# ap dot11 5ghz cleanair

To enable CleanAir for detecting 5-GHz devices, use the **ap dot11 5ghz cleanair** command in global configuration mode.

**ap dot11 5ghz cleanair**

---

## Command Default

Disabled.

---

## Command Modes

Global configuration.

---

## Command History

Release	Modification
Cisco IOS XE 3.3SE	Cisco IOS XE 3.3SE
	This command was introduced.

---

## Usage Guidelines

You must enable this CleanAir command before you configure other CleanAir commands.

This example shows how to enable CleanAir for 5-GHz devices:

```
Device(config)# ap dot11 5ghz cleanair
```

## Related Topics

## ap dot11 5ghz cleanair alarm air-quality

To configure the alarm when the Air Quality (AQ) reaches the threshold value for the 5-GHz devices, use the **ap dot11 5ghz cleanair alarm air-quality** command. To disable the alarm when the AQ reaches the threshold value for the 5-GHz devices, use the **no** form of this command.

```
ap dot11 5ghz cleanair alarm air-quality threshold threshold_value
```

<b>Syntax Description</b>	<b>threshold</b> <i>threshold_value</i> Configures the threshold value for air quality. The range is from 1 to 100.						
<b>Command Default</b>	The default threshold value for AQ is 10.						
<b>Command Modes</b>	Global configuration (config).						
<b>Command History</b>	<table border="1"> <thead> <tr> <th>Release</th> <th>Modification</th> </tr> </thead> <tbody> <tr> <td>Cisco IOS XE 3.3SE</td> <td>Cisco IOS XE 3.3SE</td> </tr> <tr> <td></td> <td>This command was introduced.</td> </tr> </tbody> </table>	Release	Modification	Cisco IOS XE 3.3SE	Cisco IOS XE 3.3SE		This command was introduced.
Release	Modification						
Cisco IOS XE 3.3SE	Cisco IOS XE 3.3SE						
	This command was introduced.						
<b>Usage Guidelines</b>	<p>You must enable CleanAir using the <b>ap dot11 5ghz cleanair</b> command before you configure this command.</p> <p>This example shows how to set the threshold value for the AQ:</p> <pre>Device(config)# ap dot11 5ghz cleanair alarm air-quality threshold 30</pre>

[default ap dot11 5ghz cleanair device](#), on page 5

## ap dot11 5ghz cleanair alarm device

To configure the alarm for the 5-GHz interference devices, use the **ap dot11 5ghz cleanair alarm device** command.

**ap dot11 5ghz cleanair alarm device** { **canopy** | **cont-tx** | **dect-like** | **inv** | **jammer** | **nonstd** | **radar** | **superag** | **tdd-tx** | **video** | **wimax-fixed** | **wimax-mobile** }

### Syntax Description

<b>canopy</b>	Configures the alarm for canopy interference devices.
<b>cont-tx</b>	Configures the alarm for continuous transmitters.
<b>dect-like</b>	Configures the alarm for Digital Enhanced Cordless Communication (DECT)-like phones.
<b>inv</b>	Configures the alarm for devices using spectrally inverted Wi-Fi signals.
<b>jammer</b>	Configures the alarm for jammer interference devices.
<b>nonstd</b>	Configures the alarm for devices using nonstandard Wi-Fi channels.
<b>radar</b>	Configures the alarm for radars.
<b>superag</b>	Configures the alarm for 802.11 SuperAG interference devices.
<b>tdd-tx</b>	Configures the alarm for Time Division Duplex (TDD) transmitters.
<b>video</b>	Configures the alarm for video cameras.
<b>wimax-fixed</b>	Configures the alarm for WiMax fixed interference devices.
<b>wimax-mobile</b>	Configures the alarm for WiMax mobile interference devices.

### Command Default

The alarm for Wi-Fi inverted devices is enabled and for all other interference devices is disabled.

### Command Modes

Global configuration (config).

### Command History

Release	Modification
Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

### Usage Guidelines

You must enable CleanAir using the **ap dot11 5ghz cleanair** command before you configure this command.

This example shows how to enable the alarm to notify interferences from a radar device:

```
Device(config)# ap dot11 5ghz cleanair alarm device radar
```

## default ap dot11 5ghz cleanair device

To configure the default state of the alarm for 5-GHz interference devices, use the **default ap dot11 5ghz cleanair device** command in global configuration mode.

```
default ap dot11 5ghz cleanair device {canopy | cont-tx | dect-like | inv | jammer | nonstd | radar
| report | superag | tdd-tx | video | wimax-fixed | wimax-mobile}
```

Syntax	Description
<b>canopy</b>	Configures the alarm for canopy interference devices.
<b>cont-tx</b>	Configures the alarm for continuous transmitters.
<b>dect-like</b>	Configures the alarm for Digital Enhanced Cordless Communication (DECT)-like phones.
<b>inv</b>	Configures the alarm for devices using spectrally inverted Wi-Fi signals.
<b>jammer</b>	Configures the alarm for jammer interference devices.
<b>nonstd</b>	Configures the alarm for devices using nonstandard Wi-Fi channels.
<b>radar</b>	Configures the alarm for radars.
<b>report</b>	Enables interference device reports.
<b>superag</b>	Configures the alarm for 802.11 SuperAG interference devices.
<b>tdd-tx</b>	Configures the alarm for Time Division Duplex (TDD) transmitters.
<b>video</b>	Configures the alarm for video cameras.
<b>wimax-fixed</b>	Configures the alarm for WiMax fixed interference devices.
<b>wimax-mobile</b>	Configures the alarm for WiMax mobile interference devices.

**Command Default** The alarm for Wi-Fi inverted devices is enabled. The alarm for all other interference devices is disabled.

**Command Modes** Global configuration (config).

Command History	Release	Modification
	Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

**Usage Guidelines** You must enable CleanAir using the **ap dot11 5ghz cleanair** command before you configure this command.

This example shows how to enable CleanAir to report when a video camera interferes:

```
Device(config)# default ap dot11 5ghz cleanair device video
```

## ap dot11 5ghz rrm channel cleanair-event

To enable Event-Driven RRM (EDRRM) and configure the sensitivity for 5-GHz devices, use the **ap dot11 5ghz rrm channel cleanair-event** command in global configuration mode. To disable EDRRM, use the **no** form of the command.

```
ap dot11 5ghz rrm channel cleanair-event [sensitivity {high | low | medium}]
no ap dot11 5ghz rrm channel cleanair-event [sensitivity {high | low | medium}]
```

Syntax Description	sensitivity	(Optional) Configures the EDRRM sensitivity of the CleanAir event.
	high	(Optional) Specifies the highest sensitivity to non-Wi-Fi interference as indicated by the air quality (AQ) value.
	low	(Optional) Specifies the least sensitivity to non-Wi-Fi interference as indicated by the AQ value.
	medium	(Optional) Specifies medium sensitivity to non-Wi-Fi interference as indicated by the AQ value.

**Command Default** EDRRM is disabled and the EDRRM sensitivity is low.

**Command Modes** Global configuration (config).

Command History	Release	Modification
	Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

**Usage Guidelines** You must enable EDRRM using the **ap dot11 5ghz rrm channel cleanair-event** command before you configure the sensitivity.

This example shows how to enable EDRRM and set the EDRRM sensitivity to high:

```
Device(config)# ap dot11 5ghz rrm channel cleanair-event
Device(config)# ap dot11 5ghz rrm channel cleanair-event sensitivity high
```

## ap dot11 24ghz cleanair alarm air-quality

To configure the alarm for the threshold value of Air Quality (AQ) for all 2.4-GHz devices, use the **ap dot11 24ghz cleanair alarm air-quality** command in global configuration mode. To disable the alarm for the threshold value of AQ for all 2.4-GHz devices, use the **no** form of this command.

```
ap dot11 24ghz cleanair alarm air-quality threshold threshold_value
```

### Syntax Description

**threshold** *threshold\_value* Configures the threshold value for AQ. The range is from 1 to 100.

### Command Default

The default threshold value for AQ is 10.

### Command Modes

Global configuration (config)

### Command History

Release	Modification
Cisco IOS XE 3.3SE	Cisco IOS XE 3.3SE
	This command was introduced.

### Usage Guidelines

You must enable CleanAir using the **ap dot11 24ghz cleanair** command before you configure this command.

This example shows how to set the threshold value for the AQ:

```
Device(config)# ap dot11 24ghz cleanair alarm air-quality threshold 50
```

## ap dot11 24ghz cleanair alarm device

To configure the alarm for the 2.4-GHz interference devices, use the **ap dot11 24ghz cleanair alarm device** command in global configuration mode. To disable the alarm for the 2.4-GHz interference devices, use the **no** form of this command.

```
ap dot11 24ghz cleanairalarm {device | bt-discovery | bt-link canopy | cont-tx | dect-like | fh
| inv | jammer | mw-oven | nonstd | superag | tdd-tx video | wimax-fixed | wimax-mobile |
xbox | zigbee}
```

### Syntax Description

<b>bt-discovery</b>	Configures the alarm for Bluetooth interference devices.
<b>bt-link</b>	Configures the alarm for any Bluetooth link.
<b>canopy</b>	Configures the alarm for canopy interference devices.
<b>cont-tx</b>	Configures the alarm for continuous transmitters.
<b>dect-like</b>	Configures the alarm for Digital Enhanced Cordless Communication (DECT)-like phones.
<b>fh</b>	Configures the alarm for 802.11 frequency hopping (FH) devices.
<b>inv</b>	Configures the alarm for devices using spectrally inverted Wi-Fi signals.
<b>jammer</b>	Configures the alarm for jammer interference devices.
<b>mw-oven</b>	Configures the alarm for microwave ovens.
<b>nonstd</b>	Configures the alarm for devices using nonstandard Wi-Fi channels.
<b>superag</b>	Configures the alarm for 802.11 SuperAG interference devices.
<b>tdd-tx</b>	Configures the alarm for Time Division Duplex (TDD) transmitters.
<b>video</b>	Configures the alarm for video cameras.
<b>wimax-fixed</b>	Configures the alarm for WiMax fixed interference devices.
<b>wimax-mobile</b>	Configures the alarm for WiMax mobile interference devices.
<b>xbox</b>	Configures the alarm for Xbox interference devices.
<b>zigbee</b>	Configures the alarm for 802.15.4 interference devices.

### Command Default

The alarm for Wi-Fi inverted devices is enabled. The alarm for all other devices is disabled.

### Command Modes

Global configuration (config).

### Command History

Release	Modification
Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

---

**Usage Guidelines**

You must enable CleanAir using the **ap dot11 24ghz cleanair** command before you configure this command.

This example shows how to enable the alarm to notify interferences from a Zigbee device:

```
Device(config)# ap dot11 24ghz cleanair alarm device zigbee
```

**Related Topics**

## default ap dot11 24ghz cleanair device

To configure the default state of report generation for 2.4-GHz interference devices, use the **default ap dot11 24ghz cleanair device** command in global configuration mode.

```
default ap dot11 24ghz cleanair device {ble-beacon | bt-discovery | bt-link | canopy | cont-tx |
dect-like | fh | inv | jammer | mw-oven | nonstd | report | superag | tdd-tx | video | wimax-fixed |
wimax-mobile | xbox | zigbee}
```

Syntax Description		
	<b>ble-beacon</b>	Configure the BLE beacon feature.
	<b>bt-discovery</b>	Configures the alarm for Bluetooth interference devices.
	<b>bt-link</b>	Configures the alarm for any Bluetooth link.
	<b>canopy</b>	Configures the alarm for canopy interference devices.
	<b>cont-tx</b>	Configures the alarm for continuous transmitters.
	<b>dect-like</b>	Configures the alarm for Digital Enhanced Cordless Communication (DECT)-like phones.
	<b>fh</b>	Configures the alarm for 802.11 frequency hopping devices.
	<b>inv</b>	Configures the alarm for devices using spectrally inverted Wi-Fi signals.
	<b>jammer</b>	Configures the alarm for jammer interference devices.
	<b>mw-oven</b>	Configures the alarm for microwave ovens.
	<b>nonstd</b>	Configures the alarm for devices using nonstandard Wi-Fi channels.
	<b>superag</b>	Configures the alarm for 802.11 SuperAG interference devices.
	<b>tdd-tx</b>	Configures the alarm for Time Division Duplex (TDD) transmitters.
	<b>video</b>	Configures the alarm for video cameras.

<b>wimax-fixed</b>	Configures the alarm for WiMax fixed interference devices.
<b>wimax-mobile</b>	Configures the alarm for WiMax mobile interference devices.
<b>xbox</b>	Configures the alarm for Xbox interference devices.
<b>zigbee</b>	Configures the alarm for 802.15.4 interference devices.

**Command Default**

The alarm for Wi-Fi inverted devices is enabled. The alarm for all other devices is disabled.

**Command Modes**

Global configuration (config).

**Command History**

Release	Modification
Cisco IOS XE 3.3SE	This command was introduced.
Cisco IOS XE Denali 16.2.1	This command was modified. The <b>ble-beacon</b> keyword was added.

**Usage Guidelines**

You must enable CleanAir using the **ap dot11 24ghz cleanair** command before you configure this command.

This example shows how to enable CleanAir to report when a video camera interferes:

```
Device(config)# default ap dot11 24ghz cleanair device video
```

**Related Topics**

## ap dot11 24ghz rrm channel cleanair-event

To enable Event-Driven RRM (EDRRM) and the sensitivity for 2.4-GHz devices, use the **ap dot11 24ghz rrm channel cleanair-event** command in global configuration mode. To disable EDRRM, use the **no** form of this command.

```
ap dot11 24ghz rrm channel cleanair-event sensitivity {high | low | medium}
no ap dot11 24ghz rrm channel cleanair-event [sensitivity{high | low | medium}]
```

Syntax Description		
	<b>sensitivity</b>	(Optional) Configures the EDRRM sensitivity of the CleanAir event.
	<b>high</b>	(Optional) Specifies the highest sensitivity to non-Wi-Fi interference as indicated by the air quality (AQ) value.
	<b>low</b>	(Optional) Specifies the least sensitivity to non-Wi-Fi interference as indicated by the AQ value.
	<b>medium</b>	(Optional) Specifies medium sensitivity to non-Wi-Fi interference as indicated by the AQ value.

**Command Default** EDRRM is disabled and the sensitivity is low.

**Command Modes** Global configuration (config).

Command History	Release	Modification
	Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

**Usage Guidelines** You must enable EDRRM using the **ap dot11 24ghz rrm channel cleanair-event** command before you configure the sensitivity.

This example shows how to enable EDRRM and set the EDRRM sensitivity to low:

```
Device(config)# ap dot11 24ghz rrm channel cleanair-event
Device(config)# ap dot11 24ghz rrm channel cleanair-event sensitivity low
```

## ap name mode se-connect

To configure the access point for SE-Connect mode, use the **ap name *ap\_name* mode se-connect** command in privileged exec mode.

**ap name *ap\_name* mode se-connect**

<b>Syntax Description</b>	<i>ap_name</i>	Name of the access point.
<b>Command Default</b>	No access point is configured for SE-Connect mode.	
<b>Command Modes</b>	Privileged EXEC (#)	
<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	Cisco IOS XE 3.3SE	Cisco IOS XE 3.3SE
		This command was introduced.

**Usage Guidelines**

The access point will reboot after you change the mode.

SE-connect mode enables a user to connect a Spectrum Expert application running on an external Microsoft Windows XP or Vista PC to a Cisco CleanAir-enabled access point in order to display and analyze detailed spectrum data. The Spectrum Expert application connects directly to the access point, by passing the controller. An access point in SE-Connect mode does not provide any Wi-Fi, RF, or spectrum data to the controller. All CleanAir system functionality is suspended while the AP is in this mode, and no clients are served. This mode is intended for remote troubleshooting only.

This example shows how to change the mode of the access point to SE-Connect:

```
Device# ap name AS-5508-5-AP3 mode se-connect
```

```
Changing the AP's mode will cause the AP to reboot.
Are you sure you want to continue? (y/n) [y]: y
% switch-1:wcm: Cisco AP does not support the seconnect mode
```

## default ap dot11 5ghz cleanair device

To configure the default state of the alarm for 5-GHz interference devices, use the **default ap dot11 5ghz cleanair device** command in global configuration mode.

```
default ap dot11 5ghz cleanair device {canopy | cont-tx | dect-like | inv | jammer | nonstd | radar
| report | superag | tdd-tx | video | wimax-fixed | wimax-mobile}
```

### Syntax Description

<b>canopy</b>	Configures the alarm for canopy interference devices.
<b>cont-tx</b>	Configures the alarm for continuous transmitters.
<b>dect-like</b>	Configures the alarm for Digital Enhanced Cordless Communication (DECT)-like phones.
<b>inv</b>	Configures the alarm for devices using spectrally inverted Wi-Fi signals.
<b>jammer</b>	Configures the alarm for jammer interference devices.
<b>nonstd</b>	Configures the alarm for devices using nonstandard Wi-Fi channels.
<b>radar</b>	Configures the alarm for radars.
<b>report</b>	Enables interference device reports.
<b>superag</b>	Configures the alarm for 802.11 SuperAG interference devices.
<b>tdd-tx</b>	Configures the alarm for Time Division Duplex (TDD) transmitters.
<b>video</b>	Configures the alarm for video cameras.
<b>wimax-fixed</b>	Configures the alarm for WiMax fixed interference devices.
<b>wimax-mobile</b>	Configures the alarm for WiMax mobile interference devices.

### Command Default

The alarm for Wi-Fi inverted devices is enabled. The alarm for all other interference devices is disabled.

### Command Modes

Global configuration (config).

### Command History

Release	Modification
Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

### Usage Guidelines

You must enable CleanAir using the **ap dot11 5ghz cleanair** command before you configure this command.

This example shows how to enable CleanAir to report when a video camera interferes:

```
Device(config)# default ap dot11 5ghz cleanair device video
```

## default ap dot11 5ghz rrm channel cleanair-event

To configure the default state of Event-Driven radio resource management (EDRRM) and the EDRRM sensitivity for 5-GHz devices, use the **default ap dot11 5ghz rrm channel cleanair-event** command in global configuration mode.

```
default ap dot11 5ghz rrm channel cleanair-event [sensitivity {high | low | medium}]
```

Syntax Description	sensitivity	(Optional) Configures the EDRRM sensitivity of the CleanAir event.
	high	(Optional) Specifies the highest sensitivity to non-Wi-Fi interference as indicated by the Air Quality (AQ) value.
	low	(Optional) Specifies the least sensitivity to non-Wi-Fi interference as indicated by the AQ value.
	medium	(Optional) Specifies medium sensitivity to non-Wi-Fi interference as indicated by the AQ value.

**Command Default** EDRRM is disabled and the sensitivity is low.

**Command Modes** Global configuration (config).

Command History	Release	Modification
	Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

**Usage Guidelines** You must enable EDRRM before you configure the sensitivity.

This example shows how to set the default EDRRM state and sensitivity:

```
Device(config)# default ap dot11 5ghz rrm channel cleanair-event
Device(config)# default ap dot11 5ghz rrm channel cleanair-event sensitivity
```

## default ap dot11 5ghz rrm channel device

To configure the default state of the persistent non-Wi-Fi device avoidance in the 802.11a channels, use the **default ap dot11 5ghz rrm channel device** command in global configuration mode.

**default ap dot11 5ghz rrm channel device**

---

### Syntax Description

This command has no arguments or keywords.

---

### Command Default

Persistent device state is disabled.

---

### Command Modes

Global configuration (config)

---

### Command History

Release	Modification
Cisco IOS XE 3.3SE	This command was introduced.

This example shows how to configure persistent non-Wi-Fi device avoidance in the 802.11a channels:

```
Device(config)# default ap dot11 5ghz rrm channel device
```

## default ap dot11 24ghz cleanair alarm device

To configure the default value of the alarm for 2.4-GHz interference devices, use the **default ap dot11 24ghz cleanair alarm device** command in global configuration mode.

```
default ap dot11 24ghz cleanair alarm device {bt-discovery | bt-link | canopy | cont-tx |
dect-like | fh | inv | jammer | mw-oven | nonstd | superag | tdd-tx | video | wimax-fixed |
wimax-mobile | xbox | zigbee }
```

Syntax Description	
<b>bt-discovery</b>	Configures the alarm for Bluetooth interference devices.
<b>bt-link</b>	Configures the alarm for any Bluetooth link.
<b>canopy</b>	Configures the alarm for canopy interference devices.
<b>cont-tx</b>	Configures the alarm for continuous transmitters.
<b>dect-like</b>	Configures the alarm for Digital Enhanced Cordless Communication (DECT)-like phones.
<b>fh</b>	Configures the alarm for 802.11 frequency hopping (FH) devices.
<b>inv</b>	Configures the alarm for devices using spectrally inverted Wi-Fi signals.
<b>jammer</b>	Configures the alarm for jammer interference devices.
<b>mw-oven</b>	Configures the alarm for microwave ovens.
<b>nonstd</b>	Configures the alarm for devices using nonstandard Wi-Fi channels.
<b>superag</b>	Configures the alarm for 802.11 SuperAG interference devices.
<b>tdd-tx</b>	Configures the alarm for Time Division Duplex (TDD) transmitters.
<b>video</b>	Configures the alarm for video cameras.
<b>wimax-fixed</b>	Configures the alarm for WiMax fixed interference devices.
<b>wimax-mobile</b>	Configures the alarm for WiMax mobile interference devices.
<b>xbox</b>	Configures the alarm for Xbox interference devices.
<b>zigbee</b>	Configures the alarm for 802.15.4 interference devices.

**Command Default** The alarm for Wi-Fi inverted devices is enabled. The alarm for all the other devices is disabled.

**Command Modes** Global configuration (config)

Command History	Release	Modification
	Cisco IOS XE 3.3SE	This command was introduced.

**Usage Guidelines** You must enable CleanAir using the **ap dot11 24ghz cleanair** command before you configure this command.

This example shows how to configure the default CleanAir 2.4-GHz interference devices alarm:

```
Device(config)# default ap dot11 24ghz cleanair alarm device inv
```

## default ap dot11 24ghz cleanair device

To configure the default state of report generation for 2.4-GHz interference devices, use the **default ap dot11 24ghz cleanair device** command in global configuration mode.

```
default ap dot11 24ghz cleanair device {ble-beacon | bt-discovery | bt-link | canopy | cont-tx |
dect-like | fh | inv | jammer | mw-oven | nonstd | report | superag | tdd-tx | video | wimax-fixed |
wimax-mobile | xbox | zigbee}
```

Syntax Description		
	<b>ble-beacon</b>	Configure the BLE beacon feature.
	<b>bt-discovery</b>	Configures the alarm for Bluetooth interference devices.
	<b>bt-link</b>	Configures the alarm for any Bluetooth link.
	<b>canopy</b>	Configures the alarm for canopy interference devices.
	<b>cont-tx</b>	Configures the alarm for continuous transmitters.
	<b>dect-like</b>	Configures the alarm for Digital Enhanced Cordless Communication (DECT)-like phones.
	<b>fh</b>	Configures the alarm for 802.11 frequency hopping devices.
	<b>inv</b>	Configures the alarm for devices using spectrally inverted Wi-Fi signals.
	<b>jammer</b>	Configures the alarm for jammer interference devices.
	<b>mw-oven</b>	Configures the alarm for microwave ovens.
	<b>nonstd</b>	Configures the alarm for devices using nonstandard Wi-Fi channels.
	<b>superag</b>	Configures the alarm for 802.11 SuperAG interference devices.
	<b>tdd-tx</b>	Configures the alarm for Time Division Duplex (TDD) transmitters.
	<b>video</b>	Configures the alarm for video cameras.

<b>wimax-fixed</b>	Configures the alarm for WiMax fixed interference devices.
<b>wimax-mobile</b>	Configures the alarm for WiMax mobile interference devices.
<b>xbox</b>	Configures the alarm for Xbox interference devices.
<b>zigbee</b>	Configures the alarm for 802.15.4 interference devices.

**Command Default**

The alarm for Wi-Fi inverted devices is enabled. The alarm for all other devices is disabled.

**Command Modes**

Global configuration (config).

**Command History**

<b>Release</b>	<b>Modification</b>
Cisco IOS XE 3.3SE	This command was introduced.
Cisco IOS XE Denali 16.2.1	This command was modified. The <b>ble-beacon</b> keyword was added.

**Usage Guidelines**

You must enable CleanAir using the **ap dot11 24ghz cleanair** command before you configure this command.

This example shows how to enable CleanAir to report when a video camera interferes:

```
Device(config)# default ap dot11 24ghz cleanair device video
```

**Related Topics**

- [ap dot11 24ghz cleanair](#), on page 8

- [ap dot11 24ghz cleanair alarm device](#), on page 10

## default ap dot11 24ghz rrm channel cleanair-event

To configure the default Event-Driven radio resource management (EDRRM) state and sensitivity for 2.4-GHz devices, use the **default ap dot11 24ghz rrm channel cleanair-event** command in global configuration mode.

```
default ap dot11 24ghz rrm channel cleanair-event [sensitivity {high | low | medium}]
```

Syntax Description	sensitivity	Configures the EDRRM sensitivity of the CleanAir event.
	<b>high</b>	Specifies the highest sensitivity to non-Wi-Fi interference as indicated by the Air Quality (AQ) value.
	<b>low</b>	Specifies the least sensitivity to non-Wi-Fi interference as indicated by the AQ value.
	<b>medium</b>	Specifies medium sensitivity to non-Wi-Fi interference as indicated by the AQ value.

**Command Default** EDRRM is disabled and the sensitivity is low.

**Command Modes** Global configuration (config)

Command History	Release	Modification
	Cisco IOS XE 3.3SE Cisco IOS XE 3.3SE	This command was introduced.

This example shows how to enable EDRRM and set the default EDRRM sensitivity:

```
Device(config)# default ap dot11 24ghz rrm channel cleanair-event
Device(config)# default ap dot11 24ghz rrm channel cleanair-event sensitivity
```

## show ap dot11 5ghz cleanair air-quality summary

To display the CleanAir AQ data for 5-GHz band, use the **show ap dot11 5ghz cleanair air-quality summary** command in user EXEC mode or privileged EXEC mode.

### show ap dot11 5ghz cleanair air-quality summary

This command has no arguments or keywords.

#### Command Modes

User EXEC (>)

## show ap dot11 5ghz cleanair device type

To display the 5-GHz interference devices, use the **show ap dot11 5ghz cleanair device type** command.

**show ap dot11 5ghz cleanair device type** {all | canopy | cont-tx | dect-like | inv | jammer | nonstd | persistent | superag | tdd-tx | video | wimax-fixed | wimax-mobile}

Syntax Description	all	Displays all CleanAir interferer devices for 5-GHz band.
	<b>canopy</b>	Displays CleanAir interferers of type canopy for 5-GHz band.
	<b>cont-tx</b>	Displays CleanAir interferers of type continuous transmitter for 5-GHz band.
	<b>dect-like</b>	Displays CleanAir interferers of type Digital Enhanced Cordless Communication (DECT)-like phone for 5-GHz band.
	<b>inv</b>	Displays CleanAir interferer devices using spectrally inverted WiFi signals for 5-GHz band.
	<b>jammer</b>	Displays CleanAir interferers of type jammer for 5-GHz band.
	<b>nonstd</b>	Displays CleanAir interferer devices using non-standard Wi-Fi channels for 5-GHz band.
	<b>persistent</b>	Displays CleanAir persistent device interferers for 5-GHz band.
	<b>superag</b>	Displays CleanAir interferers of type SuperAG for 5-GHz band.
	<b>tdd-tx</b>	Displays CleanAir Time Division Duplex (TDD) transmitters for 5-GHz band.
	<b>video</b>	Displays CleanAir interferers of type video camera for 5-GHz band.
	<b>wimax-fixed</b>	Displays CleanAir interferers of type WiMax fixed for 5-GHz band.
	<b>wimax-mobile</b>	Displays CleanAir interferers of type WiMax mobile for 5-GHz band.
