

# Configuring LAG Aggregation

## SUMMARY STEPS

1. **ProvisionLacpPortType**
2. **setAggregationCfg aggPortConfig { aggEnabled | group | portNumber}**
3. **setAggregationCfg review**
4. **setAggregationCfg commit**
5. **setAggregationCfg exit**

## DETAILED STEPS

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 1</b>	<b>ProvisionLacpPortType</b>  <b>Example:</b> Switch(config-controller)# ProvisionLacpPortType	Enters the ProvisionLacpPortType mode.
<b>Step 2</b>	<b>setAggregationCfg aggPortConfig { aggEnabled   group   portNumber}</b>  <b>Example:</b> Switch(config-controller-ProvisionLacpPortType)# setAggregationCfg Switch(config-controller-ProvisionLacpPortType)# setAggregationCfg aggPortConfig Switch(config-controller-ProvisionLacpPortType)# setAggregationCfg aggPortConfig aggEnabled Switch(config-controller-ProvisionLacpPortType)# setAggregationCfg aggPortConfig group Switch(config-controller-ProvisionLacpPortType)# setAggregationCfg aggPortConfig portNumber	Configures Static LAG aggregation on LACP mode. <ul style="list-style-type: none"><li>• <b>aggEnabled</b><ul style="list-style-type: none"><li>• <b>enable</b>—Enable static LAG group on interface.</li><li>• <b>disable</b>—Disable static LAG group on interface.</li></ul></li><li>• <b>group</b>—Configure aggregation group.</li><li>• <b>portNumber</b>—Configure targeted interface on the controller .</li></ul>

**Viewing LAG Aggregation Commands on the controller .**

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 3</b>	<b>setAggregationCfg review</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType) # <b>setAggregationCfg review</b>	Displays the LACP aggregation configuration on the controller .
<b>Step 4</b>	<b>setAggregationCfg commit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType) # <b>setAggregationCfg commit</b>	Sends the LACP aggregation configuration on the controller .
<b>Step 5</b>	<b>setAggregationCfg exit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType) # <b>setAggregationCfg exit</b>	Exits the LACP aggregation configuration mode.

## Viewing LAG Aggregation Commands on the controller .

### SUMMARY STEPS

1. [ProvisionLacpPortType](#)
2. [getAggregationCfg aggPortConfig lacpPhysicalPort](#)
3. [getAggregationCfg review](#)
4. [getAggregationCfg commit](#)
5. [getAggregationCfg exit](#)

## DETAILED STEPS

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 1</b>	<b>ProvisionLacpPortType</b>  <b>Example:</b> Switch(config-controller) # ProvisionLacpPortType	Enters the ProvisionLacpPortType mode.
<b>Step 2</b>	<b>getAggregationCfg aggPortConfig lACPPhysicalPort</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType) # getAggregationCfg Switch(config-controller-ProvisionLacpPortType) # getAggregationCfg aggPortConfig Switch(config-controller-ProvisionLacpPortType) # getAggregationCfg aggPortConfig lACPPhysicalPort	• <b>lACPPhysicalPort</b> —Gets static aggregation request commands on controller .
<b>Step 3</b>	<b>getAggregationCfg review</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType) # getAggregationCfg review	Displays the LAG aggregation commands on the controller .
<b>Step 4</b>	<b>getAggregationCfg commit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType) # GetAggregationCfg commit	Sends the LAG aggregation configuration on the controller .
<b>Step 5</b>	<b>getAggregationCfg exit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType) # setAggregationCfg exit	Exits the LACP aggregation configuration mode.

# Configuring LAG Traffic Distribution Mode

## SUMMARY STEPS

1. **ProvisionLacpPortType**
2. **setAggregationMode aggModeConfig {dmac { enable | disable} | ip { enable | disable} | port { enable | disable} | smac { enable | disable} }**
3. **aggModeConfig review**
4. **aggModeConfig commit**
5. **aggModeConfig exit**

## DETAILED STEPS

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 1</b>	<b>ProvisionLacpPortType</b>  <b>Example:</b> Switch(config-controller)# ProvisionLacpPortType	Enters the ProvisionLacpPortType mode.
<b>Step 2</b>	<b>setAggregationMode aggModeConfig {dmac { enable   disable}   ip { enable   disable}   port { enable   disable}   smac { enable   disable} }</b>  <b>Example:</b> Switch(config-controller-ProvisionLacpPortType)# setAggregationMode aggModeConfig Switch(config-controller-ProvisionLacpPortType)# setAggregationMode aggModeConfig dmac enable Switch(config-controller-ProvisionLacpPortType)# setAggregationMode aggModeConfig ip enable Switch(config-controller-ProvisionLacpPortType)# setAggregationMode aggModeConfig port enable Switch(config-controller-ProvisionLacpPortType)# setAggregationMode aggModeConfig smac enable	Configures traffic distribution mode. <ul style="list-style-type: none"> <li>• <b>dmac</b> <ul style="list-style-type: none"> <li>• <b>enable</b>—Uses destination MAC address for traffic distribution.</li> <li>• <b>disable</b>—Does not use destination MAC address for traffic distribution.</li> </ul> </li> <li>• <b>ip</b> <ul style="list-style-type: none"> <li>• <b>enable</b>—Uses ip address for traffic distribution.</li> <li>• <b>disable</b>—Does not use ip address for traffic distribution.</li> </ul> </li> <li>• <b>port</b> <ul style="list-style-type: none"> <li>• <b>enable</b>—Uses ip port for traffic distribution.</li> <li>• <b>disable</b>—Does not use ip port for traffic distribution.</li> </ul> </li> <li>• <b>smac</b> <ul style="list-style-type: none"> <li>• <b>enable</b>—Uses source MAC address for traffic distribution.</li> <li>• <b>disable</b>—Does not use source MAC address for traffic distribution.</li> </ul> </li> </ul>

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 3</b>	<b>aggModeConfig review</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType)# <b>aggModeConfig review</b>	Displays the LACP aggregation configuration mode commands on the controller .
<b>Step 4</b>	<b>aggModeConfig commit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType)# <b>aggModeConfig commit</b>	Sends the LACP aggregation mode configuration commands on the controller .
<b>Step 5</b>	<b>aggModeConfig exit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType)# <b>aggModeConfig exit</b>	Exists the LACP aggregation configuration mode.

## Viewing LAG Traffic Distribution Mode

### SUMMARY STEPS

1. **ProvisionLacpPortType**
2. **getAggregationMode aggModeConfigReq**
3. **getAggregationMode review**
4. **getAggregationMode commit**
5. **getAggregationMode exit**

### DETAILED STEPS

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 1</b>	<b>ProvisionLacpPortType</b>  <b>Example:</b> Switch(config-controller)# ProvisionLacpPortType	Enters the ProvisionLacpPortType mode.
<b>Step 2</b>	<b>getAggregationMode aggModeConfigReq</b>	• <b>aggModeConfigReq</b> —Gets aggregation mode configuration

	<b>Command or Action</b>	<b>Purpose</b>
	<b>Example:</b>  Switch(config-controller-ProvisionLacpPortType)# getAggregationMode aggModeConfigReq	
<b>Step 3</b>	<b>getAggregationMode review</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType)# getAggregationMode review	Displays the aggregation configuration mode commands on the controller .
<b>Step 4</b>	<b>getAggregationMode commit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType)# getAggregationMode commit	Sends the LACP aggregation mode configuration commands on the controller .
<b>Step 5</b>	<b>getAggregationMode exit</b>  <b>Example:</b>  Switch(config-controller-ProvisionLacpPortType)# getAggregationMode exit	Exits the LACP aggregation configuration mode.

## Viewing Static Aggregation Group

### SUMMARY STEPS

1. ProvisionLacpPortType
2. showAggregation showAggConfigReq
3. showAggregation review
4. showAggregation commit
5. setAggregationCfg exit

## DETAILED STEPS

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 1</b>	<b>ProvisionLacpPortType</b>  <b>Example:</b> Switch(config-controller)# ProvisionLacpPortType	Enters the ProvisionLacpPortType mode.
<b>Step 2</b>	<b>showAggregation showAggConfigReq</b>  <b>Example:</b> Switch(config-controller-ProvisionLacpPortType)# showAggregation Switch(config-controller-ProvisionLacpPortType)# showAggregation showAggConfigReq	Displays Static LAG aggregation on LACP mode.  • <b>showAggConfigReq</b> —Displays all on the controller .
<b>Step 3</b>	<b>showAggregation review</b>  <b>Example:</b> Switch(config-controller-ProvisionLacpPortType)# <b>showAggregation review</b>	Displays the LAG aggregation configuration on the controller .
<b>Step 4</b>	<b>showAggregation commit</b>  <b>Example:</b> Switch(config-controller-ProvisionLacpPortType)# <b>setAggregationCfg commit</b>	Sends the LAG aggregation configuration on the controller .
<b>Step 5</b>	<b>setAggregationCfg exit</b>  <b>Example:</b> Switch(config-controller-ProvisionLacpPortType)# <b>setAggregationCfg exit</b>	Exists the LACP aggregation configuration mode.
