# Cisco IP Phone 7800 Series Release Notes for Firmware Release 14.2(1)SR2

These release notes support the Cisco IP Phone 7811, 7821, 7841, and 7861 running SIP Firmware Release 14.2(1)SR2.

## New and Changed Features

### Features Available with the Firmware Release

The following sections describe the features available with the Firmware Release.

#### Configurable DNS when DHCP is on

With this feature enhancement, the end users can modify the DNS address on the phone when DHCP is on. After a network reset in the phone menu, the DNS address will be reset and the phone will then automatically get a DNS address from the DHCP server.

## Caveats

### View Caveats

We report open and resolved customer-found bugs of severity 1 to 3. You can find details about listed bugs and search for other bugs by using the Cisco Bug Search Tool. For more info on using the Bug Search, see [Bug Search Tool Help](#).
