INDEX

A

adapter FEX
- information about 2-1

C

configuration example
- adapter-FEX initialization with active-standby uplinks in vPC topology 2-13

configuration examples
- active-standby server network adapter topology 2-13
- adapter-FEX initialization with active-standby uplinks dual-homed FEXs 2-14
- adapter-FEX on the adapter 2-10
- adapter-FEX on the device 2-8
- dual-homed FEX topology 2-12
- initializing the network adapter 2-11
- vNICs on the adapter 2-10

configuring
- virtual Ethernet interfaces 2-15

I

interfaces
- virtual Ethernet 2-2

P

platforms
- supported 2-2

S

supported platforms 2-2

T

topologies
- active-standby 2-5
- dual-homed 2-4
- whith Cisco Nexus 2000 Series Fabric Extenders 2-4
- with Cisco Nexus 5000 Series switches 2-3

troubleshooting
- configuration conflicts 2-16
- port profiles 2-7
- relocating a server network adapter to a different server 2-8
- relocating a server to a different physical interface 2-6
- removing a server with a server network adapter 2-6

V

virtual Ethernet Interfaces
- creating manually 2-16

virtual Ethernet interfaces 2-2
- creating automatically 2-15

virtual Ethernet interfaces, configuring 2-15

vNICs
- channel numbers 2-2
