products/ps5989/prod_release_notes_list.htm

About this Guide

The information in the new *Cisco Fabric Manager System Management Configuration Guide* previously existed in the following parts of the *Cisco MDS 9000 Family Fabric Manager Configuration Guide*:

- Part 2: Installation and Switch Management
- Part 5: Security

[Send documentation comments to fm-docfeedback@cisco.com](mailto:fm-docfeedback@cisco.com)

- Part 8: Network and Switch Monitoring
- Part 9: Troubleshooting

[Table 1](#) lists the New and Changed features for this guide, starting with MDS NX-OS Release 4.2(1).

Table 1 *New and Changed Features for Cisco MDS NX-OS Release 4.2(x)*

Feature	New or Changed Topics	Changed in Release	Where Documented
Call Home Destination tab	Added the enhancement in Destination tab.	4.2(1)	Chapter 4, “Configuring Call Home”
