## Cisco Unified Communications Manager Device Package Compatibility Matrix - Historical

**Published: January 30, 2014**

**Revised: April 30, 2015**

Use this section to obtain Cisco Unified Communications Manager (Unified CM) device packs available for:

- Unified CM 10.5(1)
- Unified CM 10.0(1)
- Unified CM 9.1(1)
- Unified CM 9.0(1)
- Unified CM 8.0(3)
- Unified CM 7.1(5)

A device pack introduces new phone types to Unified CM, and it installs the firmware and the configuration files needed to enable features on your Cisco device. New features may be turned off by default and they have attributes or settings that must be configured.

Device packages are available from the Cisco Unified Communications Manager software download page. To obtain a device package, click on the Unified CM device pack link in the table and a new browser window or tab opens. You will need your Cisco login.

For the latest device pack releases, see [Cisco Unified Communications Manager Device Package Compatibility Matrix - Current](#).
