New and Changed Information

The following table provides an overview of the significant changes made to this configuration guide. The table does not provide an exhaustive list of all changes made to this guide or all new features in a particular release.

Feature	Description	Added or Changed in Release	Where Documented
Traffic Storm Control	Added support for aggregation mode on traffic storm control.	6.0(2)A8(1)	Information About Traffic Storm Control
MAC Address Tables	Added support for configuring MAC move loop detection.	6.0(2)A8(1)	Configuring MAC Move Loop Detection
PVLAN Support	Support for configuring private VLANs.	6.0(2)A7(1)	Information About Private VLANs
Flex Links	Flex Links are a pair of a Layer 2 interfaces (switch ports or port channels) where one interface is configured to act as a backup to the other. The feature provides an alternative solution to the Spanning Tree Protocol (STP).	6.0(2)A3(1)	Configuring Flex Links
