## New and Changed Information

---

This chapter provides release-specific information for each new and changed feature in the *Cisco Nexus 7000 Series NX-OS Security Command Reference*. The latest version of this document is available at the following Cisco website:

<http://www.cisco.com/c/en/us/support/switches/nexus-7000-series-switches/products-command-reference-list.html>

To check for additional information about this Cisco NX-OS Release, see the Cisco NX-OS Release Notes available at the following Cisco website:

<http://www.cisco.com/c/en/us/support/switches/nexus-7000-series-switches/products-release-notes-list.html>

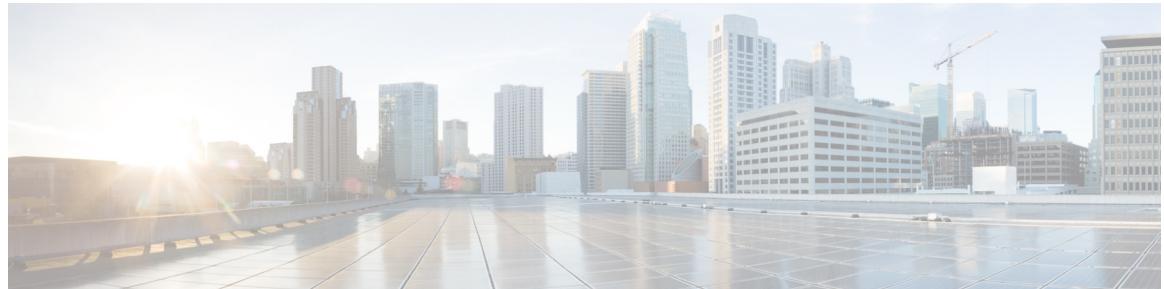

The following table summarizes the new and changed features for the *Cisco Nexus 7000 Series NX-OS Security Command Reference* and tells you where they are documented.

**Table 1**      **New and Changed Information**

Feature	Description	Changed in Release
FEX	Added the <b>hardware qos dscp-to-queue ingress module-type</b> command.	6.2(2)
	Added the <b>hardware queue-limit</b> command.	6.2(2)
	Added the <b>show hardware qos dscp-to-queue ingress</b> command.	6.2(2)
	Updated the <b>show queuing interface</b> command.	6.2(2)
	Updated the <b>type</b> command.	6.2(2)
	Added the <b>port-channel min-links</b> command.	6.1(3)
	Changed the <b>show port-channel summary</b> command output.	6.1(3)
	Added the <b>port-channel min-links 3</b> to the <b>show running-config</b> output for the port channel.	6.1(3)
	Support for FEX <b>2232TM</b> and <b>2248TPE</b> was introduced.	6.1(1)
	Support for FEX <b>2224TP</b> and <b>2232P</b> was introduced.	5.2(1)
	Added the <b>attach fex</b> command.	5.1(1)

**Table 1** New and Changed Information

Feature	Description	Changed in Release
	Added the <b>description</b> command.	5.1(1)
	Added the <b>feature-set fex</b> command.	5.1(1)
	Added the <b>fex</b> command.	5.1(1)
	Added the <b>fex associate</b> command.	5.1(1)
	Added the <b>install feature-set fex</b> command.	5.1(1)
	Added the <b>reload fex</b> command.	5.1(1)
	Added the <b>serial</b> command.	5.1(1)
	Added the <b>switchport mode fex-fabric</b> command.	5.1(1)
	Added the <b>show environment fex</b> command.	5.1(1)
	Added the <b>show fex</b> command.	5.1(1)
	Added the <b>show fex detail</b> command.	5.1(1)
	Added the <b>show fex transceiver</b> command.	5.1(1)
	Added the <b>show fex version</b> command.	5.1(1)
	Added the <b>show running-config fex</b> command.	5.1(1)
	Added the <b>show sprom fex</b> command.	5.1(1)
	Added the <b>show tech fex all</b> command.	5.1(1)
	Added the <b>show tech-support fex</b> command.	5.1(1)
	Added the <b>show inventory fex</b> command.	4.2(1)
	Added the <b>show version fex</b> command.	4.2(1)
	Added the <b>type</b> command.	4.2(1)
	Added the <b>show system reset-reason fex</b> command.	4.2(1)
	Added the <b>show interface transceiver fex-fabric</b> command.	4.0(1a)
	Added the <b>logging fex</b> command.	4.0(1a)
	Added the <b>pinning max-links</b> command.	4.0(1a)
	Added the <b>beacon</b> command.	4.0(1a)

# Preface

---

This preface describes the audience, organization, and conventions of the *Cisco Nexus 7000 Series NX-OS Fabric Extender Command Reference* and how to obtain related documentation.

This chapter includes the following sections:

- [Audience, page 5](#)
- [Organization, page 5](#)
- [Document Conventions, page 5](#)
- [Related Documentation, page 6](#)
- [Documentation Feedback, page 8](#)
- [Obtaining Documentation and Submitting a Service Request, page 8](#)

## Audience

This publication is for experienced users who configure and maintain Cisco NX-OS devices.

## Organization

This reference is organized as follows:

Chapter and Title	Description
<a href="#">FEX Commands</a>	Describes the Cisco NX-OS Fabric Extender commands.

## Document Conventions

Command descriptions use these conventions:

Convention	Description
<b>boldface font</b>	Commands and keywords are in boldface.
<i>italic font</i>	Arguments for which you supply values are in italics.

[ ]	Elements in square brackets are optional.
[ x   y   z ]	Optional alternative keywords are grouped in brackets and separated by vertical bars.
string	A nonquoted set of characters. Do not use quotation marks around the string or the string will include the quotation marks.

Screen examples use these conventions:

screen font	Terminal sessions and information that the switch displays are in screen font.
<b>boldface screen font</b>	Information you must enter is in boldface screen font.
<i>italic screen font</i>	Arguments for which you supply values are in italic screen font.
< >	Nonprinting characters, such as passwords, are in angle brackets.
[ ]	Default responses to system prompts are in square brackets.
!, #	An exclamation point (!) or a pound sign (#) at the beginning of a line of code indicates a comment line.

This document uses the following conventions:

**Note**

Means reader *take note*. Notes contain helpful suggestions or references to material not covered in the manual.

**Caution**

Means reader *be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

**Tip**

Means *the following information will help you solve a problem*.

## Documentation Feedback

To provide technical feedback on this document, or to report an error or omission, please send your comments to [nexus7k-docfeedback@cisco.com](mailto:nexus7k-docfeedback@cisco.com). We appreciate your feedback.

## Obtaining Documentation and Submitting a Service Request

For information on obtaining documentation, using the Cisco Bug Search Tool (BST), submitting a service request, and gathering additional information, see [What's New in Cisco Product Documentation](#).

To receive new and revised Cisco technical content directly to your desktop, you can subscribe to the [What's New in Cisco Product Documentation RSS feed](#). The RSS feeds are a free service.

## FEX Commands

---

This chapter describes the Cisco NX-OS Fabric Extender (FEX) commands for the Cisco Nexus 7000 Series devices.

**attach fex**

# attach fex

To access the command-line interface (CLI) of a connected Fabric Extender (FEX) to run diagnostic commands, use the **attach fex** command.

**attach fex *chassis\_id***

<b>Syntax Description</b>	<i>chassis_id</i>	Fabric Extender chassis ID. The chassis ID range is from 101 to 199.
---------------------------	-------------------	--

<b>Command Default</b>	None
------------------------	------

<b>Command Modes</b>	EXEC mode
----------------------	-----------

<b>SupportedUserRoles</b>	network-admin vdc-admin
---------------------------	----------------------------

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	5.1(1)	This command was introduced.

<b>Usage Guidelines</b>	Use the <b>attach fex</b> command to access the CLI on a connected Fabric Extender and perform diagnostic commands. We recommend that you use this command only by following the directions from Cisco technical support personnel.
-------------------------	---

This command does not require a license.

<b>Examples</b>	This example shows how to access the CLI of a connected Fabric Extender to run diagnostic commands:
-----------------	---

```
switch# attach fex 101
Attaching to FEX 101 ...
To exit type 'exit', to abort type '$.'.
Bad terminal type: "ansi". Will assume vt100.
fex-101#
```

<b>Related Commands</b>	<b>Command</b>	<b>Description</b>
	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

# beacon

To enable the beacon mode for an Fabric Extender (FEX) interface, use the **beacon** command. To disable the beacon mode for an interface, use the **no** form of this command.

**beacon**

**no beacon**

---

<b>Syntax Description</b>	This command has no arguments or keywords.
---------------------------	--

---

<b>Command Default</b>	Disabled
------------------------	----------

---

<b>Command Modes</b>	Interface configuration mode
----------------------	------------------------------

---

<b>SupportedUserRoles</b>	network-admin vdc-admin
---------------------------	----------------------------

---

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	4.0	This command was introduced.

---

<b>Usage Guidelines</b>	The beacon mode allows you to identify a physical port by flashing its link-state LED with a green light. To identify the physical port for an interface, you activate the beacon parameter for the interface.
	This command does not require a license.

---

<b>Examples</b>	This example shows how to enable the beacon mode for the Ethernet port 3/1:
<pre>switch(config)# interface ethernet 3/1 switch(config-if)# beacon switch(config-if)#</pre>	

---

<b>Related Commands</b>	<b>Command</b>	<b>Description</b>
	<b>fex</b>	Creates a Fabric Extender and enters fabric extender configuration mode.
	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

**■ description (fex)**

# description (fex)

To specify a description for a Fabric Extender (FEX), use the **description** command. To revert to the default description, use the **no** form of this command.

**description** *description*

**no description**

<b>Syntax Description</b>	<i>description</i>	Description of a Fabric Extender. The default is the string FEXxxxx where xxxx is the chassis ID. For example, if the chassis ID is 123, the default description is FEX0123. The maximum length is 20 alphanumeric characters.
---------------------------	--------------------	--

<b>Command Default</b>	None
------------------------	------

<b>Command Modes</b>	Fabric extender configuration mode
----------------------	------------------------------------

<b>SupportedUserRoles</b>	network-admin vdc-admin
---------------------------	----------------------------

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	5.1(1)	This command was introduced.

<b>Usage Guidelines</b>	This command does not require a license.
-------------------------	--

<b>Examples</b>	This example shows how to specify a description for a Fabric Extender:
	<pre>switch# configure terminal switch(config)# fex 101 switch(config-fex)# description Rack16_FEX101</pre>

This example shows how to revert to the default description for a Fabric Extender:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# no description
```

**Related Commands**

Command	Description
<b>fex</b>	Creates a Fabric Extender and enters fabric extender configuration mode.
<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

**feature-set fex**

# feature-set fex

To enable the Fabric Extender (FEX) feature set, use the **feature-set fex** command.

**feature-set fex**

**Syntax Description** This command has no arguments or keywords.

**Defaults** None

**Command Modes** Global configuration mode

**SupportedUserRoles** network-admin  
vdc-admin

Command History	Release	Modification
	5.1(1)	This command was introduced.

**Usage Guidelines** This command does not require a license.

**Examples** This example shows how to enable a FEX feature set:

```
switch(config)# feature-set fex
switch(config)#
```

Related Commands	Command	Description
	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

# fex

To create a Fabric Extender and enter fabric extender configuration mode, use the **fex** command. To delete the Fabric Extender configuration, use the **no** form of this command.

**fex chassis\_id**

**no fex chassis\_id**

<b>Syntax Description</b>	<i>chassis_id</i> Fabric Extender chassis ID. The chassis ID range is from 101 to 199.				
<b>Command Default</b>	None				
<b>Command Modes</b>	Global configuration mode				
<b>SupportedUserRoles</b>	network-admin vdc-admin				
<b>Command History</b>	<table border="1"> <thead> <tr> <th><b>Release</b></th><th><b>Modification</b></th></tr> </thead> <tbody> <tr> <td>5.1(1)</td><td>This command was introduced.</td></tr> </tbody> </table>	<b>Release</b>	<b>Modification</b>	5.1(1)	This command was introduced.
<b>Release</b>	<b>Modification</b>				
5.1(1)	This command was introduced.				
<b>Usage Guidelines</b>	You must create and configure the Fabric Extender before you connect and associate it to an interface on the parent switch. Once you associate the Fabric Extender to the switch, the configuration that you created is transferred over to the Fabric Extender and applied.				
<b>Examples</b>	<p>This example shows how to enter fabric extender configuration mode:</p> <pre>switch# configure terminal switch(config)# fex 101 switch(config-fex)# </pre> <p>This example shows how to delete the Fabric Extender configuration:</p> <pre>switch(config-fex)# switch(config)# </pre>				
<b>Related Commands</b>	<table border="1"> <thead> <tr> <th><b>Command</b></th><th><b>Description</b></th></tr> </thead> <tbody> <tr> <td><b>show fex</b></td><td>Displays all configured Fabric Extender chassis connected to the switch.</td></tr> </tbody> </table>	<b>Command</b>	<b>Description</b>	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.
<b>Command</b>	<b>Description</b>				
<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.				

# fex associate

To associate a Fabric Extender (FEX) to a fabric interface, use the **fex associate** command. To disassociate the Fabric Extender, use the **no** form of this command.

**fex associate *chassis\_id***

**no fex associate [*chassis\_id*]**

<b>Syntax Description</b>	<i>chassis_id</i> Fabric Extender chassis ID. The chassis ID range is from 101 to 199.						
<b>Command Default</b>	None						
<b>Command Modes</b>	Interface configuration mode						
<b>SupportedUserRoles</b>	network-admin vdc-admin						
<b>Command History</b>	<table border="1"> <thead> <tr> <th><b>Release</b></th><th><b>Modification</b></th></tr> </thead> <tbody> <tr> <td>5.1(1)</td><td>This command was introduced.</td></tr> </tbody> </table>	<b>Release</b>	<b>Modification</b>	5.1(1)	This command was introduced.		
<b>Release</b>	<b>Modification</b>						
5.1(1)	This command was introduced.						
<b>Usage Guidelines</b>	<p>Before you can associate an interface on the parent switch to the Fabric Extender, you must first make the interface into a fabric interface by entering the <b>switchport mode fex-fabric</b> command.</p> <p>This command does not require a license.</p>						
<b>Examples</b>	<p>This example shows how to associate the Fabric Extender to an EtherChannel interface:</p> <pre>switch# configure terminal switch(config)# interface port-channel 4 switch(config-if)# switchport mode fex-fabric switch(config-if)# fex associate 101</pre>						
<b>Related Commands</b>	<table border="1"> <thead> <tr> <th><b>Command</b></th><th><b>Description</b></th></tr> </thead> <tbody> <tr> <td><b>show fex</b></td><td>Displays all configured Fabric Extender chassis connected to the switch.</td></tr> <tr> <td><b>switchport mode fex-fabric</b></td><td>Sets the interface to be an uplink port.</td></tr> </tbody> </table>	<b>Command</b>	<b>Description</b>	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.	<b>switchport mode fex-fabric</b>	Sets the interface to be an uplink port.
<b>Command</b>	<b>Description</b>						
<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.						
<b>switchport mode fex-fabric</b>	Sets the interface to be an uplink port.						

# hardware qos dscp-to-queue ingress module-type

To enable the DSCP2Q mapping for the Fabric Extender (FEX) host interface and FEX fabric interface, use the **hardware qos dscp-to-queue ingress module-type** command. To disable DSCP2Q mapping for the FEX host interface and FEX fabric interface use the **no** form of this command.

**hardware qos dscp-to-queue ingress module-type [all | f-series | m-series]**

**no hardware qos dscp-to-queue ingress**

<b>Syntax Description</b>	<b>all</b> (Optional) Enables the DSCP based queuing for all cards. <b>f-series</b> (Optional) Enables the DSCP based queuing for F Series modules. <b>m-series</b> (Optional) Enables the DSCP based queuing for M Series modules.
---------------------------	---

<b>Command Default</b>	None
------------------------	------

<b>Command Modes</b>	FEX configuration mode
----------------------	------------------------

<b>SupportedUserRoles</b>	network-admin vdc-admin
---------------------------	----------------------------

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	6.2(2)	This command was introduced.

<b>Usage Guidelines</b>	This command does not require a license.
-------------------------	--

<b>Examples</b>	This example shows how to enable the DSCP2Q for all the FEX host interface:
-----------------	---

```
switch# configure terminal
switch(config)# hardware qos dscp-to-queue ingress module-type all
switch(config)#

```

This example shows how to enable the DSCP2Q for the F Series module:

```
switch# configure terminal
switch(config)# hardware qos dscp-to-queue ingress module-type f-series
switch(config)#

```

This example shows how to disable the DSCP2Q for the FEX host interface:

```
switch# configure terminal
switch(config)# no hardware qos dscp-to-queue ingress
switch(config)#

```

hardware qos dscp-to-queue ingress module-type

Related Commands	Command	Description
	<b>show hardware qos dscp-to-queue ingress</b>	Displays the DHCP-to-queue enable/disable status for various module types on a device.
	<b>show queueing interface</b>	Displays the DHCP-to-queue enable/disable status and corresponding DHCP-to-queue mappings on a FEX.

# **hardware queue-limit**

To configure the queue limit for a Fabric Extender (FEX), use the **hardware queue-limit** command. To disable the queue limit for a FEX, use the **no** form of this command.

**hardware [fex-type] queue-limit [queue-limit]**

**no hardware [fex-type] queue-limit [queue-limit]**

<b>Syntax Description</b>	<p><i>fex-type</i></p> <p>(Optional) Fabric Extender card type. The following Fabric Extender card types are supported:</p> <ul style="list-style-type: none"> <li>• B22HP Fabric Extender 16x10G SFP+ 8x10G SFP+ Module</li> <li>• N2224TP Fabric Extender 24x1G 2x10G SFP+ Module</li> <li>• N2232P Fabric Extender 32x10G SFP+ 8x10G SFP+ Module</li> <li>• N2232TM Fabric Extender 32x10GBASE-T 8x10G SFP+ Module</li> <li>• N2232TM-E Fabric Extender 32x10GBASE-T 8x10G SFP+ Module</li> <li>• N2248T Fabric Extender 48x1G 4x10G SFP+ Module</li> <li>• N2248TP-E Fabric Extender 48x1G 4x10G SFP+ Module</li> </ul>				
<i>queue-limit</i>	<p>(Optional) Queue limit value for the interface.</p> <p>The range varies per FEX type.</p> <p>The FEX type range for N2248TP-E is from 32768 to 33538048, and the range for other FEX types is from 5120 to 652800.</p>				
<b>Command Default</b>	None				
<b>Command Modes</b>	FEX configuration mode				
<b>Supported User Roles</b>	network-admin vdc-admin				
<b>Command History</b>	<table border="1"> <thead> <tr> <th><b>Release</b></th><th><b>Modification</b></th></tr> </thead> <tbody> <tr> <td>6.2(2)</td><td>This command was introduced.</td></tr> </tbody> </table>	<b>Release</b>	<b>Modification</b>	6.2(2)	This command was introduced.
<b>Release</b>	<b>Modification</b>				
6.2(2)	This command was introduced.				
<b>Usage Guidelines</b>	This command does not require a license.				

**hardware queue-limit****Examples**

This example shows how to configure the default queue limit value (66560 bytes) for a FEX:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# hardware N2248T queue-limit
switch(config-fex)#

```

This example shows how to configure the queue limit for a FEX:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# hardware N2248T queue-limit 5120
switch(config-fex)#

```

This example shows how to enable a different queue limit on the rx and tx directions:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# hardware N2248TP-E queue-limit 40000 rx
switch(config-fex)# hardware N2248TP-E queue-limit 80000 tx
switch(config-fex)#

```

This example shows how to disable the queue limit:

```
switch# config t
switch(config)# fex 101
switch(config)# no hardware N2248T queue-limit

```

**Related Commands**

<b>Command</b>	<b>Description</b>
<b>show queuing interface</b>	Displays the queue limit that is enforced on a FEX.

# install feature-set fex

To install a Fabric Extender (FEX) feature set, use the **install feature-set fex** command.

**install feature-set fex**

**Syntax Description** This command has no arguments or keywords.

**Defaults** None

**Command Modes** Global configuration mode

**SupportedUserRoles** network-admin  
vdc-admin

Command History	Release	Modification
	5.1(1)	This command was introduced.

**Usage Guidelines** This command does not require a license.

**Examples** This example shows how to install a FEX feature set:

```
switch(config)# install feature-set fex
switch(config)#
```

Related Commands	Command	Description
	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

**logging fex**

# logging fex

To set the logging alert level for Fabric Extender (FEX) events, use the **logging fex** command. To reset the logging level, use the **no** form of this command.

**logging fex [severity-level]**

**no logging fex [severity-level]**

---

<b>Syntax Description</b>	<i>severity-level</i>	(Optional) Number of the desired severity level at which messages should be logged. Messages at or numerically lower than the specified level are logged. Severity levels are as follows:				
		<ul style="list-style-type: none"> <li>• 0—emergency: System unusable</li> <li>• 1—alert: Immediate action needed</li> <li>• 2—critical: Critical condition—default level</li> <li>• 3—error: Error condition</li> <li>• 4—warning: Warning condition</li> <li>• 5—notification: Normal but significant condition</li> <li>• 6—informational: Informational message only</li> <li>• 7—debugging: Appears during debugging only</li> </ul>				
<b>Command Default</b>	None					
<b>Command Modes</b>	Global configuration mode					
<b>SupportedUserRoles</b>	network-admin vdc-admin					
<b>Command History</b>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left; padding: 2px;"><b>Release</b></th><th style="text-align: left; padding: 2px;"><b>Modification</b></th></tr> </thead> <tbody> <tr> <td style="padding: 2px;">4.0(1a)N2(1)</td><td style="padding: 2px;">This command was introduced.</td></tr> </tbody> </table>		<b>Release</b>	<b>Modification</b>	4.0(1a)N2(1)	This command was introduced.
<b>Release</b>	<b>Modification</b>					
4.0(1a)N2(1)	This command was introduced.					

---

**Examples** This example shows how to set the logging alert level for Fabric Extender events:

```
switch(config)# logging fex 4
```

This example shows how to reset the logging level:

```
switch(config)# no logging fex
```

Related Commands	Command	Description
	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

# port-channel min-links

To configure the minimum number of links for a port channel, use the **port-channel min-links** command. To disable this feature, use the **no** form of this command.

**port-channel min-links** *min-link number*

**no port-channel min-links** *min-link number*

<b>Syntax Description</b>	<i>min-link number</i>	Minimum number of links. The range is from 1 to 16.
<b>Command Default</b>	The default min links is 1.	
<b>Command Modes</b>	Interface configuration mode	
<b>SupportedUserRoles</b>	network-admin vdc-admin	
<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	6.1(3)	This command was introduced.
<b>Usage Guidelines</b>	The minimum number of links is configured on a fabric port channel to ensure the minimum bandwidth for the fabric port channel. When the minimum number of links criteria is not met, the host-facing interfaces of the FEX are brought down.	
	This command does not require a license.	
<b>Examples</b>	This example shows how to configure the minimum number of links for a port channel:	

```
switch# config t
Enter configuration commands, one per line. End with CNTL/Z.
switch# configure terminal
switch(config)# interface port-channel 100
switch(config)# switchport
switch(config-if)# switchport mode fex-fabric
switch(config-if)# port-channel min-links 3
```

This example shows how to remove the minimum number of links:

```
switch# config t
Enter configuration commands, one per line. End with CNTL/Z.
switch# configure terminal
switch(config)# interface port-channel 100
switch(config)# switchport
switch(config-if)# switchport mode fex-fabric
switch(config-if)# no port-channel min-links 3
```

**Related Commands**

Command	Description
<b>show port-channel summary</b>	Displays a summary of the port channels.

**reload fex**

# reload fex

To reload a Fabric Extender (FEX), use the **reload fex** command.

**reload fex *chassis-id all***

<b>Syntax Description</b>	<i>chassis-id</i> Fabric Extender chassis ID. The range is from 101 to 199. <i>all</i> Reloads all FEX modules.
---------------------------	--

<b>Defaults</b>	None
-----------------	------

<b>Command Modes</b>	Global configuration mode
----------------------	---------------------------

<b>SupportedUserRoles</b>	network-admin vdc-admin
---------------------------	----------------------------

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	5.1(1)	This command was introduced.

<b>Usage Guidelines</b>	This command does not require a license.
-------------------------	--

<b>Examples</b>	This example shows how to reload all FEX modules:
-----------------	---

```
switch(config)# reload fex all
WARNING: This command will reboot all FEX modules
Do you want to continue? (y/n) [n] y
qadc3-ind30(config)# 2010 Sep 6 13:13:24 qadc3-ind30 %CALLHOME-2-EVENT: FEX_OFF
LINE
2010 Sep 6 13:13:25 qadc3-ind30 %FEX-2-NOHMS_ENV_FEX_OFFLINE: FEX-101 Off-line
(Serial Number JAF1407AANJ)
switch(config)#

```

This example shows how to reload a specific FEX:

```
switch(config)# reload fex 101
WARNING: This command will reboot FEX module 101
Do you want to continue? (y/n) [n] y
qadc3-ind30(config)# 2010 Sep 6 13:11:36 qadc3-ind30 %CALLHOME-2-EVENT: FEX_OFF
LINE
2010 Sep 6 13:11:37 qadc3-ind30 %VNTAG_MGR-2-VNTAG_SEQ_ERROR: Failed to send me
ssage to FEX slot(33) Chassis (101) - Error Connection timed out. Ignore if FEX
is going offline
2010 Sep 6 13:11:38 qadc3-ind30 %FEX-2-NOHMS_ENV_FEX_OFFLINE: FEX-101 Off-line
(Serial Number JAF1407AANJ)
switch(config)#

```

Related Commands	Command	Description
	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

# serial

To assign a serial number to a Fabric Extender (FEX), use the **serial** command. To remove the serial number, use the **no** form of this command.

**serial** *serial\_string*

**no serial**

---

<b>Syntax Description</b>	<i>serial_string</i>	Serial number string for the Fabric Extender. The string is alphanumeric, case sensitive, and has a maximum length of 20 characters.
---------------------------	----------------------	--

---

<b>Command Default</b>	None
------------------------	------

<b>Command Modes</b>	Fabric extender configuration mode
----------------------	------------------------------------

<b>SupportedUserRoles</b>	network-admin vdc-admin
---------------------------	----------------------------

---

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	5.1(1)	This command was introduced.

---

<b>Usage Guidelines</b>	The serial number string that you define with the <b>serial</b> command must match the serial number of the Fabric Extender. If you configure a serial number and then you use the <b>fex associate</b> command to associate the corresponding chassis ID to the switch, the association succeeds only if the Fabric Extender reports a matching serial number string.
-------------------------	--

<b>Caution</b>	Configuring a serial number other than that of the given Fabric Extender forces the Fabric Extender offline.
----------------	--

---

<b>Examples</b>	This example shows how to specify a serial number for a Fabric Extender:
-----------------	--

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# serial Rack16_FEX101
```

This example shows how to remove a serial number from a Fabric Extender:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# no serial
```

**Related Commands**

Command	Description
<b>fex</b>	Creates a Fabric Extender and enters fabric extender configuration mode.
<b>fex associate</b>	Associates a Fabric Extender to an Ethernet or EtherChannel interface.
<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

---

switchport mode fex-fabric

# switchport mode fex-fabric

To set the interface type to be an uplink port for a Fabric Extender (FEX), use the **switchport mode fex-fabric** command.

**switchport mode fex-fabric**

**no switchport mode fex-fabric**

---

**Syntax Description** This command has no arguments or keywords.

---

**Command Default** None

---

**Command Modes** Interface configuration mode

---

**SupportedUserRoles** network-admin  
vdc-admin

---

Command History	Release	Modification
	5.1(1)	This command was introduced.

---

**Examples** This example shows how to set an Ethernet interface to be an uplink port for a Fabric Extender:

```
switch# configure terminal
switch(config)# interface ethernet 1/40
switch(config-if)# switchport mode fex-fabric
```

This example shows how to set an EtherChannel interface to be an uplink port for a Fabric Extender:

```
switch# configure terminal
switch(config)# interface port-channel 4
switch(config-if)# switchport mode fex-fabric
```

---

**Related Commands**

---

Command	Description
<b>fex associate</b>	Associates a Fabric Extender to an Ethernet or EtherChannel interface.
<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

---

# show environment fex

To display the Fabric Extender (FEX) environment information, use the **show environment fex** command.

**show environment fex {all | chassis\_ID} [fan | power | temperature]**

## Syntax Description

<b>all</b>	Displays information for all Fabric Extender chassis.
<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 101 to 199.
<b>fan</b>	(Optional) Displays fan information.
<b>power</b>	(Optional) Displays power capacity and power distribution information.
<b>temperature</b>	(Optional) Displays temperature sensor information.

## Command Default

None

## Command Modes

EXEC mode

## SupportedUserRoles

network-admin  
vdc-admin

## Command History

Release	Modification
5.1(1)	This command was introduced.

## Examples

This example shows how to display the environmental sensor status for a Fabric Extender:

```
switch# show environment fex 101

Temperature Fex 101:
-----
Module   Sensor      MajorThresh    MinorThres   CurTemp     Status
                  (Celsius)       (Celsius)     (Celsius)
-----
1        Outlet-1    85             75           50          ok
1        Inlet-1     100            90           37          ok

Fan Fex: 100:
-----
Fan          Model      Hw      Status
-----
Chassis      N2K-C2148-FAN    --      ok
PS-1         N5K-PAC-200W    --      ok
PS-2         --           --      absent
```

■ show environment fex

```

Power Supply Fex 100:
-----
Voltage: 12 Volts
-----
PS Model          Power      Power      Status
              (Watts)    (Amp)
-----
1  N5K-PAC-200W   0.00      0.00      ok
2  --           --        --        --
-----
```

```

Mod Model          Power      Power      Power      Power      Status
Requested Requested Allocated Allocated

■ **show hardware qos dscp-to-queue ingress**

## show hardware qos dscp-to-queue ingress

To display the status of DSCP2Q mapping for the Fabric Extender (FEX) host interface and FEX fabric interface, use the **show hardware qos dscp-to-queue ingress** command.

**show hardware qos dscp-to-queue ingress**

---

**Syntax Description** This command has no arguments or keywords.

---

**Command Default** None

---

**Command Modes** Interface configuration mode

---

**SupportedUserRoles** network-admin  
vdc-admin

---

Command History	Release	Modification
	6.2(2)	This command was introduced.

---

---

**Usage Guidelines** This command does not require a license.

---

**Examples** This example shows how to display the status of DSCP-based queuing for all enabled modules:

```
switch# config t
switch(config) # show hardware qos dscp-to-queue ingress
status: Enabled
module_type : all
```

This example shows how to display the status of DSCP-based queuing for all disabled modules:

```
switch# config t
switch(config) # show hardware qos dscp-to-queue ingress
status: Disabled
module_type : all
```

---

Related Commands	Command	Description
	<b>hardware qos dscp-to-queue ingress module-type</b>	Enables the DSCP2Q mapping for the FEX host interface and FEX fabric interface.

---

# show port-channel summary

To display a summary of the Fabric Extender (FEX) port channel summary, use the **show port-channel summary** command.

## show port-channel summary

**Syntax Description** This command has no arguments or keywords.

**Command Default** None

**Command Modes** EXEC mode

**SupportedUserRoles** network-admin  
vdc-admin

Command History	Release	Modification
	6.1(3)	Changed the command output.
	5.1(1)	This command was introduced.

**Usage Guidelines** This command does not require a license.

**Examples** This example shows how to display a summary of fabric port channels that do not meet the minimum link criteria:

```
switch# show port-channel summary
Flags: D - Down          P - Up in port-channel (members)
      I - Individual    H - Hot-standby (LACP only)
      s - Suspended     r - Module-removed
      S - Switched      R - Routed
      U - Up (port-channel)
      M - Not in use. Min-links not met
-----
Group Port-      Type      Protocol Member Ports
      Channel
-----

	<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.

# show sprom fex

To display information about the Fabric Extender (FEX) Serial PROM (SPROM), use the **show sprom fex** command.

```
show sprom fex {all | chassis_ID {all | backplane | powersupply module_number}}
```

<b>Syntax Description</b>	
<b>all</b>	Displays all SPROM content for a specific Fabric Extender.
<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 101 to 199.
<b>backplane</b>	Displays the backplane SPROM content for a specific Fabric Extender.
<b>powersupply</b>	Displays the power supply SPROM content for a specific Fabric Extender.
<i>module_number</i>	Power supply module number for a specific Fabric Extender. The range is from 1 to 2.

<b>Command Default</b>	None
<b>Command Modes</b>	EXEC mode
<b>SupportedUserRoles</b>	network-admin vdc-admin

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	5.1(1)	This command was introduced.

**no type**

<b>Syntax Description</b>	<i>fex_card_type</i>	Fabric Extender card type. The following Fabric Extender card types are supported: <ul style="list-style-type: none"> <li>• <b>N2224TP</b>—Fabric Extender 24x1G 2x10G SFP+ Module</li> <li>• <b>N2232P</b>—Fabric Extender 32x10G 8x10G Module</li> <li>• <b>N2232TM</b>—Fabric Extender 32x10GBase-T 8x10G SFP+ Module</li> <li>• <b>N2232TM-E</b>—Fabric Extender 32x10GBase-T 8x10G SFP+ Module</li> <li>• <b>N2248PQ</b>—Fabric Extender 48x10GE SPF+4x40GE QSPF Module</li> <li>• <b>N2248T</b>—Fabric Extender 48x1G 4x10G Module</li> <li>• <b>N2248TPE</b>—Fabric Extender 48x1G 4x10G SFP+Module</li> <li>• <b>NB22HP</b>—Fabric Extender 16x10G 4x10G SFP+8x10G SFP+Module</li> </ul>										
<b>Command Default</b>	None											
<b>Command Modes</b>	Fabric extender configuration mode											
<b>SupportedUserRoles</b>	network-admin vdc-admin											
<b>Command History</b>	<table border="1"> <thead> <tr> <th><b>Release</b></th> <th><b>Modification</b></th> </tr> </thead> <tbody> <tr> <td>6.2(2)</td> <td>N2232TM-E, N2248PQ and NB22HP are supported from release 6.2(2).</td> </tr> <tr> <td>6.1(1)</td> <td>2232TM and 2248TPE are supported from release 6.1(1).</td> </tr> <tr> <td>5.2(1)</td> <td>2224TP and 2232P are supported from release 5.2.(1).</td> </tr> <tr> <td>4.2(1)N1(1)</td> <td>This command was introduced.</td> </tr> </tbody> </table>		<b>Release</b>	<b>Modification</b>	6.2(2)	N2232TM-E, N2248PQ and NB22HP are supported from release 6.2(2).	6.1(1)	2232TM and 2248TPE are supported from release 6.1(1).	5.2(1)	2224TP and 2232P are supported from release 5.2.(1).	4.2(1)N1(1)	This command was introduced.
<b>Release</b>	<b>Modification</b>											
6.2(2)	N2232TM-E, N2248PQ and NB22HP are supported from release 6.2(2).											
6.1(1)	2232TM and 2248TPE are supported from release 6.1(1).											
5.2(1)	2224TP and 2232P are supported from release 5.2.(1).											
4.2(1)N1(1)	This command was introduced.											
<b>Usage Guidelines</b>	The following Cisco Nexus 7000 Series Fabric Extenders are supported on a Cisco Nexus 7000 Series switch that runs a Cisco NX-OS Release 4.2(1)N2(1):											

- Cisco Nexus N2224TP Fabric Extender—It has two 10-Gigabit Ethernet fabric interfaces with small form-factor pluggable (SFP+) interface adapters for its uplink connection to the parent Cisco Nexus 5000 Series switch and 24 1000BASE-T (1-Gigabit) Ethernet host interfaces for its downlink connection to servers or hosts. It does not support Fibre Channel over Ethernet (FCoE).
- Cisco Nexus 2232PP Fabric Extender—It has eight 10-Gigabit Ethernet fabric interfaces with small form-factor pluggable (SFP+) interface adapters for its uplink connection to the parent Cisco Nexus 5000 Series switch and 32 10-Gigabit Ethernet fabric interfaces with SFP+ interface adapters for its downlink connection to servers or hosts.
- Cisco Nexus 2248TP Fabric Extender—Has four 10-Gigabit Ethernet fabric interfaces with SFP+ interface adapters for its uplink connection to the parent Cisco Nexus 5000 Series switch and 48 1000BASE-T (1-Gigabit) Ethernet host interfaces for its downlink connection to servers or hosts.

The following Cisco Nexus 7000 Series Fabric Extenders are supported on a Cisco Nexus 7000 Series switch that runs a Cisco NX-OS Release 5.0(3)N2(1):

- Cisco Nexus N2224TP Fabric Extender—Has two 10-Gigabit Ethernet fabric interfaces with small form-factor pluggable (SFP+) interface adapters for its uplink connection to the parent Cisco Nexus 5000 Series switch and 24 1000BASE-T (1-Gigabit) Ethernet host interfaces for its downlink connection to servers or hosts. It does not support Fibre Channel over Ethernet (FCoE).
- Cisco Nexus 2232PP Fabric Extender—Has eight 10-Gigabit Ethernet fabric interfaces with small form-factor pluggable (SFP+) interface adapters for its uplink connection to the parent Cisco Nexus 5000 Series switch and 32 10-Gigabit Ethernet fabric interfaces with SFP+ interface adapters for its downlink connection to servers or hosts.
- Cisco Nexus 2232TM Fabric Extender—Has eight 10-Gigabit Ethernet fabric interfaces with small form-factor pluggable (SFP+) interface adapters for its uplink connection to the parent Cisco Nexus 5000 Series switch and 32 10-Gigabit BASE-T Ethernet fabric interfaces for its downlink connection to servers or hosts.
- Cisco Nexus 2248TP Fabric Extender—Has four 10-Gigabit Ethernet fabric interfaces with SFP+ interface adapters for its uplink connection to the parent Cisco Nexus 5000 Series switch and 48 1000BASE-T (1-Gigabit) Ethernet host interfaces for its downlink connection to servers or hosts.

## Examples

This example shows how to set the Fabric Extender card type:

```
switch(config)# fex 101
switch(config-fex)# type N2224TP
switch(config-fex)#
```

## Related Commands

Command	Description
<b>fex</b>	Creates a Fabric Extender and enters fabric extender configuration mode.
<b>show fex</b>	Displays all configured Fabric Extender chassis connected to the switch.
