## Bug Search Tool

The system grades known problems (bugs) per severity level. These release notes contain descriptions of the following bug levels:

- All severity level 1 or 2 bugs
- Significant severity level 3 bugs
- All customer-found bugs

You can search for open and resolved caveats of any severity for any release using the Cisco Bug Search tool, an online tool available for customers to query defects according to their own needs.

To access the Cisco Bug Search tool, you need the following items:

- Internet connection
- Web browser
- Cisco.com user ID and password

Follow these steps to use Cisco Bug Search tool:

1. Access the Cisco Bug Search tool: <https://tools.cisco.com/bugsearch/>.
2. Log in with your Cisco.com user ID and password.
3. If you are looking for information about a specific problem, enter the bug ID number in the **Search for:** field and click **Go**.

---

**Tip** Click **Help** on the Bug Search page for information about how to search for bugs, create saved searches, and create bug groups.

---

## Resolved Caveats

Cisco Prime Collaboration Deployment fixes to the following defect

**Table 1: Resolved Caveats**

Identifier	Headline
CSCvm92892	Phone cop file upgrade cancelling operation takes a lot of time
CSCvo66994	PCD to allow ESXi passwords longer than 15 characters
CSCvp28708	After upgrade to PCD 12.5 NAT IP column in already discovered cluster is missing
CSCvp15659	PCD 12.5 fails to discover NATed UCM-cluster in certain conditions
CSCvp45619	PCD: An upgrade task to apply a cop file fails instantly for multiple nodes
CSCvp53080	PCD showing wrong active version for Unity Connection in sequence steps
CSCva95404	PCD 11.5 gives error adding ESXi host with pw longer than 16 characters
CSCvq13998	6.1.5 cluster discovery failed using PCD 12.5
CSCvp65877	PCD cop upgrade task to multinode cluster will fail when first step is edited to pause
CSCvp68525	Sequence Steps not loading for IMP Pub Sub Upgrade task combination

## Open Caveats

Following are the open caveats for this release:

**Table 2: Open Caveats**

Identifier	Headline
CSCvo80807	PCD: Max thread count to have as configurable value
CSCvp86872	Insert step option for tasks is not behaving as expected
