Backup Device List

The Backup Device List page appears when you choose **Backup > Backup Device**.

Authorization Requirements

You must have platform administrator authority to access this page.

Description

Use the Backup Device List page to list, add, and delete backup devices.

The following table describes the Backup Device List page.

Table 1: Backup Device List Page

| Field | Description |
|----------------------------|---|
| Backup Device List | Lists the configured backup devices and displays the Device Name, Device Type, and Device Path. Click on the Device Name link to bring up the Backup Device page for that device. |
| Add New button | Adds a new backup device. When you click the Add icon, the Backup Device page appears. See Table 2: Backup Device Page, on page 2 for information about the Backup Device page. |
| Select All button and icon | Selects all the listed backup devices. |
| Clear All button and icon | Deselects all selected backup devices. |

| Field | Description |
|---------------------------------|--------------------------------------|
| Delete Selected button and icon | Deletes the selected backup devices. |

The following table describes the Backup Device page, which you use to add new backup devices.

Table 2: Backup Device Page

| Field | Description |
|---|---|
| Backup device name | Enter the device name in the text box (required). |
| Select Destination | To select the backup destination, click the Tape Device or Network Directory radio button (required). |
| Tape Device | Select the name of the tape device from the pull-down menu. |
| Network Directory | In the fields provided, enter the Server name, Path name, User name, and Password for the Network Directory. |
| Number of backups to store on the Network Directory | Select the number of backups using the pull-down menu. |
| Save button and icon | Saves the information about the new backup device. |
| Back button and icon | Returns to the Backup Device List page. |

Manual Backup

The Manual Backup page appears when you choose **Backup > Manual Backup**.

Authorization Requirements

You must have platform administrator authority to access this page.

Description

Use the Manual Backup page to start a manual backup.

Note

Before starting a manual backup, make sure that all servers in the clusters are running and are reachable over the network. Servers that are not running or are not reachable over the network are not backed up.

Note

From Release 14SU2 onwards, tomcat and tomcat-ecdsa certificate must be exchanged between the publisher and subscriber nodes before taking drs backup. Certificate exchange is also required if the ipaddress/hostname changes.

The following table describes the Manual Backup page.

Table 5: Manual Backup Page

| Field | Description |
|------------------------------|--|
| Select Backup Device | Select the name of the backup device from the pulldown menu. |
| Select Features | Check Emergency Responder as the feature to be backed up. |
| Start Backup button or icon | Starts a manual backup. |
| Estimate Size button or icon | Estimates the backup size for the selected feature |
| Select All button or icon | Selects all the listed features. |
| Clear All button or icon | Deselects all selected features. |

Restore Wizard

The Restore Wizard page appears when you choose **Restore > Restore Wizard**.

Authorization Requirements

You must have platform administrator authority to access this page.

Description

Use the Restore Wizard page to restore a backup file to a server or to restore all servers in a cluster. The Restore Wizard consists of four web pages.

Use the Step1 Restore—Choose Backup Device page to select the backup device to be used for the backup.

The following table describes the Step1 Restore—Choose Backup Device page.

Table 9: Step 1 Restore—Choose Backup Device Page

| Field | Description |
|-----------------------|---|
| Status | Indicates the current status of the recovery operation. |
| Select Backup Device | Select the backup device using the pull-down menu. |
| Next button or icon | Advances to the next page in the Restore Wizard. |
| Cancel button or icon | Cancels the restore operation. |

Use the Step2 Restore—Choose the Backup Tar File page to select the backup tar file to be restored.

The following table describes the Step2 Restore—Choose the Backup Tar File page.

Table 10: Step 2 Restore—Choose the Backup Tar File Page

| Field | Description |
|-----------------------|--|
| Status | Indicates the current status of the restore operation. |
| Select Backup File | Use the pull-down menu to select the tar file for backup |
| Back button or icon | Returns to the previous page in the Restore Wizard. |
| Next button or icon | Advances to the next page in the Restore Wizard. |
| Cancel button or icon | Cancels the restore operation. |

Use the Step3 Restore—Select the Type of Restore page to select the features to be restored.

The following table describes the Step3 Restore—Select the Type of Restore page.

Table 11: Step 3 Restore—Select the Type of Restore Page

| Field | Description |
|---------------------|---|
| Status | Indicates the current status of the restore operation. |
| Select Features | Click the box to the left of the Emergency Responder feature name to select the Emergency Responder feature for backup. |
| Back button or icon | Returns to the previous page in the Restore Wizard. |

| Field | Description |
|-----------------------|--|
| Next button or icon | Advances to the next page in the Restore Wizard. |
| Cancel button or icon | Cancels the restore operation. |

Use the Step4 Restore—Final Warning for Restore page to select the servers to be restored.

The following table describes the Step4 Restore—Final Warning for Restore page.

Table 12: Step 4 Restore—Final Warning for Restore Page

| Field | Description |
|--|--|
| Status | Indicates the current status of the restore operation. |
| Warning | Displays a warning message stating that the restore operation overwrites all existing data on the selected servers. |
| Select the Servers to be restored for each Feature | Under the Emergency Responder feature name, select the servers to be restored. To do so, click the check box to the left of the server name. |
| Back button or icon | Returns to the previous page in the Restore Wizard. |
| Restore button or icon | Initiates the restore operation. Before you click Restore , you must first select the server to be restored. You can select a Publisher or a Subscriber to be restored, but not both. |
| | Caution The restore operation overwrites any existing data on the selected servers. |
| Cancel button or icon | Cancels the restore operation. |
