Search for Bugs

Bug Classification

Known defects, or bugs, have a severity level that indicates the priority of the defect. Development managers usually define bug severity. Severity helps the product team focus on bug fixes for future releases and prioritize fixes.

The following table describes bug severity levels:

Severity level		Description
1	Catastrophic	Reasonably common circumstances cause the entire system to fail, or a major subsystem to stop working, or other devices on the network to be disrupted. No workarounds exist.
2	Severe	Important functions are unusable and workarounds do not exist. Other functions and the rest of the network is operating normally.
3	Moderate	Failures occur in unusual circumstances, or minor features do not work at all, or other failures occur but low-impact workarounds exist. This is the highest level for documentation bugs.
4	Minor	Failures occur under very unusual circumstances, but operation essentially recovers without intervention. Users do not need to install any workarounds and performance impact is tolerable.
5	Cosmetic	Defects do not cause any detrimental effect on system functionality.
6	Enhancement	Requests for new functionality or feature improvements.

Search for Bugs

Use the **Bug Search** page to obtain more information about a bug.

- 1 Go to <https://tools.cisco.com/bugsearch>.
- 2 Sign in with your Cisco.com user ID and password.
- 3 Enter a bug ID or specify search parameters.

For more information, select **Help** at the top right of the **Bug Search** page.

Open in this Release

Identifier	Severity	Headline
CSCum80191	2	GUI unresponsive on adding large enterprise group (10k users).
CSCup78097	2	Jabber search on a user is returning multiple Outlook contacts for users.
CSCum57529	3	Client hangs after returning from Lock status.
CSCun68421	3	Cannot reconnect after hibernate/resume in HA mode.
CSCuo90291	3	Jabber screen sharing quality varies due to cached low bandwidth level.
CSCup14715	3	Restricted number is not stored in call history of Jabber for Windows.
CSCup29889	3	Phone, company and photo intermittently are missing on Windows 8
CSCup30350	3	MS voice recognition causes Jabber to crash.
CSCup30905	3	Jabber for Windows 9.7 UDS service discovery fails with Hardphone.
CSCup52168	3	Message could not be delivered to contact who seems to be online.
CSCup82773	3	Call drops after a temporary network loss.
CSCup70296	3	Jabber incorrectly modifying Nickname field.
CSCup38516	3	Jabber login issue with '_cisco-uds' if the password is in 'Umlaut' format.
CSCup84971	3	AllowUserCustomTabs=false doesn't work if you have a custom tab created
CSCup50047	3	Jabber 9.7 configured "Display (Caller ID)" not shown for Dif locale.
CSCul53699	3	Double Ring Back tone on client.

Fixed in this Release

Identifier	Severity	Headline
CSCup23913	2	Multiple Vulnerabilities in OpenSSL
CSCun55968	2	Intermittent SSO Login Failure - XML displayed in login window
CSCuo95351	3	Presence shows offline while chatting with Buddy

Identifier	Severity	Headline
CSCuo32278	3	In call history, missed calls show VM pilot number as a caller
CSCup32329	3	Jabber Webex SSO should not clear Session Info on 401
CSCup28751	3	Czech characters in name not displayed correctly when used through UDS
CSCuo73272	3	Intermittent crash uploaded from Alpha
CSCuo73369	3	Call history in Jabber Windows does not record calls with * dialing
CSCul02324	3	Takes 1 minute to go offline after sign out/exit
CSCuo82526	3	MRA Jabber does not send cookie x-auth token with login request
CSCuo83479	3	Can't view contact's profile although permission is on
CSCup44348	3	No presence bubble visible when Outlook launched first time
CSCuo76001	3	C2X doesn't work after logout/login in Cloud SSO
CSCup39611	3	Jabber 9.7.2 requires Voicemail server config on IMP
