E

Etherchannel 1-1

F

Fabric Extender (FEX)
pre-provisioning 1-2
FEX
configuring a FEX in an A/A topology 1-14
how to provision 1-29
straight-through topology 1-20

G

Gigabit Expansion Module (GEM)
pre-provisioning 1-2

I

import
abort 1-9
configuration changes during 1-9
methods 1-18, 1-24
importing switch profile commands
about 1-9
initiator switch 1-8

M

merge checks 1-8
mgmt0 interface 1-4
lost connectivity 1-31
mutual exclusion check
about 1-7
command exceptions 1-7
failure 1-7

P

peer keepalive
configuring 1-11
peer switch
running configuration in a vPC topology 1-11
running configuration of FEX in A/A topology 1-14
policies
synchronizing 1-22
port channel members
peer switch requirements 1-23
port-profiles 1-9
pre-provisioning 1-9
FEX in dual-homed topology 1-17
offline interfaces 1-16, 1-23

R

Role Based Access Control (RBAC)
switch profile requirements 1-6

S

straight-through topology
diagram 1-20
switch profile
configuration modes 1-33
definition 1-33
switch profiles 1-1
about 1-5
commands
not supported 1-6
supported 1-6
commit
requirements 1-7
copying commands to 1-9
creating 1-5
limit 1-6
naming 1-6
