

Running Diagnostic Tests Using the GUI

This chapter contains the following sections:

- [About Quick Tests, page 1](#)
- [Running Quick Tests, page 1](#)
- [About Comprehensive Tests, page 2](#)
- [Running Comprehensive Tests, page 2](#)
- [About Test Suites, page 2](#)
- [Running Tests in a Test Suite, page 2](#)

About Quick Tests

Quick tests performs a quick diagnostics of your server components to determine any hardware issues or failures. Depending on the Cisco UCS Server that you are using and the memory available on your server, these tests usually take 20 to 30 minutes to quickly test the overall functionality of your main subsystems.

Running Quick Tests

Procedure

- Step 1** In the **Navigation** pane, expand **Diagnostic Tools**.
- Step 2** Expand **Tests**.
- Step 3** Click **Quick Tests**.
- Step 4** In the **Contents** pane, click **Run all Quick Tests**.
Note You can run all quick tests, or expand **Quick Tests** to choose individual options.
- Step 5** Click **Tests log Summary** to view all tests that are currently in the queue.

The tests are run in the order as listed in the **Test Suite** table. The results are displayed in the **Test Status** area in the **Contents** pane.

Step 6 To clear the system events log, in the **Contents** pane, click **Clear SEL**.

About Comprehensive Tests

Comprehensive tests can run for several hours or days. These tests run exhaustive burn-in tests on your server, such as stress tests. The tests are designed to test multiple hardware components and find issues that might be caused by multiple components on your server.

Running Comprehensive Tests

You can customize comprehensive tests to diagnose specific conditions based on your requirements.

Procedure

Step 1 In the **Navigation** pane, expand **Diagnostic Tools**.

Step 2 Expand **Tests**.

Step 3 Click **Comprehensive Tests**.

Step 4 In the **Contents** pane, click **Run all comprehensive tests**.

Note You can run all comprehensive tests, or expand **Comprehensive Tests** to choose individual options.

Step 5 Click **Tests log Summary** to view all tests that are currently in the queue. The test is run in the order as listed in the **Test Suite** table. The results are displayed in the **Test Status** area in the **Contents** pane.

Step 6 To clear the system events log, in the **Contents** pane, click **Clear SEL**.

About Test Suites

You can run more than one test at the same time using a test suite. Each test that you select is run consecutively, and the results are displayed in the **Test Status** area in the **Contents** pane.

Running Tests in a Test Suite

Note Running tests in a suite is available from the GUI mode only.

Procedure

- Step 1** In the **Navigation** pane, expand **Diagnostic Tools**.
 - Step 2** Click **Test Suite**.
 - Step 3** In the **Contents** pane, check the check box for the tests that you want to run in the suite.
 - Step 4** In the **Contents** pane, click **Run Tests Suite**.
The tests are added to the **Test Suite** queue.
 - Step 5** In the **Navigation** pane, click **Tests Log Summary** to view the execution status of these tests.
