CHAPTER 106

End User Configuration

The End User Configuration window in Cisco Unified Communications Manager Administration allows the administrator to add, search, display, and maintain information about Cisco Unified Communications Manager end users.

Note
Cisco does not support LDAP directory services with Cisco Unified Communications Manager Business Edition.

The following topics contain information on managing end user directory information:

- Finding an End User, page 106-1
- Configuring an End User, page 106-3
- Creating a Cisco Unity or Cisco Unity Connection Voice Mailbox, page 106-4
- End User Configuration Settings, page 106-5
- Changing an End User Password, page 106-10
- Changing an End User PIN, page 106-11
- Managing End User Credential Information, page 106-11
- Credential Settings and Fields, page 106-12
- Configuring User-Related Information for End Users, page 106-13
- Associating Devices to an End User, page 106-14
- Associating Cisco Extension Mobility Profiles, page 106-16
- Deleting an End User, page 106-17

Additional Information
See the “Related Topics” section on page 106-18.

Finding an End User

Cisco Unified Communications Manager lets you find end user information on the basis of specific criteria. Use the following procedure to find end user information.
Finding an End User

Note During your work in a browser session, Cisco Unified Communications Manager Administration retains your search preferences. If you navigate to other menu items and return to this menu item, Cisco Unified Communications Manager Administration retains your search preferences until you modify your search or close the browser.

Procedure

Step 1 Choose User Management > End User.
The Find and List Users window displays. Records from an active (prior) query may also display in the window.

Step 2 To find all records in the database, ensure the dialog box is empty; go to Step 3.
To filter or search records
- From the first drop-down list box, select a search parameter.
- From the second drop-down list box, select a search pattern.
- Specify the appropriate search text, if applicable.

Note To add additional search criteria, click the + button. When you add criteria, the system searches for a record that matches all criteria that you specify. To remove criteria, click the – button to remove the last added criterion or click the Clear Filter button to remove all added search criteria.

Step 3 Click Find.
All or matching records display. You can change the number of items that display on each page by choosing a different value from the Rows per Page drop-down list box.

Note You can delete multiple records from the database by checking the check boxes next to the appropriate record and clicking Delete Selected. You can delete all configurable records for this selection by clicking Select All and then clicking Delete Selected.

Step 4 From the list of records that display, click the link for the record that you want to view.

Note To reverse the sort order, click the up or down arrow, if available, in the list header.

The window displays the item that you choose.

Additional Information
See the “Related Topics” section on page 106-18.
Configuring an End User

The following procedure provides instructions on adding and configuring an end user.

---

**Note**

To add end users for Cisco Unity Connection, you must first configure the end user in Cisco Unified Communications Manager. You can then configure an end user voice mailbox in Cisco Unified Communications Manager Administration, as described in the “Creating a Cisco Unity or Cisco Unity Connection Voice Mailbox” section on page 106-4. You can also use the tools in Cisco Unity Connection, such as Import Users, to add voice mail users to the Connection database, as described in the applicable User Moves, Adds, and Changes Guide for Cisco Unity Connection.

You must configure User ID and Directory Extension for the user in Cisco Unified Communications Manager before you can configure the end user in Cisco Unity Connection. You cannot create a Cisco Unity Connection user without a corresponding Cisco Unified Communications Manager user. You cannot delete an end user in Cisco Unity Connection. The End User Configuration window provides a link, Edit Cisco Unity User in the Related Links drop-down list box, to the Cisco Unity Connection > Edit User window to edit Connection settings. Refer to the applicable User Moves, Adds, and Changes Guide for Cisco Unity Connection for more information.

---

**Procedure**

**Step 1** Choose **User Management > End User**.

The Find and List End Users window displays. Use the two drop-down list boxes to search for an end user.

**Step 2** Click **Add New**.

The End User Configuration window displays.

**Step 3** Enter the appropriate settings as described in Table 106-1.

**Step 4** When you have completed the end user information, save your changes and add the end user by clicking **Save**.

---

**Next Steps**

If you want to associate devices to this end user, continue with the “Associating Devices to an End User” procedure.

To manage credentials for this end user, continue with the “Managing End User Credential Information” procedure.

To create a Cisco Unity or Cisco Unity Connection Voice Mailbox for this user in Cisco Unified Communications Manager Administration, continue with the procedure in “Creating a Cisco Unity or Cisco Unity Connection Voice Mailbox” section on page 106-4.

To configure a voice mailbox and other Connection settings for this user in Cisco Unity Connection Administration, see the applicable User Moves, Adds, and Changes Guide for Cisco Unity Connection. To import users into the Connection database in Cisco Unity Connection Administration, refer to the User Moves, Adds, and Changes Guide for Cisco Unity Connection. (The system does not support the import feature for Cisco Unity Connection 1.1 or 1.2.)
Creating a Cisco Unity or Cisco Unity Connection Voice Mailbox

The “Create Cisco Unity User” link on the End User Configuration window allows you to create individual Cisco Unity or Cisco Unity Connection voice mailboxes in Cisco Unified Communications Manager Administration.

Note
Cisco does not support Cisco Unity on Cisco Unified Communications Manager Business Edition systems.

Before You Begin

• Ensure that you have defined an appropriate template and class of service (COS) for any voice mail users that you plan to add in Cisco Unified Communications Manager Administration. For Connection users, refer to the applicable User Moves, Adds, and Changes Guide for Cisco Unity Connection. For Unity users, refer to the Cisco Unity System Administration Guide.

• You must associate a device and a Primary Extension Number to the end user before the Create Cisco Unity User link displays. The link displays in the Related Links menu.

Note
The Directory Number Configuration window also includes the “Create Cisco Unity User” link.

Procedure

Step 1
Find the end user, as described in “Finding an End User” section on page 106-1.

Step 2
Verify that a primary extension number is associated with this user.

Note
You must ensure that you have defined a primary extension; otherwise, the “Create Cisco Unity User” link will not display in the Related Links drop-down list box.

Step 3
From the Related Links drop-down list box, in the upper, right corner of the window, choose the “Create Cisco Unity User” link and click Go.

The Add Cisco Unity User dialog box displays.

Step 4
From the Application Server drop-down list box, choose the Cisco Unity or Cisco Unity Connection server on which you want to create a Cisco Unity or Cisco Unity Connection user and click Next.

Step 5
From the Subscriber Template drop-down list box, choose the subscriber template that you want to use.

Step 6
Click Save.

The Cisco Unity mailbox gets created. The link, in Related Links, changes to “Edit Cisco Unity User” in the End User Configuration window. You can now view the user that you created in Cisco Unity Administration or Cisco Unity Connection Administration.
When the Cisco Unity or Cisco Unity Connection user is integrated with the Cisco Unified Communications Manager End User, you cannot edit fields such as Alias (User ID in Cisco Unified Communications Manager Administration); First Name; Last Name; Extension (Primary Extension in Cisco Unified Communications Manager Administration), and so on, in Cisco Unity Administration or Cisco Unity Connection Administration. You can only update these fields in Cisco Unified Communications Manager Administration.

Note
Cisco Unity and Cisco Unity Connection monitor the synchronization of data from Cisco Unified Communications Manager. You can configure the sync time in Cisco Unity Administration or Cisco Unity Connection Administration at the Tools menu. For Cisco Unity Connection, refer to the User Moves, Adds, and Changes Guide for Cisco Unity Connection for more information. For Cisco Unity, refer to the Cisco Unity System Administration Guide.

Additional Information
See the “Related Topics” section on page 106-18.

End User Configuration Settings

Table 106-1 describes the end user configuration settings. For related procedures, see the “Related Topics” section on page 106-18.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Information</td>
<td></td>
</tr>
<tr>
<td>LDAP Sync Status</td>
<td>This field displays the LDAP synchronization status, which you set with the System &gt; LDAP &gt; LDAP System menu option. Cisco does not support this field for systems.</td>
</tr>
<tr>
<td>User ID</td>
<td>Enter the unique end user identification name.</td>
</tr>
<tr>
<td>Password / Edit Credential</td>
<td>Enter alphanumeric or special characters for the end user password. You must enter at least the minimum number of characters that are specified in the assigned credential policy (1-127 characters). The Edit Credential button displays after this user is added to the database. Click the Edit Credential button to manage credential information for this user. See Managing End User Credential Information, page 106-11.</td>
</tr>
<tr>
<td>Confirm Password</td>
<td>Enter the end user password again.</td>
</tr>
</tbody>
</table>
### Table 106-1   End User Configuration Settings (continued)

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PIN / Edit Credential</td>
<td>Enter numeric characters for the end user PIN. You must enter at least the minimum number of characters that are specified in the assigned credential policy (1-127 characters). The Edit Credential button displays after you add this user to the database. Click the Edit Credential button to manage credential information for this user. See Managing End User Credential Information, page 106-11.</td>
</tr>
<tr>
<td>Confirm PIN</td>
<td>Enter the PIN again.</td>
</tr>
<tr>
<td>Last Name</td>
<td>Enter the end user last name.</td>
</tr>
<tr>
<td>Middle Name</td>
<td>Enter the end user middle name.</td>
</tr>
<tr>
<td>First Name</td>
<td>Enter the end user first name.</td>
</tr>
<tr>
<td>Telephone Number</td>
<td>Enter the end user telephone number. You may use the following special characters: (, ), and -.</td>
</tr>
<tr>
<td>Mail ID</td>
<td>Enter the end user’s email address.</td>
</tr>
<tr>
<td>Manager User ID</td>
<td>Enter the user ID of the end user manager ID. The manager user ID that you enter must already exist in the directory as an end user.</td>
</tr>
<tr>
<td>Department</td>
<td>Enter the end user department information (for example, the department number or name).</td>
</tr>
<tr>
<td>User Locale</td>
<td>From the drop-down list box, choose the locale that is associated with the end user. The user locale identifies a set of detailed information to support end users, including language and font.Cisco Unified Communications Manager uses this locale for extension mobility and the Cisco Unified IP Phone User Options. For Cisco Extension Mobility log on, the locale that is specified here takes precedence over the device and device profile settings. For Cisco Extension Mobility log off, Cisco Unified Communications Manager uses the end user locale that the default device profile specifies. <strong>Note</strong> If you do not choose an end user locale, the locale that is specified in the Cisco CallManager service parameters as Default User Locale applies.</td>
</tr>
<tr>
<td>Associated PC</td>
<td>This required field applies for Cisco IP Softphone and Cisco Unified Communications Manager Attendant Console users.</td>
</tr>
<tr>
<td>Digest Credentials</td>
<td>Enter a string of alphanumeric characters. Cisco Unified Communications Manager uses the digest credentials that you specify here to validate the credentials that the phone offers during digest authentication. The digest credentials that you enter in this field get associated with the phone when you choose a digest user in the Phone Configuration window. <strong>Note</strong> For more information on digest authentication, refer to the Cisco Unified Communications Manager Security Guide.</td>
</tr>
<tr>
<td>Confirm Digest Credentials</td>
<td>To confirm that you entered the digest credentials correctly, re-enter the credentials in this field.</td>
</tr>
</tbody>
</table>
### Table 106-1  End User Configuration Settings (continued)

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Device Associations</strong></td>
<td></td>
</tr>
<tr>
<td>Controlled Devices</td>
<td>After the device is associated, this field displays the description information (for example, the MAC address) that the end user controls.</td>
</tr>
<tr>
<td></td>
<td>This field displays after you create a user in the database. To associate a device with this end user, click the <strong>Device Association</strong> button on the right. See the &quot;Associating Devices to an End User&quot; section on page 106-14 for a detailed procedure.</td>
</tr>
<tr>
<td><strong>Extension Mobility</strong></td>
<td></td>
</tr>
<tr>
<td>Available Profiles</td>
<td>This list box displays the extension mobility profiles that are available for association with this end user.</td>
</tr>
<tr>
<td></td>
<td>To search for an extension mobility profile, click <strong>Find</strong>. Use the Find and List Device Profiles window that displays to search for the extension mobility profile that you want.</td>
</tr>
<tr>
<td></td>
<td>To associate an extension mobility profile with this end user, select the profile and click the Down arrow below this list box.</td>
</tr>
<tr>
<td>Controlled Profiles</td>
<td>This field displays a list of controlled device profiles that are associated with an end user who is configured for Cisco Extension Mobility.</td>
</tr>
<tr>
<td>Default Profile</td>
<td>From the drop-down list box, choose a default extension mobility profile for this end user.</td>
</tr>
<tr>
<td>Presence Group</td>
<td>Configure this field with the Presence feature.</td>
</tr>
<tr>
<td></td>
<td>From the drop-down list box, choose a Presence group for the end user. The selected group specifies the destinations that the end user can monitor.</td>
</tr>
<tr>
<td></td>
<td>The default value for Presence Group specifies Standard Presence group, configured with installation. Presence groups that are configured in Cisco Unified Communications Manager Administration also appear in the drop-down list box.</td>
</tr>
<tr>
<td></td>
<td>Presence authorization works with presence groups to allow or block presence requests between groups. Refer to the “Presence” chapter in the Cisco Unified Communications Manager Features and Services Guide for information about configuring permissions between groups and how presence works with extension mobility.</td>
</tr>
</tbody>
</table>
End User Configuration Settings

Table 106-1  End User Configuration Settings (continued)

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUBSCRIBE Calling</td>
<td>Supported with the Presence feature, the SUBSCRIBE calling search space determines how Cisco Unified Communications Manager routes presence requests that come from the end user. This setting allows you to apply a calling search space separate from the call-processing search space for presence (SUBSCRIBE) requests for the end user. From the drop-down list box, choose the SUBSCRIBE calling search space to use for presence requests for the end user. All calling search spaces that you configure in Cisco Unified Communications Manager Administration display in the SUBSCRIBE Calling Search Space drop-down list box. If you do not select a different calling search space for the end user from the drop-down list, the SUBSCRIBE calling search space defaults to None. To configure a SUBSCRIBE calling search space specifically for this purpose, you configure a calling search space as you do all calling search spaces. For information on how to configure a calling search space, see the “Calling Search Space Configuration” section on page 46-1.</td>
</tr>
<tr>
<td>Search Space</td>
<td></td>
</tr>
<tr>
<td>Allow Control of Device</td>
<td>Allow Control of Device from CTI -- If this check box is checked, when the user logs in to a device, the AllowCTIControlFlag device property becomes active, which allows control of the device from CTI applications. Until the user logs in to a device, this setting has no effect. Note: The Allow Control of Device from CTI setting in the end user configuration overrides the AllowCTIControlFlag device property of the device to which the user logs in.</td>
</tr>
<tr>
<td>from CTI</td>
<td></td>
</tr>
<tr>
<td>Directory Number</td>
<td>This field represents the primary directory number for the end user. End users can have multiple lines on their phones. When you associate devices to the end user, directory numbers configured on the associated device become available in the drop-down list box for Primary Extension. From the drop-down list box, choose a primary extension for this end user. If the system is integrated with Cisco Unity or Cisco Unity Connection, the Create Cisco Unity User link displays in the Related Links menu.</td>
</tr>
<tr>
<td>Associations</td>
<td></td>
</tr>
<tr>
<td>Primary Extension</td>
<td>From the drop-down list box, choose an IPCC extension for this end user. Note: This field displays only if the IPCC Express Installed enterprise parameter is set to True.</td>
</tr>
<tr>
<td>IPCC Extension</td>
<td></td>
</tr>
<tr>
<td>Mobility Information</td>
<td>Check this check box to activate Mobile Connect, which allows the user to manage calls by using a single phone number and to pick up in-progress calls on the desktop phone and cellular phone. When this check box is checked, two device license units get consumed (see Licensing in the Cisco Unified Communications Manager System Guide).</td>
</tr>
<tr>
<td>Enable Mobility</td>
<td></td>
</tr>

</thead>
<tbody>
<tr>
<td>Associated CAPF Profiles</td>
<td>This pane displays the Instance ID from the CAPF Profile that you configured for this user. To view or update the profile, double-click the Instance ID or click the Instance ID to highlight it; then, click View Details. The End User CAPF Profile Configuration window displays with the current settings. For information on how to configure the End User CAPF Profile, refer to the Cisco Unified Communications Manager Security Guide.</td>
</tr>
</tbody>
</table>
Changing an End User Password

Use the following procedure to change the password for an end user in Cisco Unified Communications Manager Administration.

**Note** If this user is a Cisco Unity Connection user, you can also change the password in Cisco Unity Connection Administration; however, you cannot change any password policies or credential settings for the user in Connection.

**Procedure**

**Step 1** Use the procedure in the “Finding an End User” section on page 106-1 to find the end user configuration. The End User Configuration window displays the configuration information.

**Step 2** In the Password field, double-click the existing password, which is encrypted, and enter the new password. You must enter at least the minimum number of characters that are specified in the assigned credential policy (1-127 characters).

---

**Table 106-1 End User Configuration Settings (continued)**

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Permissions Information</td>
<td></td>
</tr>
<tr>
<td>Groups</td>
<td>This list box displays after an end user record has been saved. The list box displays the groups to which the end user belongs. To add the user to one or more user groups, click the <strong>Add to User Group</strong> button. The Find and List User Groups window opens as a separate window. Locate the groups to which you want to add the user, click in the check boxes beside those groups, and click <strong>Add Selected</strong> at the bottom of the window. The Find and List User Groups window closes, and the End User Configuration window displays and now shows the selected groups in the Groups list box. To remove the user from a group, highlight the group in the Groups list box and click the <strong>Remove from User Group</strong> button. To view or update a group, double-click the group name or click the group name to highlight it; then, click <strong>View Details</strong>. The User Group Configuration window displays with the current settings. For more information on finding and configuring user groups, see the “User Group Configuration” section on page 108-1.</td>
</tr>
<tr>
<td>Roles</td>
<td>This list box displays after an end user has been added, the Groups list box has been populated, and the user record has been saved. The list box displays the roles that are assigned to the end user. To view or update a role, double-click the role name or click the role name to highlight it; then, click <strong>View Details</strong>. The Role Configuration window displays with the current settings. For more information on configuring roles, see the “Role Configuration” section on page 107-1.</td>
</tr>
</tbody>
</table>
Changing an End User PIN

Use the following procedure to change the personal identification number (PIN) for an end user.

Procedure

Step 1  Use the procedure in the “Finding an End User” section on page 106-1 to find the end user configuration. The End User Configuration window displays the configuration information.

Step 2  In the PIN field, double-click the existing PIN, which is encrypted, and enter the new PIN. You must enter at least the minimum number of characters that are specified in the assigned credential policy (1-127 characters).

Step 3  In the Confirm PIN field, double-click the existing, encrypted PIN and enter the new PIN again.

Step 4  Click Save.

Additional Information
See the “Related Topics” section on page 106-18.

Managing End User Credential Information

Use the following procedure to change or view credential information, such as the associated authentication rules, the associated credential policy, or the time of last password change for an end user. You can edit user credentials only after the user exists in the database.

Note
The credential settings that you apply to an end user also apply to Connection users. You cannot modify any password policies or credential settings in Connection, except to change the password for Connection users.

In the user Credential Configuration window, you cannot save settings that conflict with the assigned credential policy. For example, if the policy has the Never Expires check box checked, you cannot uncheck and save the Does Not Expire check box in the user Credential Configuration window. You can, however, set a different credential expiration for the user, including Does Not Expire, if the Never Expires policy setting is not checked; the user setting overrides the policy setting.

In the user Credential Configuration window, you cannot change settings that conflict with other settings in the user Credential Configuration window. For example, if the User Cannot Change check box is checked, you cannot check the User Must Change at Next Login check box.
The credential configuration window reports approximate event times; the system updates the form at the next authentication query or event.

**Before You Begin**
Create the end user in the database. See “Configuring an End User” section on page 106-3.

**Procedure**

**Step 1**
To find the end user configuration, use the procedure in the “Finding an End User” section on page 106-1.

The End User Configuration window displays the configuration information.

**Step 2**
To change or view password information, click the Edit Credential button next to the Password field. To change or view PIN information, click the Edit Credential button next to the PIN field.

**Step 3**
Enter the appropriate settings as described in Table 106-2.

**Step 4**
If you have changed any settings, click Save.

**Additional Information**
See the “Related Topics” section on page 106-18.

**Credential Settings and Fields**

Table 106-2 describes the credential settings for end users and application users. These settings do not apply to application user or end user digest credentials. For related procedures, see the “Related Topics” section on page 106-18.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Locked By Administrator</td>
<td>Check this check box to lock this account and block access for this user. Uncheck this check box to unlock the account and allow access for this user.</td>

</table>

Configuring User-Related Information for End Users

After you add a new end user, you can configure additional information related to the end user. This information allows each end user to personalize phone features, Manager Configuration, Assistant Configuration, Cisco Extension Mobility, Cisco Unified Communications Manager Auto-Attendant, and Cisco IP Softphone capability.

Before You Begin
Make sure that the end user is in the database. See the “Finding an End User” section on page 106-1 for more information.
### Procedure

**Step 1**
Use the procedure in the “Finding an End User” section on page 106-1 to find the end user whose application profile(s) you want to configure. Click the userid.

The End User Configuration window displays with information about the chosen end user.

**Step 2**
To configure a manager for Cisco Unified Communications Manager Assistant for this end user, from the Related Links drop-down list box, choose Manager Configuration and click **Go**.

The Manager Configuration window displays for this end user. Refer to the “Cisco Unified Communications Manager Assistant With Proxy Line Support” and “Cisco Unified Communications Manager Assistant With Shared Line Support” chapters in the Cisco Unified Communications Manager Features and Services Guide for details of configuring Cisco Unified Communications Manager Assistant.

After you configure the Manager information for this end user, you can return to the End User Configuration window for this end user. From the Related Links drop-down list box in the Manager Configuration window, choose Back to User Configuration and click **Go**.

**Step 3**
To configure an assistant for Cisco Unified Communications Manager Assistant for this end user, from the Related Links drop-down list box, choose Assistant Configuration and click **Go**.

The Assistant Configuration window displays for this end user. Refer to the “Cisco Unified Communications Manager Assistant With Proxy Line Support” and “Cisco Unified Communications Manager Assistant With Shared Line Support” chapters in the Cisco Unified Communications Manager Features and Services Guide for details of configuring Cisco Unified Communications Manager Assistant.

After you configure the Assistant information for this end user, you can return to the End User Configuration window for this end user. From the Related Links drop-down list box in the Assistant Configuration window, choose Back to User Configuration and click **Go**.

**Step 4**
To show the user privilege report for this end user, from the Related Links drop-down list box, choose User Privilege Report and click **Go**.

The User Privilege window displays for this end user. Refer to the “Viewing User Roles, User Groups, and Permissions” section on page 108-7 for details of the user privilege report.

After you display the user privilege report for this end user, you can return to the End User Configuration window for this end user. From the Related Links drop-down list box in the User Privilege window, choose Back to User and click **Go**.

**Additional Information**

See the “Related Topics” section on page 106-18.

### Associating Devices to an End User

You can associate devices over which end users will have control. End users can control some devices, such as phones. Applications that are identified as users can control other devices, such as CTI ports. When end users have control of a phone, they can control certain settings for that phone, such as speed dial and call forwarding.
Before You Begin

To associate devices with an end user, you must access the End User Configuration window for that user. See the “Finding an End User” section on page 106-1 for information on finding existing end users. When the End User Configuration window displays, perform the following procedure to assign devices.

Do not attempt to associate devices to a new end user before you finish adding the new end user. Be sure to click **Save** on the End User Configuration window before you add device associations for a new end user.

Procedure

**Step 1**
In the Device Associations pane, click **Device Association**.

The User Device Association window displays.

**Finding a Device**

Because you may have several devices in your network, Cisco Unified Communications Manager lets you locate specific devices on the basis of specific criteria. Use the following steps to locate devices.

**Step 2**
To find all records in the database, ensure the dialog box is empty; go to **Step 3**.

To filter or search records

- From the first drop-down list box, select a search parameter.
- From the second drop-down list box, select a search pattern.
- Specify the appropriate search text, if applicable.

**Step 3**
Click **Find**.

All or matching records display. You can change the number of items that display on each page by choosing a different value from the Rows per Page drop-down list box.

**Associating a Device**

**Step 4**
From the Device association for (this particular user) pane, choose the devices that you want to associate with this end user by checking the box to the left of the device name(s).

Use the buttons at the bottom of the window to select and deselect devices to associate with the end user.
Tip

Check the Show the devices already associated with user check box to display the devices that are already associated with this end user.

Use the buttons to perform the following functions:

- **Select All**—Click this button to select all devices that display on this page.
- **Clear All**—Click this button to uncheck the check boxes next to all devices that display on this page.
- **Select All in Search**—Click this button to select all devices that match the search criteria that you specified in the Search Options portion of the window. The button performs the search anew and selects all the matching devices.
- **Clear All in Search**—Click this button to deselect all devices that match the search criteria that you specified in the Search Options portion of the window. The button performs the search anew and deselects all the matching devices.
- **Save Selected/Changes**—Click this button to associate the devices that you have selected with this end user.
- **Remove All Associated Devices**—Click this button to disassociate all devices that are already associated with this end user. After you click this button, a popup window asks you to confirm that you want to remove all device associations from this end user. Click OK to confirm.

**Step 5** Repeat the preceding steps for each device that you want to assign to the end user.

**Step 6** To complete the association, click **Save Selected/Changes**.

**Step 7** From Related Links in the upper right corner of the window, choose Back to User from the drop-down list box, and click **Go**.

The End User Configuration window displays, and the associated devices that you chose display in the Controlled Devices pane.

**Additional Information**

See the “Related Topics” section on page 106-18.

**Associating Cisco Extension Mobility Profiles**

Use Cisco Extension Mobility to configure a Cisco Unified IP Phone to temporarily display as the phone of an end user. The end user can log in to a phone, and the extension mobility profile (including line and speed-dial numbers) for the end user resides on the phone. This feature applies primarily in environments where end users are not permanently assigned to physical phones.
To associate an extension mobility profile to an end user, you must access the End User Configuration window for that end user. See the “Finding an End User” section on page 106-1 for information on accessing information on existing end users. To configure and associate Cisco Extension Mobility for end users, refer to the “Cisco Extension Mobility” chapter in the Cisco Unified Communications Manager Features and Services Guide.

Deleting an End User

To delete an end user in Cisco Unified Communications Manager Administration, perform the following procedure.

**Before You Begin**

Before deleting the end user, determine whether the devices or profiles that are associated with the end user need to be removed or deleted.

You can view the devices and profiles that are assigned to the end user from the Device Associations, Extension Mobility, Directory Number Associations, CAPF Information, and Permissions Information areas of the End User Configuration window. You can also choose **Dependency Records** from the Related Links drop-down list box in the End User Configuration window. If the dependency records are not enabled for the system, the dependency records summary window displays a message. For more information about dependency records, see the “Accessing Dependency Records” section on page A-2.

**Procedure**

1. **Step 1** Choose **User Management > End User**.
   The Find and List Users window displays.
2. **Step 2** To locate a specific end user, enter search criteria and click **Find**.
   A list of end users that match the search criteria displays.
3. **Step 3** Perform one of the following actions:
   - Check the check boxes next to the users that you want to delete and click **Delete Selected**.
   - Delete all the users in the window by clicking **Select All** and clicking **Delete Selected**.
   - Choose the user ID of the user that you want to delete from the list to display its current settings and click **Delete**.
   A confirmation dialog displays.
4. **Step 4** Click **OK**.

**Next Steps**

If this user is configured in Cisco Unity or Cisco Unity Connection, the user association to Cisco Unified Communications Manager gets broken when you delete the user in Cisco Unified Communications Manager Administration. You can delete the orphaned user in Cisco Unity or Cisco Unity Connection Administration. See the applicable **User Moves, Adds, and Changes Guide for Cisco Unity Connection** for more information. See the applicable **Cisco Unity System Administration Guide** for more Cisco Unity information. Deleting the user will delete all messages in the user voice mailbox.
